

MEMORANDUM

Date: December 30, 2003
To: Transfer 70857
From: amerritt
Re: sufficiency memo

This application proposes to add seven new wells as points of diversion to the existing well network. Note that two new wells will be drilled while the other five wells exist as drainage or injection wells that will be converted to production wells. The addition of these wells is needed to maintain overall production capacity to the A and B Irrigation District system since the existing wells have lost production in recent years.

Authority to File:
The applicant is the present owner listed on the data base.

Water Right Validity:
Validity of the rights involved: All rights involved have been partially decreed in the SRBA.

Injury to Other Water Rights:
None apparent.

Enlargement of Use:
Does not apply since only adding points of diversion.

Local Public Interest:
It is in the local public interest to maintain diversion capacity to district.

Beneficial Use/Conservation of Water Resources:
No issue identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

Other issue: None identified.
