Subject: Application for Transfer – Meridian School District (Eagle High School)

Dear Steve:

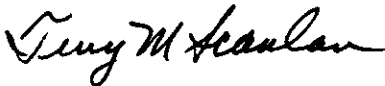

On behalf of Joint School District No. 2, I am pleased to submit the enclosed Application for Transfer of Water Right. A check for the \$250 application fee is enclosed.

The application for transfer proposes changing the point of diversion for water right number 63-8437B. The change would involve constructing a new irrigation well for Eagle High School. The High School currently shares an irrigation well (the Ricks Irrigation Well) with water right 63-8437A (Keith Ricks). If the proposed transfer is approved, the school district will construct a new well at Eagle High School for 63-8437B and stop using the Ricks Irrigation Well. The Ricks Irrigation Well will continue to be used as the point of diversion for 63-8437A. The Ricks Irrigation Well and the proposed Eagle High School Well are located in the SWNE of Section 12.

I have requested proof of ownership for the Eagle High School property from the School District. The proof document (tax notice or warranty deed) will be forwarded as soon as it is received.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan, P.E.
