Re: Picabo Livestock transfer – PPU

Dear Jim:

Pursuant to your request, we have completed a GIS analysis of the Picabo Livestock property, specifically the delineation of the PPU as it should be described after the transfer. The enclosed map and acreage list is being sent in draft form, because I would like you sign off on the analysis before it is finalized.

The PPU boundary on the map encloses all land on the Picabo Livestock property which could be irrigated during some seasons, including the additional land in the Luduc Springs area. This total is 3162.9 acres. This is not equal to the actual irrigation on the ranch – the allowable irrigation within this PPU will remain the same at 2711.3 acres.

Please review the analysis and if we need to meet to discuss any issues, let me know. I will finalize the map once you are in agreement with the analysis.

I am including with this letter a disk containing the ArcView files used to create this map, with the exception of the rectified 2000 photo. The rectified composite photo is too large to send. Hopefully, the shape files should correspond with the coordinate system you are using. If there are any problems bringing up the ArcView files, please contact Mitch in our office.

Regards,

Charles G. Brockway, P.E.
