10. Remarks I would like to change my irrigation from flood to sprinkler, because my soil is sandy and it is impossible for me to get the flood water over the land often enough, as I have only one head ditch and I am the last farm on the ditch. We also have the last headgate on the canal. There is about 10 days out of every irrigation season, that the irrigation Co. can't maintain a stream of water here for us and this period comes just when we need the water the most. It would be impossible to pump water from the ditch as we would have a mile of sandy ditch, to deliver the water to the pumps, which would bring so much sand that it would cut the pump & sprinkler out and then with the period that we can't get any water it would be impossible to maintain a constant flow of water, so because of these reasons I would like to drill a well & turn my Snake River Irrigation water back to the irrigation Co.

Dear Mr. Nickerson:

One of the conditions of approval of your water Permit No. 27-7011 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before May 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
