The Department mailed the original of the enclosed letter in an attempt to inform him that he was required to pay an examination fee on the above referenced permit. The letter was returned to the Department as undeliverable mail. Research of the records of the County Assessor reveals that you own property which may have been listed as the place of use in the permit.

Please read the enclosed letter. It may be necessary that you file an examination fee with the Department to prevent loss of a developed water right. Should we not hear from an interested party within sixty (60) days of the date of this letter, action will be initiated to remove the permit from the Department files.

CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Dear Mr. Jones:

O All permits issued by this office dating from June 1, 1967, have a requirement that an adequate measuring device be permanently installed, and that it be of the type approved by the department.

P There are also other provisions of Idaho Law, where measuring devices may be required at a later date on existing installations. Now that you have a measuring device installed, we will accept the evidence of beneficial use submitted in connection with your permit, and schedule a field examination, which may be completed during the 1970, or 1971 irrigation season. At the time the examiner is in the area, he will contact you, to make arrangements for the examination. If you have any questions in the matter, please contact us.

Y Very truly yours,

Mr. Stephen Albred:

Dear Sir -

We received your certified letter this morning concerning some code that pertains to a measuring device for our pump. We did not understand that we were to report to you when it was completed.

On April 7, 1970 - one 4-inch Badger meter was delivered to us from Intermountain Water Service, Inc. Boise, Idaho. It was installed on May 9, 1970 by Ray Taylor, Plumber and Jack Cushman, well driller. There never was one drop of water pumped until everything was installed and working good, including the meter. We understood a man was supposed to come and inspect it, but no one ever showed

up. To the best of our knowledge we installed and fixed everything the best it could be fixed. We are sprinkling only 25 acres.

We have another question to ask. Why is it so important for us to have to have this meter when there are dozens of others around us using as high as six pumps and haven't even heard of such a thing? We feel like if we have to have one, why doesn't everyone else? when all we have is 25 acres.

We hope this is satisfactory as we have nothing to fill out to return. All we have is releases from the sellers.

Re: Permit No. 27-7005

Mr. Harry Jones
375 Airport Road
Blackfoot, Idaho 83221

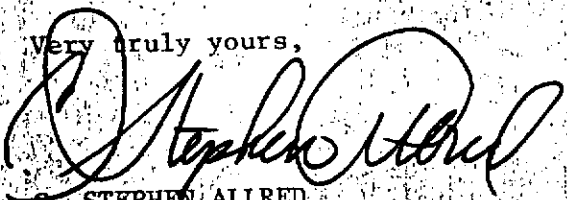

Dear Mr. Jones:

Our letter to you dated December 24, 1969, indicated that the proof of completion of works and application of water to beneficial use which was submitted in connection with your permit No. 27-7005 was unacceptable, due to the fact that you had failed to install a permanent water measurement device. Such device was required to be installed as a condition of the issuance of the permit pursuant to Sections 42-203, 42-701 and 42-237a of the Idaho Code.

You are therefore hereby ordered to show cause on or before August 29, 1970, why permit 27-7005 should not be cancelled and held null and void for failure to comply with the terms and conditions of its issuance. This order is sent under the provisions of Section 42-311, Idaho Code.

You should be advised that in the event the permit is cancelled, due to your failure to show reasonable cause on or before the above date, continued diversion of water would be without permit and subject to legal action.

Very truly yours,

C. STEPHEN ALLRED
Deputy Director

Dear Mr. Jones:

We are enclosing a copy of the assignment for the above referenced permit; the assignment has been recorded and the original placed in our files. We are also enclosing a copy of the permit and of the proof of beneficial use affidavit for your use.

In reviewing the proof of beneficial use affidavit, it appears that a measuring device has not been installed as required by the conditions of approval of permit 27-7005 and by Section 42-701 of the Idaho Code.

We cannot accept the proof and issue a license unless you have installed a measuring device of a type approved by the Department. We will hold the affidavit until you can supply us with information as to the type of measuring device installed. You should be aware that failure to install the device and supply information as to the type of device installed, may result in the loss of your permit. We will withhold action regarding your permit until June 15, 1970.

We are enclosing a list of the type of devices approved by the Department of Reclamation. If you have any questions, please contact us.

O
Dear Mr. Wray:

We are in receipt of your letter of October 31, 1969.

P
Please be advised that in order for the Department to issue a license under this permit, a measuring device will have to be installed at the time the field examination is made. The examination for this permit will probably be conducted during the 1970 irrigation season.

If you wish the Department to correspond with the new owner, you must assign your right, title, and interest to permit number 27-7005 to the new owner. You and your spouse will be required to execute the assignment form we are enclosing.

C Mr. Bill Wray
Box 505
Blackfoot, Idaho 83221

Dear Mr. Wray:

O This office is in receipt of your affidavit setting forth proof of application of water to beneficial use under Permit No. 27-7005. You have stated that you have not installed a measuring device as required under your permit. As you may be aware, before we can issue a license, we are required by law to conduct an inspection to determine the amount of beneficial use that has been made under the permit. To accomplish this, we would require the use of the measuring device set forth under the terms of your permit.

P In the event that we were to make the inspection and the measuring device was not installed, our probable course would be to deny the proof of application of water to beneficial use and the permit would lapse.

Y I would appreciate hearing from you as soon as possible as to your intentions regarding the installation of a measuring device. Please indicate what type and when you intend to install said device.

If you have any questions, please contact this office.

Very truly yours,

Donald W. McEldowney
