PROOF DUE NOTICE
RE: PERMIT NO. 27-07155

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1990. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

Re: Applications #27-7155-56
(Bingham County)

Gentlemen:

We have been apprised of your applications for permits to appropriate the public waters of the State of Idaho to provide domestic water to five families (individual connections). It is surmised that the applications submitted are to be used as alternate water sources.

By regulation your proposed water system is defined as a "private" water system, not subject to the jurisdiction of our Department. Omission from our jurisdiction, however, does not preclude compliance with any local requirements; further, you should be aware that expansion of the water service to ten or more individual connections changes the classification of the system to "public" at which time you would be expected to meet the requirements of the Idaho Regulations for Public Drinking Water Systems. The regulations set forth the minimum requirements for construction, water quality, monitoring, and maintenance and operation.

On the premise that at some future time you may wish to provide additional service, we encourage you to conform at this time with the Idaho Regulations for Public Drinking Water Systems relative to construction of the facility. A copy of these regulations is enclosed for your information.

By copy of this letter, we are advising the S.E. District Health Department of your applications for the proposed water systems.

If we may be of any assistance in this matter, please do not hesitate to contact our office.

Sincerely,

Henry L. Moran, P.E.
