Affidavit of Publication

NOTICE FOR PUBLICATION

Notice of proof application of water to beneficial use.

Notice is hereby given that at 10 a. m. on the 14th day of September, 1922, at Pocatello, County of Bannock, State of Idaho, before Theo. Turner, U. S. Commissioner, proof will be submitted of the application to beneficial use of 280 cubic feet per second of the waters of Blackfoot River in accordance with the terms and conditions of Permit No. 3117 heretofore issued by the State Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are: United States Commissioner of Indian Affairs, Fort Hall, Idaho.

The use to which said water has been applied is irrigation and domestic.

The amount applied to beneficial use is 280 cubic feet per second.

The place where said water is used (if for irrigation, give full and accurate description of the lands irrigated) See attached list.

The name of the canal or ditch or other works by which said water is conducted to such place of use is Fort Hall Upper Canal, Fort Hall Lower Canal, and Little Indian Ditch.

The right to take water from such works is based upon Permit No. 3117.

The source of supply from which such water is diverted is Blackfoot River.

The date of the priority which said user is prepared to establish is September 3, 1907.

W. G. SWENDSEN,
Commissioner of Reclamation.

List of land on which Proof of Application of Water to Beneficial use under Permit No. 3117 is to be made:

All that part of sections 23, 24, 27 and 28 lying south of the Blackfoot river, in T. 3 S. R. 34 E.

NE $\frac{1}{4}$, Sec. 33, T. 3 S. R. 34 E.

Entire Sections, 25, 26, 34, 36, 35, T. 3 S. R. 34 E.

All that part of Sections, 8, 9, 10, 18 lying south of the Blackfoot river in T. 3 S. R. 35 E.

Entire Sections 16, 17, 19, 20, 30, 31, 29, T. 3 S. R. 35 E.

W $\frac{1}{2}$, N $\frac{1}{2}$, of NE $\frac{1}{4}$, SW $\frac{1}{4}$ of NE $\frac{1}{4}$ and W $\frac{1}{2}$ of SE $\frac{1}{4}$, Sec. 15, T. 3 S. R. 35 E.

NE $\frac{1}{4}$, NW $\frac{1}{4}$, SW $\frac{1}{4}$ and W $\frac{1}{2}$ of SE $\frac{1}{4}$, Sec. 21, T. 3 S. R. 5 E.

NE $\frac{1}{4}$, W $\frac{1}{2}$ of SE $\frac{1}{4}$, and W $\frac{1}{2}$, Sec. 32, T. 3 S. R. 35 E.

Entire Sections 1, 2, 3, 9, 10, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, T. 4 S. R. 34 E.

Also: S $\frac{1}{2}$ Sec. 4, T. 4 S. R. 34 E.

NOTICE FOR PUBLICATION

Notice is hereby given that at 2 p m., on the 16th day of September, 1912, at Pocatello, county of Bannock, state of Idaho, before Theo. Turner, N. P., proof will be submitted of the completion of works for the diversion of 280 cubic feet per second of the waters of Blackfoot river, in accordance with the terms and conditions of a certain permit heretofore issued by the State Engineer of the State of Idaho.

1. The name of the person or corporation holding said permit is United States Commissioner of Indian Affairs.

2. The postoffice address of such person or the place of business of such corporation is Fort Hall, county of Bingham, State of Idaho.

3. The number of such permit is 3117, and the date set for the completion of such work is September 14, 1912.

4. Said water to be used for irrigation and domestic purposes.

5. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of intended use, in accordance with the plans accompanying the application for such permit is 280 cubic feet per second.

6. The amount of lands for which said water is available is 75,000 acres. particularly described as follows:

T. 3 S. R. 34 E. Sections 23, 24, 27, 28, Lying south of the Blackfoot river.

PROOF OF PUBLICATION

STATE OF IDAHO,
COUNTY OF BANNOCK.

SS.

NOTICE OF PUBLICATION.

Notice is hereby given that at 2 p. m. on the 16th day of September, 1912, at Pocatello, County of Bannock, State of Idaho, before Theo. Turner, N. P., proof will be submitted of the completion of works for the diversion of 280 cubic feet per second of the waters of Blackfoot river, in accordance with the terms and conditions of a certain permit heretofore issued by the State Engineer of the State of Idaho.

1. The name of the person or corporation holding said permit is United States Commissioner of Indian Affairs.

2. The postoffice address of such person or the place of business of such corporation is Fort Hall, County of Bingham, State of Idaho.

