PROOF ACKNOWLEDGMENT L

RE: PERMIT NO. 27-07436

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a flow measurement port to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the flow measurement port must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 27-07436

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1992. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

The approval of this permit authorizes the construction of a well as described on this application subject to the conditions on this permit.

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. The permit holder or his representative shall notify the Department ten (10) days prior to the start of construction unless good cause for later notification can be shown.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.

RE: PERMIT NO. 27-07436

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated November 30, 1990. No further construction or additional development is authorized under this permit unless it is reinstated.

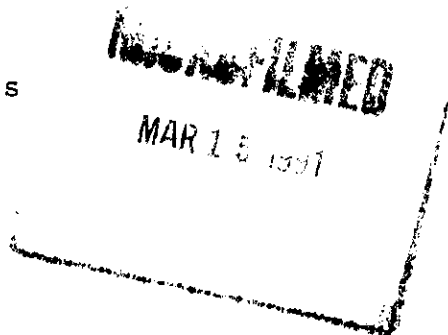

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifteen dollar (\$15) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

Dear Water Right Applicants:

Enclosed is a temporary approval for diversion of groundwater during the 1988 irrigation season.

The copy of the application for permit to appropriate water attached to the interim approval defines the various components of your temporary approval. The inclusion of the copy of the application is only for the purpose of definition, and any terms contained therein are limited by the conditions of the temporary approval. Note that the authority to use water from the well is limited to the 1988 irrigation season. Use of water from the well after that date is not authorized.

This office will continue to process the original application for permit, pursuant to Chapter 2, Title 42, Idaho Code, unless directed otherwise by you. This processing will include advertisement for two weeks in the county where the point of diversion is located.

RE: LAPSED EMERGENCY TEMPORARY APPROVAL #27-7436

Dear Mr. Bartausky:

On 10 November, 1987, the Emergency Temporary Approval of Application for Permit No. 27-7436 lapsed. Consequently, it cannot be used as a basis for the diversion of groundwater subsequent to the above date.

This temporary approval was issued on 14 July, 1987. It granted the drilling of well and diversion of groundwater to supplement irrigation needs when surface water was no longer available in 1987.

With the lapsing of the temporary approval, the status of your filing will revert to pending application for permit. It will remain on file in this office; however, future administrative review of the application will be deferred until the Swan Falls Agreement has been ratified by the Federal Energy Regulatory Commission.

You should be aware that drilling permit no. 27-87-E-007 has also lapsed. This permit was issued in conjunction with the emergency temporary approval of application no. 27-7436 and authorized the drilling of an irrigation well. This permit was in effect until 14 August, 1987.

Feel free to call or contact this office should you have questions concerning the status of your application.

Respectfully submitted,

RE: PERMIT NO. P27-07436

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

RECEIVED
MAR 05 1990

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor

RE: Temporary Approval for Application No. 27-7436

Stephen Cooper
1111 East Airport
Blackfoot, Idaho 83221

Dear Water Right Applicants:

Enclosed is a temporary approval for diversion of groundwater during the 1988 irrigation season.

The copy of the application for permit to appropriate water attached to the interim approval defines the various components of your temporary approval. The inclusion of the copy of the application is only for the purpose of definition, and any terms contained therein are limited by the conditions of the temporary approval. Note that the authority to use water from the well is limited to the 1988 irrigation season. Use of water from the well after that date is not authorized.

This office will continue to process the original application for permit, pursuant to Chapter 2, Title 42, Idaho Code, unless directed otherwise by you. This processing will include advertisement for two weeks in the county where the point of diversion is located.

Very truly yours,

RONALD D. CARLSON
Eastern Regional Manager

TEMPORARY APPROVAL OF APPLICATION NO. 27-7436

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 27-7436; and a temporary approval to divert groundwater is granted for _____ days until November 15, 1988, subject to the following limitations and conditions:

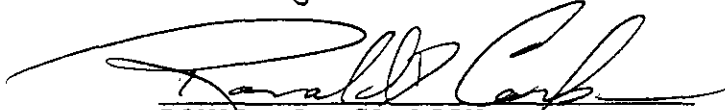

- a. The water use approved herein is subject to all prior water rights.
- b. By accepting the temporary approval and diversion of water under the temporary approval, the water user assumes all risk relative to interference with other water rights and acknowledges and agrees that the Director is authorized to take reasonable steps to insure that water is not diverted under the approval at any time the Director determines there is not water available for diversion.
- c. The water user acknowledges that the temporary approval does not establish a right to divert water except as specifically provided in the temporary approval.
- d. The water user assumes all risk that he or she will be successful in obtaining a permanent water right permit when the application is processed under the provisions of Chapter 2, Title 42, Idaho Code and the Water Appropriation Rules and Regulations. Following expiration of the temporary approval, diversion of water shall cease and the well shall be capped unless a permit is issued under Chapter 2, Title 42, Idaho Code.
- e. Violation of temporary approval conditions, provisions of the Idaho Code, or the Water Appropriation Rules and Regulations is cause for cancellation of the temporary approval and denial of future requests.
- f. By accepting this temporary approval, the water user acknowledges and agrees that the Director of IDWR is authorized to disconnect the power supply from the pump motor used to divert water under the temporary approval or to take other reasonable steps to insure that water is not diverted during any period the temporary approval is suspended or revoked, or has expired.
- g. The Director retains jurisdiction of this temporary approval, and may cancel or modify the approval, or impose additional conditions not a part of the original temporary approval conditions.

