SUBJECT Permit No. 27-7065

DATE January 10, 1985

Norm Young responded to my memorandum regarding this permit dated January 9, 1985, with the statement that because proof of beneficial use has been submitted with respect to the permit, no change in place of use is allowable. He went on to say that even if proof had not been submitted, the permit would likely not be eligible for change in place of use due to the consumptive component considerations.

Norm recommended that we conduct a field examination of this system to determine if there are any acres irrigated in the system in addition to those described in Water Right No. 27-2126 as transferred by T3047. In this way we can allow maximum credit for irrigation under the current system. Until the examination is completed, we will not take further action on the Application for Amendment since it is possible that based on the examination there are acres within the existing irrigation system that are on the fringes of the identified tracts, so that some amendment of the permit would be required.

At this point we probably should advise Mr. Stecklein of the Department's decision regarding his amendment as proposed. Either we could write this letter or you can, whichever you prefer. Please advise if you prefer the former, otherwise we will await the results of the field exam.

MEMORANDUM

TO: Norm Young

THRU: Glen Saxton and Bob Fleenor

FROM: Dave Tuthill *DT*

DATE: January 9, 1985

RE: Permit No. 27-7065

Analysis of the pending Application for Amendment of Permit No. 27-7065 has resulted in a basic difference of opinion regarding the nature of a permit water right. The purpose of this memorandum is to describe two different ways of analyzing the permit and to request guidance regarding which alternative is correct.

To properly analyze this situation some background information is necessary. On September 15, 1976, Mr. LaVerelle Stecklein filed an Application for Permit. It appears that the application was filed with assistance from personnel in our Eastern Regional office because the typing was done in the blue ink characteristic of that used by the regional offices at the time. Under item 8(c) the applicant indicated that other water rights used for the same purposes were water rights from Blackfoot River. No indication was made under that item of any water rights from ground water. The staff analysis conducted by Eastern Regional personnel resulted in discovery of an existing Water Right License No. 27-2126, for 4.74 cfs. In spite of this discovery, the application was recommended by the regional office for approval and was subsequently approved by the state office on October 25, 1976.

Proof of beneficial use was due on October 1, 1981. Proof was not filed by that date and the permit lapsed; however, proof was received on November 25, 1981 and the permit was reinstated. No field examination has been conducted with respect to the permit.

On May 24, 1984, LaVerelle Stecklein filed two documents. One was Application for Transfer No. T3047 for License No. 27-2126. The purposes of the transfer were to add a point of diversion and to clarify the land list. The original license, issued to Mr. Theodore Stecklein on February 23, 1968, had identified 237 acres irrigated. The transfer showed the same number of irrigated acres, with a few small changes intended to adjust the list to fit with the currently irrigated fields.

UNRECORDED

MAR 30 1989

TO: Norm Young
DATE: January 9, 1985
PAGE: 2

The second document filed by Mr. Stecklein on May 24, 1984, was the Application for Amendment of Permit No. 27-7065. This amendment requests changes in both point of diversion and place of use, with the intent of moving the permit to a totally separate irrigation project located some six miles east of the original point of diversion and place of use.

Item C(4) of the transfer application indicates that "Permit No. 27-7065 will be amended if this transfer is approved." Therefore, the application for transfer was the first document to be reviewed by the state office and was approved on July 30, 1984. Subsequent to the transfer approval, the Application for Amendment was reviewed and in the course of this review, we noticed that the original application had been filed on lands that were fully covered by a licensed ground water right to the extent of a full miner's inch per acre. One possible reason for this duplicate filing is that the point of diversion for the Application for Permit was shown to be the SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 23. This is the same point of diversion that was added to License No. 27-2126 by Transfer No. T3047.

There is no diversity of opinion regarding the factual situation described above. Instead, the diversity of opinion relates to the interpretation of the validity of Permit No. 27-7065 at this time. In a memo dated August 23, 1984, Jim Johnson raised some questions about the validity of the amendment. In response to his memo, we discussed the matter and our resulting solution was described in a letter dated October 4, 1984. In this solution, Jim described that because the Application for Amendment proposes to increase the total number of lands irrigated within Basin 27, it could not be approved as shown unless the applicant could demonstrate that existing water right holders would not be injured as a result of the approval.

This solution is based on the interpretation that Permit No. 27-7065 was filed on lands that were already fully irrigated, so when the permit was approved, it did not, in fact, allow any additional water development. We are saying that each permit, when approved, has an implied consumptive use component based on the use shown in the permit. If the lands described to be irrigated by the permit have no previous water right, then the consumptive use component is that amount required for the irrigation of alfalfa at that location. If the lands already have a partial water right from that source, then the permit provides the consumptive use for the remaining portion of the right. If, as in this case, lands already have a full water right, then the permit provides no consumptive use component.

The alternative solution is to consider the permit to have a consumptive use component, even though the lands described in the permit already have a water right from the same source. If we consider any permit for 4.00 cfs for the irrigation of 210 acres to have a consumptive component for irrigation, regardless of the existing water rights on the 210 acres, then we could consider Permit No. 27-7065 to be eligible for change in place of use to another location.

MAR 10 1985

TO: Norm Young
DATE: January 9, 1985
PAGE: 3

In response to Jim's letter dated October 4, 1984, Mr. Stecklein visited the Eastern Regional office, which in turn contacted this office. We have subsequently advised Mr. Stecklein that the application is currently being held pending further review, with the anticipation of discussing the matter at the Regional Supervisors' Meeting. However, in a discussion with Bob Fleenor, we decided that this matter would be best resolved at the administrator level. On one hand, in a pure water right sense, approval of the amendment as shown would result in an enlargement of the total number of acres irrigated within the drainage basin, and thus could be considered to be an expansion. On the other hand, with the Swan Falls considerations, we are not sure about Department policy on this matter.

This matter is presented for consideration based on this brief analysis. Please advise regarding the Department's position.

Dear Mr. Anderson:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. G-30090 in the name of Theodore Stecklein. Final Proof is to be made before you, as Notary on the 18 day of August, 1966, at o'clock at Blackfoot, Idaho.

As of this date, we have mailed the Notice to the Blackfoot News, with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof and then mail the Affidavit of Publication and statement of costs to you.

It is important that the enclosed depositions be executed by the permit holder and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the time, on the date and before you, as Notary, as stated in the publication notice. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, that your Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the AFFIDAVIT OF PUBLICATION.

Very truly yours,

Re: Permit No. G - 30050

June 1, 1966

Theodore Stecklein
Route #3
Blackfoot, Idaho

Dear Mr. Stecklein:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 30050 are due not later than Aug. 11, 1966

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

STATE RECLAMATION ENGINEER
