Notice of Protest to Application # 71028

We, the undersigned, members of the Eagle Pines Water Users Association, protest the Application of the Westridge Association # 71028 on the following grounds:

1. We are concerned that the drilling of an additional well will diminish the production of our existing well.
2. We have requested assurance from the applicants hydrologist that no damage would result but have not received any such assurance.
3. The applicant has made no provision for the storage or disposal of excess (waste water) on its own property or properties.
4. We have requested documentation as to grants of easements along our existing underground lines through Westridge property but none has been provided.
5. We have been unable, for the above stated reasons to reach any written agreement regarding the sharing of the cost of repairs to the existing well or as to our acceptance of Application # 71028, now pending before you.
