INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho,

John S. Norman

May, Idaho

Dear Sir:—

Under the terms of your permit No. 17339 you are required to complete your diversion works on or before July 25, 1932. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

R. W. FARIS
Commissioner of Reclamation.

Geo N. Carter,
Commissioner of Reclamation,
Boise, Idaho.

Dear Sir:

I have received my application for water permit, and I notice that you have approved the same from Big Spring Creek, but not from Duck Creek, as requested. The Duck Creek, water was what I particular wished to get in my fileings. I nodoubt failed to word my application in the wright way.

What I wished to say in the application, was that I wanted the water from Duck Creek, with permission to go to Big Spring Creek, to make up any shortage existing in Duck Creek,

There is usually the amount of water that I am asking for in Duck Creek, and unless there has been other recent fileings in Duck Creek, I would much rather have my fileings there if I can not get them in both places as requested.

Should you be able to make this change for me, my diversion would be from Duck Creek, at approximately 485 yards below the point where the Ellis Ditch, crosses Duck Creek. My ditch would then be approximately 508 yards long.

There is no one useing this duck crrek water, below the Ellis, Ditch. Duck Creek is a tributary to Big Spring Creek, and there is always surplus water below the point where it enters Big Spring Creek.

I am returning the application, hoping that you can make such changes in it that I will be allowed the water requested.

Yours Truly,
