ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 27-7381, and said application is hereby CONDITIONALLY APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use is not required unless permit is reprocessed and approved in compliance with 42-203C, Idaho Code.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

WITH RESPECT TO INTERIM APPROVAL OF

APPLICATION FOR PERMIT NO. 27-7381

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 27-7381; and interim approval is granted subject to the following limitations and conditions:

- a. Subject to all prior water rights.
- b. A measuring device or an access port of a design approved by IDWR shall be installed prior to diverting water under the interim approval.
- c. The water user acknowledges that the interim approval does not convey a continuing right to divert water and does not convey any right to divert water except as specifically provided in the interim approval.
- d. The water user assumes all risk that he or she will be successful in obtaining a permit for water which may be reallocated under the Water Appropriation Rules and Regulations. The water user accepts all risk that storage water will be available and obtainable from the rental pool in future years to allow the interim approval procedure to continue, if storage water is required.
- e. Violation of interim approval conditions, provisions of the Idaho Code, or the Water Allocation Rules and Regulations is cause for cancellation of the interim approval and denial of future requests.
- f. By accepting and commencing diversion of water under this interim approval, the water user acknowledges and agrees that the Director of IDWR is authorized to disconnect the power supply from the pump motor used to divert water under the interim approval or to take other reasonable steps to insure that water is not diverted during any period the interim approval is suspended or revoked.
- g. The Director may impose additional conditions not a part of the original interim approval conditions as determined by the Director.
- h. The filing on which the interim approval is given may be reprocessed under the provisions of Section 42-203C, Idaho Code, at the request of the water user or as determined by the Director in compliance with pertinent adopted rules and regulations and statutes.
- i. Investments made by the water user to divert and use water under the interim approval will not be considered by IDWR when reprocessing the filing under the provisions of 42-203C, Idaho Code.

	)	

WHEREAS, on September 29, 1983 the Blackfoot Idaho East Stake LDS Church applied for 0.3 cfs to be used for irrigation of 15 acres located in the NE/4 SW1/4, Section 10, Ttownship 3 South, Range 35 East; and,

WHEREAS, on May 21, 1985 the Department of Water Resources approved said application with the condition that the volume of stored water required under the permit is 190 acre feet; and,

WHEREAS, the permit holder only intended to irrigate 15 acres; and,

WHEREAS, 15 acres only requires 30 acre feet (15 acres X 2.0 acre feet per acre = 30 acre feet per year);

IT IS THEREFORE HEREBY ORDERED that condition of approval f. is modified to read as follows:

The volume of stored water required to be rented from the Upper Snake River Water Supply Bank shall be equal to the volume of other water consumptively used, as determined by the Director. For the 1985 irrigation season and each year following that this permit is to be used or until

CONDITIONS OF APPROVAL

The following conditions are hereby made a part of the action of the Director of the Idaho Department of Water Resources (IDWR) on Application for Permit No. 27-7381.

- d. Issuance of this permit is on an interim basis until processing can be accomplished under Section 42-203, as amended, Idaho Code, and is contingent upon the permit holder assigning storage water to replace water taken from other water rights as determined by the Director of IDWR.
- e. Each irrigation season before water is diverted under this permit, evidence shall be provided to the Department that storage water has been rented through the Upper Snake River Water Supply Bank and assigned to the Director of IDWR for release to replace water taken from other water rights.
- f. The volume of stored water required to be rented from the Upper Snake River Water Supply Bank shall be equal to the volume of water consumptively used, as determined by the Director. For the 1985 irrigation season and each following year that this permit is to be used or until modified by Order of the Director of IDWR, the volume of stored water required is 190 acre-feet (95 acres x 2.0 acre-feet per acre = 190 acre-feet per year).
- g. Water shall not be diverted at any time that storage water is not available and on assignment to the Director of IDWR for purposes of replacing reductions of flow to other water right holders.
- h. The Director of IDWR retains jurisdiction of this permit to enforce the provisions of this permit, to revise the volume of stored water required, to cancel this permit for failure to comply with the conditions of approval, and to require procedural and substantive compliance with any subsequently adopted rules and regulations concerning exchange or augmentation of water supplies.
- i. By accepting and commencing diversion of water under this permit, the permit holder acknowledges and agrees that: (1) the Director of IDWR may suspend the right to divert water during any period that evidence of the required storage water supply needed for release is not on file with IDWR, and (2) the Director of IDWR is authorized to obtain a court order to disconnect the power supply from the pump motor used to divert water under this permit or by other reasonable means insure that water is not diverted at any and all times, that the right to divert water under this permit is suspended.
- j. This permit will be reprocessed under the provisions of Section 42-203D, Idaho Code, at the request of the permit holder or as determined necessary by the Director for compliance with Section 42-203D, Idaho Code, and Section 7D of the Swan Falls Agreement.
- k. A measuring device or an access port of a design approved by IDWR shall be installed prior to diverting water under this permit to allow the rate of diversion to be determined.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 727-07381

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Re: Interim Approval

Dear Mr. Transtrum:

NOTICE OF PENDING INTERIM APPROVAL CANCELLATION

Department records show that you were previously issued an interim approval for Application No. 27-7381, and that you were notified on February 13, 1987, that your interim approval must be renewed for the 1987 irrigation season. To initiate the renewal process, you were required to notify the Department of your intent to divert water during calendar year 1987. The Department has not received notification.

Please be advised that you must request renewal by May 1, 1987, or your interim approval will be cancelled. Diversion of water without interim approval is illegal under the laws of the State of Idaho.

For more information on interim approval, you should contact the Department's eastern regional office at 150 Shoup Avenue, Suite 15, Idaho Falls, ID 83401.