3. The number of such permit is 3117 and the date set for the completion of such work is Sept. 14, 1912.

4. Said water to be used for irrigation and domestic purposes.

5. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of intended use, in accordance with the plans accompanying the application for such permit, is 280 cubic feet per second.

6. The amount of lands for which said water is available is 75,000 acres, particularly described as follows:

T. 3 S. R. 34 E., Sections 23, 24, 27, 28, lying south of the Blackfoot river:

33, NE $\frac{1}{4}$.

25, 26, 34, 35 and 36, all.

T. 3 S. R. 35 E., Sections 8, 9, 10, 17, and 18, lying south of the Blackfoot river:

16, 17, 19, 20.

29, 30, 31, all.

15, W $\frac{1}{2}$; N $\frac{1}{2}$ NE $\frac{1}{4}$; SW $\frac{1}{4}$ NE $\frac{1}{4}$ and W $\frac{1}{2}$ SE $\frac{1}{4}$.

21, NE $\frac{1}{4}$; NW $\frac{1}{4}$; SW $\frac{1}{4}$; W $\frac{1}{2}$ SE $\frac{1}{4}$.

28, NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

32, NE $\frac{1}{4}$; W $\frac{1}{2}$ SE $\frac{1}{4}$; W $\frac{1}{2}$.

T. 4 S. R. 34 E., Sections 1, 2, 3, 9, 10, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 25, 36, all.

4, S $\frac{1}{2}$.

5, SE $\frac{1}{4}$.

8, E $\frac{1}{2}$.

18, SE $\frac{1}{4}$.

T. 4 S. R. 33 E., Sections 25, 36, E $\frac{1}{2}$.

T. 4 S. R. 35 E., Sections 6, 7, 18, 19, 20, 29, 30, 31, 17, all.

5, W $\frac{1}{2}$.

8, W $\frac{1}{2}$; NW $\frac{1}{4}$ of SE $\frac{1}{4}$; S $\frac{1}{2}$ SE $\frac{1}{4}$.

16, SW $\frac{1}{4}$ NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

32, NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

T. 5 S. R. 34 E., Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33, 34, all.

12, W $\frac{1}{2}$; NE $\frac{1}{4}$; NW $\frac{1}{4}$ SE $\frac{1}{4}$.

14, N $\frac{1}{2}$; SW $\frac{1}{4}$; SW $\frac{1}{4}$ SE $\frac{1}{4}$.

23, W $\frac{1}{2}$.

26, W $\frac{1}{2}$.

35, W $\frac{1}{2}$ NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

6, N $\frac{1}{2}$; NW $\frac{1}{4}$ SW $\frac{1}{4}$.

5, W $\frac{1}{2}$ NW $\frac{1}{4}$.

T. 6 S. R. 34 E., Sections 3, 4, 5, 8, 9, 10, 15, 16, 26, all.

2, W $\frac{1}{2}$ NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

6, SE $\frac{1}{4}$ NW $\frac{1}{4}$; NE $\frac{1}{4}$; N $\frac{1}{2}$ NW $\frac{1}{4}$.

7, E $\frac{1}{2}$ NE $\frac{1}{4}$.

11, W $\frac{1}{2}$ NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

14, NW $\frac{1}{4}$ W $\frac{1}{2}$ SW $\frac{1}{4}$.

STATE OF IDAHO
PERMIT AND CERTIFICATE OF WATER RIGHT

Water License No. 3117 Priority September 3, 1907 Amount 123.6 second feet

THIS IS TO CERTIFY THAT THE U. S. COMMISSIONER OF INDIAN AFFAIRS of Rossfork, Idaho, made application for a permit to appropriate the public waters of the State of Idaho, dated September 3, 1907; that Permit No. 3117 was issued under said application; that Certificate of Completion of Works, with a carrying capacity of 280 second feet, was issued thereunder on July 10, 1913, showing that said works were completed on the 14th day of September, 1912; and that on the 14th day of September, 1922,

THE U. S. COMMISSIONER OF INDIAN AFFAIRS

of Fort Hall, State of Idaho, made proof to the satisfaction of the Commissioner of Reclamation of Idaho, of a right to the use of the waters of Blackfoot River, a tributary of Snake River, for the purpose of irrigation and domestic use, under Use Permit No. 3117 of the Department of Reclamation, and that the said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is hereby confirmed by the State Reclamation Engineer of Idaho, and entered of record in Volume 7 of Licenses, at Page 4267, on the 30th day of June, 1945.

