Comment: Reviewed by Adjudication Staff: N/A

Mitigation Plan or acceptance form: N/A

Municipal Rights Anticipated Horizon Information: N/A

2. jstanton 7/15/2003 Comment/Analysis

Comment: This is a routine transfer that just corrects the record without making any physical changes to the pod or pou. Jeff Rau of Brockway Engineering completed a field examination of this system of this property in connection with Permit 37-20809, and determined that the main house lies in both tracts rather than just the SE/NE as listed on the application; based on this, I entered both tracts for the place of use. (The permit covers excess irrigation on the property). Recommend the transfer be approved.

Authority To File: The applicant is the owner of the water right as recorded with IDWR, so this does not appear to be an issue.

Water Right Validity: The right was recently decreed in the SRBA, so forfeiture does not appear to be an issue.

Injury To Other Rights: No issues identified.

Enlargement of Use: None requested.

Local Public Interest: No issues identified.

Beneficial Use/Conservation of Water Resources: No issues identified.

Review of the application finds that there are no clear inconsistencies with criteria set forth in Sec. 42-222 I. C. preventing processing of this application. At least prior to advertising, no other issues have been identified that would require further review or submittal of additional data by the applicant.

3. jstanton 7/15/2003 Legal Notice Remarks

Comment: This application merely corrects the legal description of the point of diversion and place of use without requesting any changes to the actual water system. The property is located about 7 miles north of Ketchum on the west side of Hwy. 75.
