Transfers 71070, 71071
water rights 35-13490, 35-13491

I have reviewed the Groundwater Rights Transfer Spreadsheet for the change of 10 acres from a well in T4s, R31e, sec 29 swnw to my 2 wells in T4s, R33e sec 11 ssw. I purchased this water right from Superior L & L. This change will split the 10 acres into two parcels of 5 acres each.

The maximum diversion volume allowed for each 5 acre change of place of use/point of Diversion would be 20 acre feet/year. The change of this water use/point of diversion Shows an increase depletions to the Shelley to Neeley section of the Snake River.

To comply with the requirements of the transfer guidelines, I propose to reduce the acres irrigated from 5 acres each to 4.5 acres each lot. The total transfer diversion volume for each 4.5 acre lot would then be limited to 18 acre feet/year. Further more I will comply with the additional water diversion volume limits as set forth in the condition below.

Beginning on the date of approval of Transfer 71071 Right 35-13490 is limited to following schedule of allowed diversion volume. The diversion of water shall be evenly distributed throughout the authorized season of use, except that minor variations are allowed for seasonal fluctuations in water requirements. The right holder shall file a notice of intent with the Department prior to increasing the annual diversion volume each time an increase according to the schedule is sought.

Year 2004 the right is limited to 2 afa.

Year 2005 the right is limited to 7.5 afa.

Years 2006 through 2007 the right is limited to 9 afa.

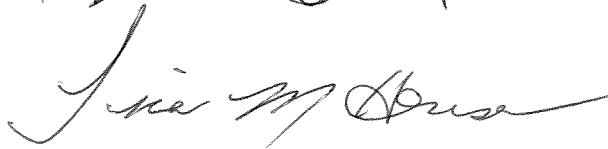

Years 2008 through 2010 the right is limited to 12 afa.

Years 2011 through 2023 the right is limited to 15 afa.

Years 2024 and beyond the right is limited to 18 afa.
