Re: Field Examination of Permit No. 63-8236

Mr. Robert P. Walker, P.E.
Boise Water Corporation
P. O. Box 7488
Boise, ID 83707

Dear Mr. Walker:

The examination of Boise Water Corporation's water use under Permit No. 63-8236 was made on July 7, 1977 during a routine maintenance round. The maintenance man was present during the measurement. The exam was scheduled at Boise Water Corporation's convenience, and if it was an inappropriate time for the exam to be made, Boise Water Corporation should have scheduled the exam differently.

You indicate in your letter that we are "allowing" you a rate of diversion of 2.57 cfs. This is not quite accurate. We are proposing that a license be issued for 2.57 cfs based on the examiner's measurement of a rate of diversion of 1154 gallons per minute or 2.57 cfs. Since water rights in Idaho are based on beneficial use of the water, the field examiner can recommend a license for no more water than what is being used. I remind you that since the discharge is into a pressure system, pump ratings can be very misleading in estimating well yield.

If you feel that a remeasurement of the well in question will yield different results, please contact me to schedule another examination. If you do not contact me within 30 days, we will assume you agree with the previous measurement and issue a license as set forth in our letter of February 21, 1978.

Gentlemen:

Re: Permit No. 63-8236

In reference to your letter of February 21, 1978 concerning the allowable appropriation of ground water under the above referenced permit, we wish to request a reconsideration. Under the permit you are allowing us 2.57 cfs (1,150 gpm). In order to meet the demands generated by our present customers in this area, we have to pump this source at an average of 1,400 gpm, which is equal to 3.57 cfs. At times during peak consumption periods, we pump as much as 1,600 gpm or 3.57 cfs. Therefore, if at all possible, we would like to request an increase in the allowable appropriation at least to 3.60 cfs, which would accommodate present demands within this portion of our system.

I would appreciate your consideration in this matter.

Sincerely yours,
