William Kirkpatrick. Final Proof is to be made before you,
as Notary on the 6th day of December, 19 63, at 2:00 o'clock P.M.,
at Salmon, Idaho.

As of this date we have mailed the Notice to the Recorder Herald
Salmon, Idaho, with instructions to publish it once a week for four consecutive
weeks prior to the date set for final proof and then mail the Affidavit of Publi-
cation and statement of costs to you.

It is important that the enclosed depositions be executed by the permit
holder and two disinterested witnesses who are familiar with the terms of the
permit and the work done thereunder, at the time, on the date and before you, as
Notary, as stated in the publication notice. It is very important and necessary
that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have
been signed, that your Notary's seal has been placed on each and that all depositions,
(holder and two witnesses) are being returned. Also be sure to enclose the
Affidavit of Publication.

Re: Permit No. 25304

Date:

Oct. 1, 1963

William Kirkpatrick
May, Idaho

Dear Mr. Kirkpatrick:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 25304 is due not later than Dec. 7, 1963. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date, the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated - by legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public, as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by field inspection to have been irrigated at the time of proof.

Re: Permit No. 25304

Mr. William Kirkpatrick
May, Idaho

Dear Mr. Kirkpatrick:

Enclosed are forms for publication of notice of proof of beneficial use of water.

You have been issued the certificate of completion of works on your permit to divert 4.8 cubic feet per second of water from Patterson Creek to irrigate 240 acres of land in W¹NE¹, NE¹, Sec. 20, T. 14 N., R. 23 E.

Proof of beneficial use of the water is due on or before December 7, 1963. That proof can be made at any time you desire, though it would be best for you to have all the land possible under irrigation if you make the proof before December 7, 1963.

The enclosed forms, with instructions, can be completed from information in your permit, if the point of diversion and the description of the land being irrigated has not been changed from that shown on the permit. If the point of diversion is actually in a different subdivision or you are irrigating land not shown on the permit, you should request amendment form so that the permit record would show the true location as shown in the notice of proof.

Dear Sir:-

Under the terms of your permit No. 25304 you are required to complete you diversion works on or before December 7, 1958. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
