Transfer filed to move irrigation rights from land in Section 25 to land located in Section 36. I have rented the land in Section 25 to a row crop farmer without these water rights. Because the sources of water involved with this transfer are quite variable, this individual uses his own canal company shares on the land in Section 25. I do not own any canal water. In addition, the application is being filed to correctly describe the existing points of diversion and sources of water. Rights 45-693 and 45-13539 list a source of water as Oakley Meadow Spring, which is a local name for a spring located near the southwest corner of my property in Section 36. Right 45-693 was originally decreed with Oakley Meadow Spring as the source of water. This spring discharges into a natural channel, and spring water flows down the channel approximately 250 feet to a point where I have constructed a small embankment that diverts the water to my irrigated lands on each side of the channel. In addition, I have added another point of diversion on Little Cottonwood Creek in Section 11 to serve as a backup diversion when I have problems with my pipeline from the diversion in Section 9. The use of the water in Section 36 is more efficient than using the water in Section 25, due to the decrease in conveyance losses.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change

5. Total Amounts Transferred

	Rate	Acre Limit	Total Acres	Volume
45-176	2.40 cfs	118.0	138.0	
45-693	0.46 cfs	20.0	138.0	
45-13539	0.05 cfs			
TOTAL	2.91 cfs		138.0
