RECOMMENDATION OF WATERMASTER

Application No: 70676

Applicant's Name: Six S Ranch INC.

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application.
- b) ☒ I do not oppose approval of this application if it is conditioned as

follows: Per the Attached Email, provided

definition's and decreed water right on 45-302

is correct 'Dry Farm' vs the .80 CFS it had. 2

kind no problem. Pending the decreed dates not changing
even though it is consolidated and the water is available.

- c) ☐ I oppose approval of this application for the following reasons:

- d) Additional Comment : _____

Kelly,

I received an application of transfer 70676 for the following rights to be consolidated into one area of use. The water rights are 45-241, 45-258, 45-302 and 45-2738. I find no problem with the rights. I am questioning two (2) diversion points.

1) If 45-302 (known as Snodgrass Place) which has .80cfs is being moved up stream as the new diversion point, do I understand that the original ground will no longer have a water right?
2) At the point of diversion currently used for the property of 6S Ben on Marsh creek, the graphics received (pages 18 & 19) of the packet of pages 1 thru 19 shows the injection location at same point of diversion! I need to know what the definition of "injection location" means and if it is where everything is tied into the system at this point, then we have a problem.

a) The property is not located on the 6 S Ranch, but someone else's.

b) The injection system or deep well is setup for injection of surface water & ground where the deep well is currently located and is on 6 S Ranch property (known as 6S Ben). It is located in 11s25e32t (swswsw). Are they making a change or is it staying at the same place and they have indicated on the graphic incorrectly?

I don't know who the IDWR resource person is that was working with the 6S Ranch people, can you help me on this?

Thanks for any input, I hope I have not confused you.

Don G. Gunderson
