ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

WITH RESPECT TO INTERIM APPROVAL OF

APPLICATION FOR PERMIT NO. 27-7430

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 27-7430; and interim approval is granted subject to the following limitations and conditions:

- a. Subject to all prior water rights.
- b. A measuring device or an access port of a design approved by IDWR shall be installed prior to diverting water under the interim approval.
- c. The water user acknowledges that the interim approval does not convey a continuing right to divert water and does not convey any right to divert water except as specifically provided in the interim approval.
- d. The water user assumes all risk that he or she will be successful in obtaining a permit for water which may be reallocated under the Water Appropriation Rules and Regulations. The water user accepts all risk that storage water will be available and obtainable from the rental pool in future years to allow the interim approval procedure to continue, if storage water is required.
- e. Violation of interim approval conditions, provisions of the Idaho Code, or the Water Allocation Rules and Regulations is cause for cancellation of the interim approval and denial of future requests.
- f. By accepting and commencing diversion of water under this interim approval, the water user acknowledges and agrees that the Director of IDWR is authorized to disconnect the power supply from the pump motor used to divert water under the interim approval or to take other reasonable steps to insure that water is not diverted during any period the interim approval is suspended or revoked.
- g. The Director may impose additional conditions not a part of the original interim approval conditions as determined by the Director.
- h. The filing on which the interim approval is given may be reprocessed under the provisions of Section 42-203C, Idaho Code, at the request of the water user or as determined by the Director in compliance with pertinent adopted rules and regulations and statutes.
- i. Investments made by the water user to divert and use water under the interim approval will not be considered by IDWR when reprocessing the filing under the provisions of 42-203C, Idaho Code.
- j. If construction of the well under this permit was not initiated prior to July 1, 1987, commencement of well construction or diversion of water under this permit is prohibited unless a drilling permit is obtained from the Department.

Witness my hand this 30th day of July, 1987.

PROOF DUE NOTICE

RE: PERMIT NO. 27-07430

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before June 1, 1990.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck

RE: PERMIT NO. 27-07430

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

JUN 1 1989

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor

Re: Application for Interim Permit no. 27-7430

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your amended water right application for permit. The application has been assigned identification no. 27-7430. Please refer to this number in all further correspondence.

This office is currently in the process of advertising the application in the Blackfoot News. The advertisement will be published for two weeks, and a period of ten days following the second publication will be allowed for the submission of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Ernest Carlsen
Assistant Regional Manager