MICROFILMED

- h. The temporary approval applies only to uses and lands which normally have an adequate supply of water from surface water sources but are temporarily water short because of drought conditions.

Witness my hand this 23rd day of August, 1988.

Mr. Ronald Carlson:

Last year we made application and paid for drilling a well. Because of the limited water in Blackfoot Irrigation Co. and the fact that we will be out of water on August 24, 1988, we would like to reinstate our emergency application made in 1987.

This is necessary for us to complete our potato harvest.

RE: LAPSED EMERGENCY TEMPORARY APPROVAL #27-7436

Dear Mr. Bartausky:

On 10 November, 1987, the Emergency Temporary Approval of Application for Permit No. 27-7436 lapsed. Consequently, it cannot be used as a basis for the diversion of groundwater subsequent to the above date.

This temporary approval was issued on 14 July, 1987. It granted the drilling of well and diversion of groundwater to supplement irrigation needs when surface water was no longer available in 1987.

With the lapsing of the temporary approval, the status of your filing will revert to pending application for permit. It will remain on file in this office; however, future administrative review of the application will be deferred until the Swan Falls Agreement has been ratified by the Federal Energy Regulatory Commission.

You should be aware that drilling permit no. 27-87-E-007 has also lapsed. This permit was issued in conjunction with the emergency temporary approval of application no. 27-7436 and authorized the drilling of an irrigation well. This permit was in effect until 14 August, 1987.

Feel free to call or contact this office should you have questions concerning the status of your application.

Respectfully submitted,

Ernest Carlsen
Water Rights Supervisor

RE: Water Right No. 27-7436

Dear Water Right Applicant:

Enclosed is a temporary approval for diversion of groundwater during the 1987 irrigation season.

The copy of the application for permit to appropriate water attached to the interim approval defines the various components of your temporary approval. The inclusion of the copy of the application is only for the purpose of definition, and any terms contained therein are limited by the conditions of the temporary approval.

As described in condition of approval (k), this office will hold the original application for permit for future processing, pursuant to Chapter 2, Title 42, Idaho Code, unless directed otherwise by you. This processing will include advertisement for two weeks in the county where the point of diversion is located. It will be initiated subsequent to ratification of the Swan Falls Agreement.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES
WITH RESPECT TO TEMPORARY APPROVAL OF
APPLICATION FOR PERMIT NO. 27-7436

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 27-7436 and a temporary approval to divert groundwater is granted until November 10, 1987, subject to the following limitations and conditions:

- a. The water use approved herein is subject to all prior water rights.
- b. The water user acknowledges that the temporary approval does not convey a continuing right to divert water and does not convey any right to divert water except as specifically provided in the temporary approval.
- c. The water user assumes all risk that he or she will be successful in obtaining a permanent water right permit when the application is processed under the provisions of Chapter 2, Title 42, Idaho Code and the Water Appropriation Rules and Regulations.
- d. Violation of temporary approval conditions, provisions of the Idaho Code, or the Water Appropriation Rules and Regulations is cause for cancellation of the temporary approval and denial of future requests.
- e. By commencing diversion of water under this temporary approval, the water user acknowledges and agrees that the Director of IDWR is authorized to disconnect the power supply from the pump motor used to divert water under the temporary approval, or to take other reasonable steps to insure that water is not diverted during any period the temporary approval is suspended or revoked.
- f. The Director may impose additional conditions not a part of the original temporary approval conditions.
- g. The temporary approval applies only to uses and lands which normally have an adequate supply of water from surface water sources, but are temporarily water short because of drought conditions.
- h. The temporary approval granted under the expedited procedure shall not be effective for more than the 1987 irrigation season and will expire upon termination of the declared drought emergency, or on the expiration of the term of the approval set herein, whichever is earlier.

RECEIVED

MAR 6 1987

- i. The Director will retain jurisdiction of any temporary approval given.
- j. By acceptance of the temporary approval and diversion of water under the temporary approval, the water user assumes all risk relative to interference with other water rights and acknowledges and agrees that the Director is authorized to take reasonable steps to insure that water is not diverted under the approval at any time the Director determines there is not water available for diversion.
- k. Temporary approval granted will be of no force nor effect from and after the 1987 irrigation season. The application for permit, however, will be held by the Department for future processing under the provisions of Chapter 2, Title 42, Idaho Code, and Water Appropriation Rules and Regulations, unless directed otherwise by the applicant.

ADDITIONAL CONDITIONS OF APPROVAL

The emergency procedure for temporary approval will not be valid so long as the priority of the surface water used to irrigate the declared acreage is being served.

The applicant, by accepting this emergency temporary permit, acknowledges that the well/pump will be inoperative on or before April 1, 1988, unless the emergency status is reinstated or the application is granted permanent status.

The applicant acknowledges that the Director is authorized to enforce the above conditions in a court of competent jurisdiction.

RE: EMERGENCY TEMPORARY APPROVAL

Mr. Ron Carlson:

I am requesting my application for permit #27-7436 be considered for emergency temporary approval.

I understand the nature of an emergency temporary approval and agree to abide by the conditions imposed by the Department of Water Resources.

To obtain a permanent water right permit after expiration of the emergency temporary approval, I do/~~do not~~ want the Department to hold my application until it can be processed under the provisions of Chapter 2, Title 42, Idaho Code, and the Water Appropriation Rules and Regulations.

Respectfully yours, x

Stephen Corry
