Describe the reason for the proposed changes

About 80 acres of land are being traded between 2 adjacent farms to square up the properties for more efficient operation of sprinklers. Also, my existing wells do not pump the licensed flow rates; I want to drill another well to get the additional allowable flow. I have had to supplement my water supply with shares of Milner Irrig. District and Southwest Irrig. District, but this is inconvenient and the water is not always available. It could take 5 years to complete this project.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change
