ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

WITH RESPECT TO INTERIM APPROVAL OF

APPLICATION FOR PERMIT NO. 27-7399

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 27-7399; and interim approval is granted subject to the following limitations and conditions:

- a. Subject to all prior water rights.
- b. A measuring device or an access port of a design approved by IDWR shall be installed prior to diverting water under the interim approval.
- c. The water user acknowledges that the interim approval does not convey a continuing right to divert water and does not convey any right to divert water except as specifically provided in the interim approval.
- d. The water user assumes all risk that he or she will be successful in obtaining a permit for water which may be reallocated under the Water Appropriation Rules and Regulations. The water user accepts all risk that storage water will be available and obtainable from the rental pool in future years to allow the interim approval procedure to continue, if storage water is required.
- e. Violation of interim approval conditions, provisions of the Idaho Code, or the Water Allocation Rules and Regulations is cause for cancellation of the interim approval and denial of future requests.
- f. By accepting and commencing diversion of water under this interim approval, the water user acknowledges and agrees that the Director of IDWR is authorized to disconnect the power supply from the pump motor used to divert water under the interim approval or to take other reasonable steps to insure that water is not diverted during any period the interim approval is suspended or revoked.
- g. The Director may impose additional conditions not a part of the original interim approval conditions as determined by the Director.
- h. The filing on which the interim approval is given may be reprocessed under the provisions of Section 42-203C, Idaho Code, at the request of the water user or as determined by the Director in compliance with pertinent adopted rules and regulations and statutes.
- i. Investments made by the water user to divert and use water under the interim approval will not be considered by IDWR when reprocessing the filing under the provisions of 42-203C, Idaho Code.

Witness my hand this 31st day of March, 1987.

A. Glen Saxton
Chief, Operations Bureau

REPROFILMED

APR 10 1987

ATTACHMENT TO CONDITIONS OF APPROVAL

The following conditions are hereby made a part of the action of the Director of Water Resources (IDWR) on Application for Permit No. 27-7399

- d. Issuance of this permit is on an interim basis until processing can be accomplished under 42-203C, Idaho Code and is contingent upon the permit holder assigning storage water to replace water taken from other water rights as determined by the Director of IDWR.
- e. Each irrigation season before water is diverted under this permit, evidence shall be provided to the department that storage water has been rented through the Upper Snake River Water Supply Bank and assigned to the Director of IDWR for release to replace water taken from other water rights.
- f. The volume of stored water required to be rented from the Upper Snake River Water Supply Bank shall be equal to the volume of water consumptively used, as determined by the Director. For the 1985 irrigation season and each following year that this permit is to be used or until modified by order of the Director of IDWR, the volume of stored water required is 240 acre-feet (120 acres X 2.0 acre-feet/acre = 240 acre feet/year).
- g. Water shall not be diverted at any time that storage water is not available and on assignment to the Director of IDWR for purposes of replacing reductions of flow to other water right holders.
- h. The Director of IDWR retains jurisdiction of this permit to enforce the provisions of this permit, to revise the volume of stored water required, to cancel this permit for failure to comply with the conditions of approval, and to require procedural and substantive compliance with any subsequently adopted rules and regulations concerning exchange or augmentation of water supplies.
- i. By accepting and commencing diversion of water under this permit, the permit holder acknowledges and agrees that: (1) the Director of IDWR may suspend the right to divert water during any period that evidence of the required storage water supply needed for release is not on file with IDWR, and (2) the Director of IDWR is authorized to obtain a court order to disconnect the power supply from the pump motor used to divert water under this permit or by other reasonable means insure that water is not diverted at any and all times, that the right to divert water under this permit is suspended.
- j. This permit will be reprocessed under the provisions of Section 42-203C, Idaho Code, at the request of the permit holder or as determined by the Director and in compliance with pertinent adopted rules and regulations.
- k. A measuring device or an access port of a design approved by IDWR shall be installed prior to diverting water under this permit to allow the rate of diversion to be determined.

Dear Permit Holder:

We acknowledge receipt of your statement submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department.

A field examiner will contact you to arrange to examine your system.

If you have any questions regarding the field examination, please contact this office by phone at 525-7161, or in person in the third floor State Office Building, 150 Shoup, Idaho Falls, Idaho.

RE: PERMIT NO. 27-07399

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a flow measurement port to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the flow measurement port must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Rita Fleck

Dear Permit Holder:

Re: Permit No. 27-7399

This office acknowledges receipt of the proof of beneficial use form submitted on July 31, 1989.

Note the condition of approval of your permit which requires you to install a flow measurement port or other device to provide for the determination of the rate of diversion. The next step is for the department to conduct a field examination for licensing purposes. At the time the field examination is conducted, a type of measuring device must be installed. Failure to comply is reason for the department to cancel the permit.

The department understands, however, that certain methods of diversion make it impossible to install measuring devices. If this situation applies to you, discuss with the department representatives alternative techniques of measuring your diversion rate. At the time of the field inspection, the field examiner can be prepared with the appropriate measuring equipment.

