Dear Ron,

The Burley Irrigation District has resubmitted the application to add the Herbert Pump as a recognized point of diversion. Enclosed is a copy of the application, the letter I returned to them, as well as the standard forms and letter sent for watermaster recommendations. This office feels that we can consider this the same application since there are no changes from the previous filing, except for the Chairman of the Board's signature.

The BID does not accept any other points of diversion from the Snake River as sanctioned by the district. If you know of any pumps of this nature please notify this office, the BID, and perhaps the pump owners so that proper forms can be completed for those points as well.

Please return your input as soon as possible so we can forward this on to the State Office for speedy processing. Thank you for your previous comments and we hope that things will work out for the best. If you have any questions please contact me and I'll address them post haste.

Dear Mr. Richins,

The Department has received the typed application for transfer which adds the Herbert Pump as a point of diversion. Because there are no changes in the application other than now having the signature of the Chairman of the Board the application is not considered amended and will not have to be readvertised. We are returning the check submitted with the application since readvertising is not needed. Ron Carlson, Water District #1 Watermaster, will be notified of the situation and will have another opportunity to comment on the small pumps he thought were installed under BID water rights. My suggestion is that you contact him and reach an understanding concerning these pumps, as well as to develop a delivery schedule for the Coors, Carey and Herbert pumps.

In summary, the department is continuing to process the application as if there was no question about the authenticity of the previous filing. There were no protests of the advertisement and the file will be sent to Boise for final action as soon as Mr. Carlson submits his recommendation. Should there ultimately be a determination between you and Mr. Carlson that there are indeed small pumps in the Snake River using BID water then a transfer will need to be filed to cover these.

If you have any questions please contact me and I'll help however possible.

Sincerely,

Douglas Jones, EIT

Dear Mr. Jones,

In response to your letter of February 27, 1989, I am submitting this reply along with ~~the~~ typed application as per your request.

The Coors and Carey pumps are the only other diversions out of the Snake River that are sanctioned by the Burley Irrigation District. If there be any others, we are not aware of same and have not granted permission for their installation.

We trust that this application can now be quickly processed.

Dear Mr. Richins,

The Department is returning the original transfer application as per our telephone conversation of last week. We are retaining a copy of the application and are maintaining an active file because the fee was paid, advertising is complete, and we do not have a written statement requesting withdrawal of the application. If the District wishes to continue with the transfer the Department must receive an original, signed application and a \$20 readvertisement fee within 30 days of this letter. Alternatively, you may choose to formally withdraw the transfer application by submitting a written statement to that effect, there would not be a refund due since advertising is complete. If we do not receive a response within 30 days the process will be terminated and the file voided. Submittal of an application after 30 days or after withdrawal will be subject to the full \$50 fee.

Should the District continue with the transfer we suggest retyping the application and listing all points of diversion (including lawn and garden pumps) on the Snake River on a separate sheet of paper. The Coors and Carey pumps were added in 1986 via transfer #3246. Additionally, the District will be required to provide the Watermaster with the diversion rates and times for these added points of diversion so he can correctly deliver the water to the diversions. If Departmental assistance is needed to correctly fill in all parts of the application please make an appointment with me and I'll be happy to help.

If you, or anyone involved, has any questions or needs information please contact me and I will assist in any way possible.

Sincerely,

Douglas Jones, EIT

RE: Burley Irrigation District Transfer
01-0007, 01-0211B, 01-0214B

Douglas Jones
Department of Water Resources
Southern Region
2148 4th Ave. East
Twin Falls Idaho 83301

Dear Doug:

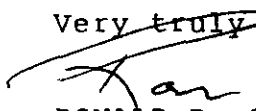

I have reviewed the application for transfer for Burley Irrigation District, 01-0211B, 01-0214B, 01-0007 and have the following comments and recommendations.

Burley definitely needs to file a transfer to establish points of diversion for proper delivery of water under their water rights. However, we should make sure that all PD's are listed on the transfer. As I recall there are some small (lawn and garden) type pumps that Burley claims to be delivering water to that should also be included. I would recommend retyping the application with the PD's listed on a separate sheet if necessary.

Once this is done we will expect Burley to establish a mechanism for providing us with the diversion rates and times. Without this information we have no way to correctly deliver to the added diversion points.

As a house keeping matter, I question if the manager has the authority to sign the transfer application. You might want to confirm this before the application goes too far down the processing line.

Very truly yours,

RONALD D. CARLSON

Re: Notice of Proposed Change of Water Rights 01-0211
01-0214
Gentlemen: 01-0007

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

In order to receive payment, an affidavit of publication must be submitted to the Department along with the publication bill.

Very truly yours,

Mary A. Newby
Sec/Office Coord.