RE: Interim Approval

Dear Mr. Transtrum:

Department records show that you were issued an interim approval for Application No. 27-7381. As you know, interim approvals were a temporary measure to allow users the opportunity to divert and use water until the Department could consider processing the application under the provisions of the Swan Falls Agreement.

During past irrigation seasons, you have been required to lease storage water from the Upper Snake River Water Supply Bank. Your point of diversion has now been determined to be outside of the portion of the Snake River Groundwater Aquifer which supplies surface water below Milner Dam. The water you are diverting is not currently classified as trust water.

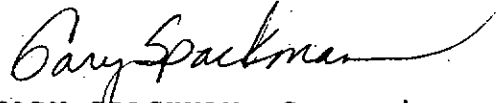

As a result of your diversion location falling outside of the present trust water boundaries, you will not be required as a condition of interim approval to lease storage water during the 1987 irrigation season. Nevertheless, if you desire to divert water during the calendar year 1987, you must inform the Department of Water Resources, in writing, of your intent to divert. Upon proper notification, the Department will issue you another interim approval without a requirement that you lease storage water in 1987.

Regional office personnel of the Department will field inspect the place of use for all continuing interim approvals and for all cancelled interim approvals, since the Idaho statutes now dictate penalties for the unauthorized diversion and use of water. Your present interim approval will expire in April, 1987.

MAY 07 1987

For more information on interim approval, you should contact the Department's Eastern Regional office at 150 Shoup Avenue, Suite 15, Idaho Falls, ID 83401, telephone, 525-7161.

Dear Mr. Transtrum:

During 1985 you received interim approval for application No. 27-7381. This approval was for one year and was conditioned upon your leasing replacement storage from the Water Bank. If you are planning on diverting water during 1986, it appears it will be necessary for you to again lease replacement storage. In April, the Idaho Power Company filed suit to prevent implementation of the Department's rules and regulations, which would have allowed the Department to resume the processing of water right applications. This suit virtually guarantees that the rental of replacement water will be necessary again this year.

If you have any questions, please feel free to contact this office.

Re: Interim Approvals for Seasonal Exchanges

Dear Ken:

This will acknowledge Idaho Power Company's entitlement to call certain waters provided through storage leases as the basis for the Idaho Department of Water Resources's (IDWR) approval of the development of certain wells. The following is a list of the amounts of water that the Idaho Power Company is presently aware of that it can call from the rental pool pursuant to those interim IDWR approvals:

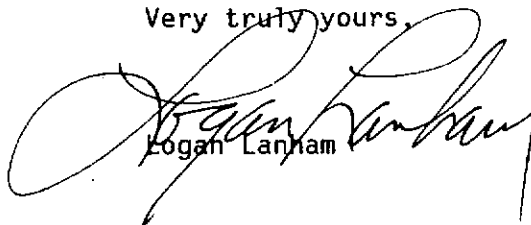

<u>Name</u>	<u>IDWR No</u>	<u>Acre-feet of Water</u>
Dennis L Marlow	27-7402	120
LaVerelle Stecklein	27-7399	240
Dwight Horsch	35-8082	120

Alan Weaver	31-7431	264
Alan Weaver	31-7432	264
Alan Weaver	31-7433	264
Total		2,386

It is our understanding that Idaho Power Company is entitled to call this water from the pool in a similar fashion to the leased water which it calls from the pool, and at the same time as that leased water is called. This understanding is the same as set out in Mr Tom Nelson's letter to me of June 27, 1985, which you are shown as receiving a copy of.

Re: Interim Approvals for
Seasonal Exchanges

Dear Logan:

You and I have previously discussed the program going on mostly around Blackfoot whereby IDWR is approving seasonal storage leases as a basis for approving development of wells. With the irrigation season fairly well along, perhaps the last of those has now been seen for this year, although I received one yesterday. In any event, I want to give you a list of the amounts of water that the Company is entitled to call from the rental pool pursuant to those interim approvals:

Dennis L. Marlow	No. 27-7402	120 acre feet	
LaVerelle Stecklein	No. 27-7399	240 acre feet	
Dwight Horsch	No. 35-8082	120 acre feet	
LDS Church	No. 27-7381	190 acre feet	← 30AF
Samuel J. Huffman	No. 27-7405	190 acre feet	← Should be 12.
Quality Farms, Inc.	No. 31-7415	190 acre feet	
" " "	No. 31-7416	280 acre feet	
N. D. Collaer, Trustee	No. 27-7361	56 acre feet	

By the terms of my understanding with Mr. Dunn, the Company is entitled to call this water from the pool in a similar fashion to the leased water which it calls from the pool, and at the same time as that leased water is called. The reason for the last condition is the inability to measure extremely small amounts of water past Milner Dam.

Blackfoot, ID 83221

Gentlemen:

Enclosed is an approved interim permit to allow use of groundwater provided that you comply with the conditions of approval listed on the permit.

This permit will be reprocessed under provisions of 42-203C, Idaho Code, to determine if the trust waters made available under 42-203B and the Snake River Water Rights Agreement can be allocated to the proposed use. Re-processing will occur after rules and regulations have been adopted to guide processing of applications under the criteria of 42-203C, and will be in accordance with those adopted rules and regulations.

By issuing the interim approval, the Department is not committing to issuance of a permit for the trust water, and the investment you make pursuant to this interim approval will not influence the future decision as the permit is reprocessed. You assume all the risk that you will be successful in obtaining a permit for the reallocated water and thereby eliminate the need to provide replacement storage water. You are also assuming all risk relative to the availability of storage water from the rental pool in future years to allow use of water under this interim approval to continue.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor
