Re Permit No. 10518.

Mr. Peter C. Petterson,

Dear Sir:

In going over your papers filed in the matter of proof of beneficial use of water, under the above permit, I find a discrepancy in the location of the point of diversion. The permit shows this point in the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Sec. 4, T. 9 S., R. 44 E., while the report of Mr. Wilson shows the point of diversion in the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of said section. To correct this error, you should file an affidavit of change of point of diversion upon the enclosed form accompanied by maps in duplicate. Upon receipt of this affidavit and maps the license will be issued.

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Peter C. Peterson,

Boise Springs, Idaho

Boise, Idaho,

Dear Sir:

Under the terms of your Permit No. **10518**, you are required to complete your diversion works on or before ~~August 24 1916~~. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

J. . SMITH State Engineer.
