Dear Mr. Arrizubieta:

We recently received your application for permit to appropriate the ground waters of the State of Idaho. Upon reviewing your application it was determined that several items needed to be corrected. Also, several questions needed to be answered in order to clarify your use of the water.

Under Item 4, I recommend you apply for an additional 0.02 c.f.s. of stockwater for your 5 dairy cows and 250 head of sheep. Under Item 5b, no amount of water should be entered unless you intend to store water in a reservoir or some similar structure. Under Item 6a, please describe the delivery system. Is the system open discharge into ditches for purposes of flood irrigation or is water delivered by means of a sprinkler system? Under Item 2, you indicate the source as ground water. This would be a proper definition if you are proposing to divert water from a well. If your water is diverted from a well, indicate the diameter and depth of the proposed well under Item 6c. If your source is other than described above it may fit into a surface water category. If you have questions pertaining to the type of source, please call this office for assistance. Under Item 8a and b, be sure to indicate the Twp. as 14N (North) and Rge. 22E (East). Finally, under item 8a(2), unless you plan to generate hydro-electric power please leave this item blank. If you plan to generate power you should file another application for that purpose.

We are returning to you your application and your check No. 92-297 in the amount of \$45.00, together with a new application which we would like you to complete. Please resubmit the new application and your check with the appropriate filing fee. If you decide to alter the total amount of water appropriated your filing fee may change. Please check the filing fee chart listed on the instructions.

If there are additional questions or you need further assistance, please contact me.