If you have any questions concerning this matter, please feel free to contact the Eastern regional office at 525-7161.

Sincerely,

NINA K. SHIELDS

RE: PERMIT NO. ~~2~~27-07399

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the flow measurement port.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

RE: Interim Approval

Dear Mr. Stecklein:

Department records show that you were issued an interim approval for Application No. 27-7399. As you know, interim approvals were a temporary measure to allow users the opportunity to divert and use water until the Department could consider processing the application under the provisions of the Swan Falls Agreement.

During past irrigation seasons, you have been required to lease storage water from the Upper Snake River Water Supply Bank. Your point of diversion has now been determined to be outside of the portion of the Snake River Groundwater Aquifer which supplies surface water below Milner Dam. The water you are diverting is not currently classified as trust water.

As a result of your diversion location falling outside of the present trust water boundaries, you will not be required as a condition of interim approval to lease storage water during the 1987 irrigation season. Nevertheless, if you desire to divert water during the calendar year 1987, you must inform the Department of Water Resources, in writing, of your intent to divert. Upon proper notification, the Department will issue you another interim approval without a requirement that you lease storage water in 1987.

Regional office personnel of the Department will field inspect the place of use for all continuing interim approvals and for all cancelled interim approvals, since the Idaho statutes now dictate penalties for the unauthorized diversion and use of water. Your present interim approval will expire in April, 1987.

RE: Interim Approval for Permit No. 27-7399

Mr. LaVerelle Stecklein

Blackfoot, ID 83221

Dear Mr. Stecklein:

During 1985 you received interim approval for application No. 27-7399. This approval was for one year and was conditioned upon your leasing replacement storage from the Water Bank. If you are planning on diverting water during 1986, it appears it will be necessary for you to again lease replacement storage. In April, the Idaho Power Company filed suit to prevent implementation of the Department's rules and regulations, which would have allowed the Department to resume the processing of water right applications. This suit virtually guarantees that the rental of replacement water will be necessary again this year.

If you have any questions, please feel free to contact this office.

DEAR PERMIT HOLDER:

ACCORDING TO OUR RECORDS, YOU ARE THE HOLDER OF A WATER PERMIT ON WHICH PROOF OF BENEFICIAL USE OF WATER WAS NOT SUBMITTED BEFORE JULY 1, 1985, WHICH INDICATES YOUR PROJECT IS NOT COMPLETE. THEREFORE, YOU NEED TO BE AWARE OF CHANGES IN IDAHO LAW, EFFECTIVE JULY 1, 1985, WHICH IMPACT ALL WATER PERMITS ISSUED BY THIS DEPARTMENT.

SPECIFICALLY, PURSUANT TO SECTION 42-203D, IDAHO CODE, THE DEPARTMENT MUST REVIEW ALL PERMITS FOR WHICH DEVELOPMENT OF WATER USE WAS NO COMPLETED ON OR BEFORE JULY 1, 1985, TO DETERMINE IF THEY MEET THE NEW REQUIREMENTS OF CHAPTER 2, TITLE 42, IDAHO CODE. RULES AND REGULATIONS GOVERNING THE RE-EVALUATION OF PERMITS ARE NOT YET FINALIZED. HOWEVER, IF YOU COMPLETED THE DEVELOPMENT UNDER YOUR PERMIT BEFORE JULY 1, 1985, YOU SHOULD SUBMIT A PROOF OF BENEFICIAL USE STATEMENT, STATING THAT THE PROJECT WAS COMPLETED BEFORE JULY 1, 1985 SO THAT YOUR PERMIT WILL NOT BE SUBJECT TO THE REVIEW REQUIREMENTS OF SECTION 42-203D, WHICH READS AS FOLLOWS:

42-203D. REVIEW OF PERMITS - OPPORTUNITY FOR HEARING. - (1)THE DEPARTMENT SHALL REVIEW ALL PERMITS ISSUED PRIOR TO THE EFFECTIVE DATE [JULY 1, 1985] OF THIS SECTION, EXCEPT TO THE EXTENT A PERMIT HAS BEEN PUT TO BENEFICIAL USE PRIOR TO JULY 1, 1985, TO DETERMINE WHETHER THEY COMPLY WITH THE PROVISIONS OF CHAPTER 2, TITLE 42, IDAHO CODE. IF THE DEPARTMENT FINDS THAT THE PROPOSED USE DOES NOT SATISFY THE CRITERIA OF CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL EITHER CANCEL THE PERMIT OR IMPOSE THE CONDITIONS REQUIRED TO BRING THE PERMIT INTO COMPLIANCE WITH CHAPTER 2, TITLE 42, IDAHO CODE. IF THE DEPARTMENT FINDS THAT THE PERMIT SATISFIES THE CRITERIA ESTABLISHED IN CHAPTER 2, TITLE 42, IDAHO CODE, THEN THE DEPARTMENT SHALL ENTER AN ORDER CONTINUING THE PERMIT. (2)THE DEPARTMENT SHALL PROVIDE AN OPPORTUNITY FOR HEARING IN ACCORDANCE WITH SECTION 42-1701A, IDAHO CODE, AND SECTIONS 67-5209 THROUGH 67-5215, IDAHO CODE, FOR EACH HOLDER OF A PERMIT THAT IS PROPOSED EITHER TO BE CANCELLED OR MADE SUBJECT TO NEW CONDITIONS.

