

MEMORANDUM

Date: June 2, 2003
To: Transfer 70605 File
From: Corey Skinner
Re: Evaluation of Sufficiency of Information Submitted

Application proposes changing the location of one of the points of diversion for three decreed rights totaling 0.81 cfs on Cassia Creek to a new location located approximately 2000 feet upstream. The proposed new point of diversion is located approximately 2.25 miles south and 6.75 miles west of Malta. The rights involved with the application all list the same two points of diversion and the application proposes changing one of the points of diversion to a new point of diversion and keeping the other existing point of diversion. The rights involved with the transfer have all been decreed in the SRBA.

- **Authority to File:**
See Warranty Deed in file conveying property involved in transfer to applicant.
- **Water Right Validity:**
Rights involved with the transfer have been recently decreed in the SRBA.
- **Injury to Other Water Rights:**
None anticipated. The move of the point of diversion upstream is through a stretch of the creek where there are no other diversions. The point of diversion that is being replaced, is also utilized by Wally Sears Jr. & Ramona Sears, but they have filed a transfer that adds the new point of diversion proposed by this transfer to their rights (see transfer 70608).
- **Enlargement of Use:**
None apparent
- **Local Public Interest:**
Application filed to use a point of diversion that can be utilized by the local flood control district.
- **Beneficial Use/Conservation of Water Resources:**
No negative impacts anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
