Gentlemen:

This well will serve customers in our lower system which includes the downtown area. We are presently serving approximately 10,000 customers in this area. Growth is anticipated at 2.25% each year and in five years we will be serving 11,300 customers in this same area.

Enclosed is Fig. 3 from CH2M report on the water systems in metropolitan Boise. This shows a summary of measured demands and projected demands based on their population growth studies.

Our present wells serving the downtown area have an approximate capacity of 20.5 mgd with storage capacity of 6.3 mg.

In order to meet the increased daily demands, the summer peak load and provide adequate fire protection to this area, this well is very necessary.

Very truly yours,