Re: Interim Approvals for Seasonal Exchanges

Dear Ken:

This will acknowledge Idaho Power Company's entitlement to call certain waters provided through storage leases as the basis for the Idaho Department of Water Resources's (IDWR) approval of the development of certain wells. The following is a list of the amounts of water that the Idaho Power Company is presently aware of that it can call from the rental pool pursuant to those interim IDWR approvals:

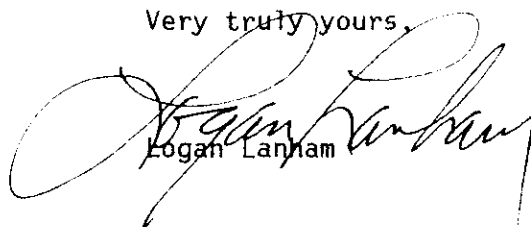

<u>Name</u>	<u>IDWR No</u>	<u>Acre-feet of Water</u>
Dennis L Marlow	27-7402	120
LaVerelle Stecklein	27-7399	240
Dwight Horsch	35-8082	120

Quality Farms, Inc	31-7416	280
N D Collaer, Trustee	27-7361	56
Alan Weaver	31-7430	264
Alan Weaver	31-7431	264
Alan Weaver	31-7432	264
Alan Weaver	31-7433	264
Total		2,386

It is our understanding that Idaho Power Company is entitled to call this water from the pool in a similar fashion to the leased water which it calls from the pool, and at the same time as that leased water is called. This understanding is the same as set out in Mr Tom Nelson's letter to me of June 27, 1985, which you are shown as receiving a copy of.

We would like to be kept informed of these interim approvals for seasonal exchanges as they arise.

You and I have previously discussed the program going on mostly around Blackfoot whereby IDWR is approving seasonal storage leases as a basis for approving development of wells. With the irrigation season fairly well along, perhaps the last of those has now been seen for this year, although I received one yesterday. In any event, I want to give you a list of the amounts of water that the Company is entitled to call from the rental pool pursuant to those interim approvals:

By the terms of my understanding with Mr. Dunn, the Company is entitled to call this water from the pool in a similar fashion to the leased water which it calls from the pool, and at the same time as that leased water is called. The reason for the last condition is the inability to measure extremely small amounts of water past Milner Dam.

RE: 27-7399

Dear Mr. Stecklein:

You have requested that an interim approval be given authorizing diversion of water for use on the lands described in Application for Permit No. 27-7399. In addition, you have obtained a lease for 240 acre feet of water for the 1985 season from the Upper Snake River Water Supply Bank. The enclosed interim permit has been issued to allow the well to be drilled and groundwater to be used if storage water is obtained and assigned to the Director of the Department to replace water lost to other right holders. The permit will be reprocessed under the provisions of 42-203C to determine if the trust waters made available under 42-203B and the Snake River Water Rights Agreement can be allocated to the proposed use. Reprocessing will occur after rules and regulations have been adopted to guide processing of applications under the criteria of 42-203C and will be in accordance with those adopted rules and regulations.

By issuing this interim approval, I am not committing to issuance of a permit for the trust water, and the investment you make pursuant to this interim approval will not influence the future decision as the permit is reprocessed. You assume all the risk that you will be successful in obtaining a permit for the reallocated water and thereby eliminate the need to provide replacement storage water. You are also assuming all risk relative to the availability of storage water from the rental pool in future years to allow use of water under this interim approval to continue.

Sincerely,

A. Kenneth Dunn

RE: Application No. 27-7399

WATER BANK LEASE AGREEMENT FOR 1985

EXCHANGE AGREEMENT

The Committee of Nine, hereafter lessor, being authorized pursuant to Idaho Code §42-1765 to operate the Upper Snake River Water Supply Bank does agree to lease to LaVerelle Stecklein of Blackfoot, hereafter lessee, 240 A.F. of water for the irrigation year starting April 1, 1985. This agreement is subject to the adopted Rules and Regulations of the Water Supply Bank and applicable conditions on the requisite water right permit granted by the Idaho Department of Water Resources.

Upon execution of this agreement and receipt of \$ 600.00, the Snake River Watermaster will assign to the Director of the Department of Water Resources 240 A.F. of storage to be released at his discretion in exchange for water pumped from groundwater at a well(s) located within:

SW 1/4 SE 1/4, Sec. 16, T. 2S, R. 36E;

Other: SE 1/4 SE 1/4, Sec. 16, T. 2S, R. 36E

For the irrigation of 120 acres of land within:

E 1/2 SW 1/4, SE 1/4, Sec. 16, T. 2S, R. 36E

The lessee understands and agrees that this lease in no way obligates the lessor to future leases or in any other manner not specified above.
