Re: Taylor Property - Water Permit No. 27-7318

Dear Jim:

Pursuant to our telephone conversation this date regarding the water right to the Taylor property under Permit No. 27-7318, I offer the following information as a clarification of the right of the five acres to receive water from this source and to further clarify the agreement between our predecessor, Mr. Taylor, and the people who own this five acres parcel of land.

In 1982 Mr. Taylor applied for a permit to appropriate the public waters of the State of Idaho under Permit No. 27-7318 and received approval from the Idaho Department of Water Resources. Mr. Taylor drilled a well in the NW1/4NW1/4 of Section 27, Township 2 South, Range 36, EBM. The water from this source was to be used to irrigate the N1/2NW1/4 of Section 27, the S1/2 NE1/4 of Section 28, and the NE1/4NE1/4 of Section 28, same Township and Range. You will note that the following described property is the subject 5 acre parcel, and is also part of the NE1/4NE1/4 Sec 28 covered by Permit No. 27-7318.

A portion of the NE1/4NE1/4 of Section 28, Township 2 South, Range 36 EBM, Bingham County, Idaho, described as:
Beginning at the NE corner of said Section 28, thence South along the East line of said Section 28, 400 feet; thence West 600 feet; thence North 400 feet to the North line of said Section 28; thence East 600 feet to the point of beginning.

In order to remove the ditches Mr. Taylor entered into the agreement dated 4-12-1982, with the owner of the five acre parcel, which at that time was Clyde M. White. Removing the ditches eliminated the means to furnish water evidenced by the stock certificate owned by Mr. White referenced in the agreement. A copy of this Agreement has already been sent to you and I have also enclosed a copy of the agreement with this letter.

The property was sprinkler irrigated from the well with hand lines which ran north and south off the portable main line which ran east and west. In order for Mr. Taylor to irrigate the subject five acres, it was necessary to cut the fence so the pipe could pass through the fence on to this property.

June 26, 1987

Subject property was irrigated by Mr. Taylor for the 1982, 1983 and 1984 season. The Federal Land Bank acquired the property through foreclosure action on the 3rd of December, 1985. We were not at that time aware of the agreement between the parties involved. However, in the Spring of 1985 Mr. White came into the office and requested that we furnish him with water. Not being cognizant of any agreement between them, we told him that we did not have to furnish him water, whereupon he presented the agreement that Mr. Taylor had agreed to furnish him water. Mr. Taylor had in fact removed all the ditches on the property and was to furnish water to the subject property which Mr. White owned.

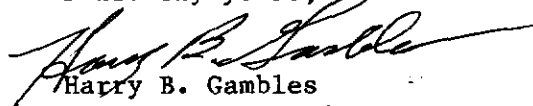

The Land Bank, as owners of the property and the successor to Taylor under said agreement dated 4-12-1982, attempted to furnish water to the subject 5 acres. Not having a tenant on the property and not wishing to pay the power costs of operating a 100 H.P. Electric Motor to irrigate 5 acres, chose to provide a ditch to furnish canal water. This was unsuccessful as the sand blew the ditch full. The subject 5 acres changed ownership a couple of times in 1986. In 1987 Richard Knox became the owner who made demand on the Land Bank for water to irrigate the subject 5 acres. In the meantime the Land Bank was successful in selling the Taylor acquired property to Lance and Mark Gardner.

I believe the facts are clear and are supported by affidavits that the water rights represented by Permit No. 27-7318 was used and put to beneficial use on this five acres along with the balance of property to be irrigated under Permit 27-7318 by Mr. Taylor and should be licensed and included as the land to be irrigated from this source when the license is issued. After the license is issued, we of course will take the necessary steps to transfer that portion of this right to the new owner of the subject five acres, Mr. Richard Knox.

I am also attaching three Affidavits, one from myself, and one each from Arnold Wilding and Mary Wilding who are familiar with the use of the water on the subject five acres now owned by Richard Knox.

If you have any questions regarding this matter, please do not hesitate to call me.

Harry B. Gambles

I, HARRY B. GAMBLES, being first duly sworn on oath depose and say that I have been acquainted with the five (5) acres of ground owned by Richard Knox and described as follows:

Township 2 South, Range 36 East of the Boise Meridian
Section 28: Beginning at the NE corner of said Section 28, thence south along the East line of said Section 400 feet; thence East 600 feet; thence North 400 feet; thence East 600 feet to the point of beginning.

I have been personally acquainted with this property during the period from 1982 to the present time and can say that I witnessed the property being sprinkler irrigated from the deep well located in the NW1/4NW1/4 Section 27 Township 2 South, Range 36 EBM as well as the other property owned by Mr. Taylor at the time and now presently owned by the Federal Land Bank of Spokane.

Further, that it was my observation that Mr. Taylor had cut the fence in order to place the hand lines through the fence to sprinkle irrigate the subject 5 acre parcel.

I further observed the water being sprinkler irrigated by the hand lines from the well aforementioned.

I also know that all ditches were filled in, plowed, and cultivated by Mr. Taylor, removing any evidence of any surface irrigation on the property. The only source available to irrigate this property was the well and through Mr. Taylor's system which he did in fact sprinkle irrigate it by hand lines off the main line which serviced this property as well as the rest of Mr. Taylor's property. The subject 5 acres was sprinkler irrigated from the subterranean source (well) for the 1982, 1983, and 1984 season.

Dear Jim:

Re: Permit No. 27-7318

The draft copy of the above referenced proposed license has been reviewed and it is found that five (5) acres adjacent to the farmstead have not been included.

Attached are aerial photographs and an Agreement dated April 12, 1982, submitted as evidence. Hindsight shows it to be an easy oversight to leave out the five (5) acres. The five (5) acre piece is no longer owned by the permit holder and is irrigated by portable handline which may not have been laid out on that tract at the date of inspection. The aerial photos are sufficiently clear to show the five (5) acres as irrigated pasture.

We thank you for your consideration in this matter, Jim. As always, time is important as we have a buyer for the property if we can resolve the water rights.

Sincerely yours,

Charles W. Bryan, Jr.

Dear Permit Holders:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the fourth page.

Be sure to note the special condition requiring you to install a measuring device, or an access port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the access port.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.
