RE: App. For Transfer 70893

Dear Bob;

Enclosed is a corrected application for your review. If the application is satisfactory, it needs to be signed before a notary by you and Kathi. In addition to the signed application, we need a copy of the deed conveying the property from Dave Millard to you. We also need a detailed plan of the proposed ponds, with surface dimensions and depths.

In order for this transfer to be approved without affecting the priority date of the water right, you must justify the need for the requested flow rate. If you cannot justify the requested rate, the right will be subordinated to future developments for uses other than recreation. Types of justification could include conveyance loss in the ditch, losses in the ponds from evaporation and seepage, water-quality requirements, etc. I do not know what the practical effects of subordination would be.

Regards,

James E. Stanton
Sr. Water Resource Agent

P. S. We show License 47-7741, which covers the geothermal well on your property, to still be in the name of David Millard & Crystal Springs Ranch. SRBA Claim 47-2145 is also in his name. You need to file changes of ownership on these rights if you haven't already done so.
