Re: Permit No. G-26046

Mr. Walter H. Smith, Vice-President
Boise Water Corporation
P. O. Box 1809
Boise, Idaho

Dear Mr. Smith:

This acknowledges receipt of the depositions of Holder and two witnesses and the affidavit of publication in the Idaho Daily Statesman in proof of completion of works and beneficial use under Permit No. G-26046.

Before a permit can be licensed, the law requires that a field examination be made by an engineer from this department. At this time we cannot say just when this will be made but our field engineer will contact you prior to the time he is to make the inspection so that you can arrange to accompany him.

Very truly yours,

GEO. N. CARTER
State Reclamation Engineer

Permit No. G 26046

Proof of Application of Water to Beneficial Use
and Completion of Works
Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Walter H. Smith, 623 Idaho Street, Boise, Idaho, Water Utility Operator

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Boise Water Corporation, Boise, Idaho. Its Vice-President.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit No. G 26046, approved Nov. 4, 1955 with date of Priority Oct. 31, 1945.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Source of supply is ground water and the point of diversion is a well situated in the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 31, TWP 4N, R2E, BM, on Lot 15, Bl 3, Westmoreland Subdivision

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. The well is 901 ft. deep and contains 297 ft. 12" casing and 472 ft. 8" perforated casing. Installed in the well is a Johnson Deep Well turbine pump with SES 8 stage impellers & powered by a 30 HP motor. Pump column length from the surface of the ground to bottom of suction of pump is 85 ft. Pump is capable of diverting 400 gpm @ 200 ft. head to the water distribution system. Discharge varies with the head on the system and varies between 380 and 550 gpm.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is pumped into the water distribution system serving Boise and adjacent territory.

Ques. 6-a If this is a ground water permit, give name and address of person that drilled the well.

Ans. Russel Cows, 1514 Longmont Ave, Boise, Idaho.

B26046

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. See answers to questions 4, 5, and 6 above.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. All that can be made available for a general municipal water supply.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. Not applicable.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. It is estimated that the following water was pumped to the Boise Water Corporation system and beneficially used from 1956 through 1960 from the well on Lot. 15, Bl. 3, Westmoreland Subdivision, Boise, Ada County, Idaho, under Permit No. G-26046.

Ans. Earl C. Reynolds, Jr. - over the age of 21 years - 628 Idaho
Building, Boise, Idaho - Civil Engineer. Idaho License No. 718

Ques. 2. Are you acquainted with Boise Water Corporation, the holder of Permit No. G 26046? How long have you known him and where does he reside?

Ans. Yes - 13 years - Boise, Idaho

Ques. 3. Have you read or heard read said Permit No. G 26046, and are you familiar with its provisions and conditions?

Ans. Yes

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Well is located on Lot 15, Block 3, Westmoreland Subdivision near Boise, Idaho. The source of water supply is from a subterranean well 901' deep below the surface of the ground. The well contains 297' of 12" casing and 472' of 8" perforated casing. Installed in the well is a Johnson Deep Well turbine pump with 8 ES 8 stage impellers and powered by a 30 HP motor. The pump column length from surface of the ground to the bottom of the suction of the pump is 85 feet. The pump is capable of diverting 400 gpm at 200 ft. head to the water distribution system. Dis-
duct to charge varies with the head on the system and varies between 380 gpm and 550 gpm. The pump is connected to the distribution system by means of an

per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I observed the pump in operation. Inasmuch as there was no meter on the system, I observed the discharge pressure and the characteristic curves of the pump impellers that are installed in the well. From this we can calculate that between 380 gpm and 550 gpm are being discharged into the water distribution system.

Re: Permit No. G- 26046

Date: Sept. 1, 1960

Boise Payette Lumber Co.
Box 200, Boise, Idaho

Dear Sir:

The date for proofs of Completion of Works and Application of Water to Benefi-
cial Use, as set out under the terms of Permit No. G- 26046 are due not later
than November 4, 1960.

Before these proofs can be made, the statutory requirement is that a notice of
your intention of proof be published once a week for four consecutive weeks in
a newspaper within the county in which the land is located. In completing the
Notice of proof for publication, the information should be taken from your Per-
mit, including any amendments made in connection with a change of point of diver-
sion or land list which has been recorded in this department. If changes have
been made and no amendments are on record, we advise that you request a form
for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to
this department at least forty (40) days before the above mentioned date,
(allowing for four weeks publication). Please give the name of the town, the
address of the place where the depositions will be executed, and, the name of
notary public before whom you will appear to make the depositions of proof
(this may be at any place convenient for you and your two witnesses), the
quantity of water filed; for what purpose it is used; the point of, or points of
diversion; and the location of use or the lands which are irrigated -- all by
legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice
published in the designated county newspaper at your expense. This is to be
returned with Form 36.

At the time we send the notice to the newspaper we will send to you the forms
for the depositions of holder and two disinterested witnesses. It is important
that the depositions be executed at the time, on the date set, at the place
named and before the notary public, as advertised in the publication notice.

Very truly yours,

GEO. N. CARTER
