E. NARRATIVE/REMARKS/COMMENTS

This well had been examined for permit 27-7325B. The system wasn't running at the time of the exam on 7-25-95 and Mr. Oleson mentioned that it had already been examined. I pulled the license for 27-7325B and have included that information.

Mr. Oleson was a little uncertain exactly what land was included in the 7.5 acres listed in this permit. He outlined in green what he believed to be the intended area of use, on the ASCS aerial photograph.

Overlap

27-7325B 52.0AC - 1.03 CFS / Total Q = 3.42 CFS

This permit was for ground that is covered by other permit & licenses. The acres on this permit were used to fill in the gaps in the coverage of what is being irrigated by this well.

The 5 acres in the SENE 1/4 of Section 4 was a tract of ground purchased in 1990.

The 2.5 acres in NESW 1/4 Section 3 is a shortage from license 27-2118 that shows 5 acres.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 27-07426

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a flow measurement port to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the flow measurement port must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Rita Fleck
Secretary/Records Manager

Dear Mr. Oleson:

Re: Permit No. 27-7426

Returned is the proof of beneficial use form submitted to the Eastern Regional office on January 10, 1991. Also, enclosed is an instruction sheet/fee schedule. Before the department can accept the proof, an additional \$20 and a signature is required.

Note the fee schedule. Unfortunately, an adequate fee was not taken at the time proof was submitted. The department needs \$20 more.

Please sign the form and return it to this office.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

RITA I. FLECK

PROOF DUE NOTICE

RE: PERMIT NO. 27-07426

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

RE: PERMIT NO. P27-07426

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor
