Department of Water Resources

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that The United States of America, acting through the Regional Director,
Pacific Northwest Region, Water and Power Resources Service

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

(1) Date of priority: (When was the water first applied to a beneficial use) May 7, 1942

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

(2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)

Snake River tributary to Columbia River

(3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Quantity	(cfs, gpd, AFA)	Use	(Domestic, Irrigation, Stock, Etc.)	(Both dates inclusive)	
				(Mo., Day)	(Mo., Day)

(4) 1700 cfs TOTAL QUANTITY USED.
(cfs, gpd, AFA)

(5) A) Point of diversion: (Location of point where water is diverted from its source)

SE 1/4 NW 1/4, Sec. 1 Twp. 9 S. Rge. 25 E. B.M., County of Minidoka

Additional points of diversion:

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.). Give sizes and capacities: be as specific as possible. Describe any changes in the system and give the date of the change. Flow is from reservoir (Lake Walcott) through 2 10" diameter penstocks each approximately 70' long, to a single 7000 horsepower, 180 rpm fixed propeller turbine. Flow then returns (100%) via draft tube to the Snake River. Maximum capacity is 1700 cfs.

(6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

B) If water is used for other than irrigation, fully describe that use, being as specific as possible: Water is used for hydroelectric generation. The capacity is 5800 kw at 50 ft gross head and full gate discharge of 1700 cfs. Power generated is used to meet loads in the southern Idaho BPA network, and is an incidental byproduct of normal Snake River operations.

NOTE: Include here the type and number of stock watered: None

¹ An adjudicated claim priority date likely will be the verified date the diversion started, not the date the new project construction was decided upon or even started. The dates will be verified in the examination for the adjudication. These claims were refiled on August 11, 1989 for the Snake River Basin Adjudication.

² As mentioned in regard to the American Falls Power Plant, the state established by a ratified constitutional amendment of Article XV, Section 3, on November 6, 1928, the authority to "regulate and limit the use" of water for power purposes. Regardless of the issue spurring the constitutional amendment, the general pattern of subordinating power water rights to subsequent upstream diversions for other than power purposes did not start until 1952. See permit for C.J. Strike (02-02080). The Bureau of Reclamation, however, might forgo claiming non-subordination privileges in its water right claim particularly if the diversion under the claim did not start until after November 6, 1928.

³ It is probable, the Snake River Basin Adjudication Court would rule that the water right owner has given up what could have been "grandfather" rights to a non-subordinated water right that likely would have been approved if they had used the licensing process.

⁴ Idaho Code 42-203B(5) provides that the State can enter into agreements with holders of water rights for power purposes to define that portion of their water rights that are to be non-subordinated to upstream depletions. Such an agreement with Idaho Power Co. in 1984 for the projects below Milner Dam provided for much lower non-subordinated rights than the total of the original water rights. A similar agreement for the American Falls project and the Minidoka Project with Idaho Power Co. and the Bureau of Reclamation would provide a legal basis for the past allowance of upstream diversions including ground water diversions.
