Re: Recommended place of use acres in Sections 25 and 36

45-176 was decreed to the NESE, SWSE, & SESE of Section 25, T13S, R21E, which could mean a maximum of 120 acres. 118 acres were claimed and I could recommend 118 acres in those $\frac{1}{4}$ $\frac{1}{4}$'s based on the 1987 aerial.

45-693 was decreed to the NWSE of Section 25, T13S, R21E, but the claim was for 24 acres in Section 36 via an accomplished transfer. (The NWSE is BLM land.) I can recommend about 10 acres as irrigated in the NENW of Section 36 and another 10 appear as still irrigated in the NWSE of Section 25, so together I would be comfortable with 20 acres for 45-693, with a grand total of 138 acres for both rights.

(I explained that domestic and stock water uses were not part of the original decrees so 43-13539 was filed to pick up the stock water use and he confirmed the domestic is no longer used.)