The right hereby confirmed dates from September 3, 1907.

The Points of Diversion are located as follows:

Diversion No. 1- 1200 ft. North 22°10' E. from the NE corner Section 13 Twp. 3 South, Range 35 East, B.M. *SW 1/4 S. 1 R. 35 E. T. 3 S.*

Diversion No. 2- 1700 ft. South 69°40' E. from the NW corner Section 14, Twp. 3 South, Range 35 East, B.M. *N 1/4 S. 14*

Diversion No. 3- 4766 ft. North 13°00' East from the SW corner Section 7, Twp. 2 South, Range 38 East, B.M. *SW 1/4 S. 7*

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 123.6 cubic feet per second.

Description and location of Use: 33,508.62 acres of land within the Fort Hall Project.

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, as provided by the laws of Idaho.

WITNESS the seal and signature of the State Reclamation Engineer, affixed at Boise, Idaho, this 30th day of June, 1945.

(S E A L)

MARK R. KULP
State Reclamation Engineer

No. 4550. 27-2007

APPLICATION FOR PERMIT

To Appropriate the Public Waters of the State of Idaho

1. Name of applicant: A.F. Caldwell, for and on behalf of the U.S. Commissioner of Indian Affairs.

Postoffice address Rossfork, Idaho.

County: Bingham, State: Idaho.

II. The financial resources of the applicant are:

(a) Cash on hand:	)	Works to be constructed by the
(b) Treasury Stock:	)	United States under authority
(c) Bonds to be issued:	)	of Congressional enactment.
(d) Other resources:	)	

2. The quantity of water claimed is an amount equivalent to a continuous flow of 280 cubic feet per second. The surplus waters to the extent of 200,000 acre-feet, to be stored in Blackfoot Marsh, T. 5, S. 6, 7, 8., R. 40, 41, 42, E. of Boise Meridian.

3. Source of water supply: Blackfoot River.

County of Pannock,

4. Location of point of diversion: At a point distant 1200 feet, E. 22-10' E. to the N.E.cor. of Sec. 13, also at a point distant 1700 ft. S. 69-40' E. from the N.W.cor. Sec. 14 both in T. 5 S.-R. 35 E. of Boise Meridian.

5. To be used for:

I. Irrigation and domestic use:

(a) Amount of land to be irrigated: 80,000 acres.

(b) In the following legal subdivisions: (see list of lands).

6. Estimated cost of works: \$420,000.00

7. Description of works for diversion:

I. Kind of works: Dam, constructed on the Blackfoot River in Sec. 12 T. 5 S.- R. 40 E. of Boise Meridian.

II. Dimensions of works :

(a) Height of dam 35 feet, length of dam at top 275 feet, length of dam at bottom 140 feet. Material used in construction: Loose rock and earth dam.

(b) Capacity of reservoir: 200,000 acre-feet.

(c) Size of controlling gate: Width 8 feet, height 10 feet.

(d) Conduit Discharging directly into the Blackfoot River. and it crosses the following quarter sections: see map of route of Blackfoot River from dam to headgates, to Sec. 13 & 14 T. 5 S.- R. 35 E. of Boise Meridian. to land described in 5 I (b) above which is the point of intended use.

8. Time required for the completion of the construction of such work is five years.

9. Time required for the complete application of the water to the proposed use is four additional years.

BE IT KNOWN That the undersigned hereby makes application for a permit to appropriate the public waters of the State of Idaho as herein set forth.

A. W. Caldwell,

Applicant.

By....W. F. Haygood....Chief Clerk.

Remarks: The object of this application is to secure permission to impound the waters of the water shed of the Blackfoot River above Sec. 12, T. 5 S.-R. 40 E. of Boise Meridian, by the construction of a dam near the N.E.cor of said section 12, and taking the stored waters from thence, down the Blackfoot River to the points of diversion on Sections 13 & 14, T. 5 S.- T. 35 N. of Boise Meridian, to be used to irrigate the lands on the Fort Hall Indian Reservation and the ceded lands in the vicinity of Pocatello. (See accompanying plans).

It is intended to combine the waters covered by this application, with those covered by applications 3690 and 3691 in one general system for the purpose of irrigating the above mentioned lands.

APPROVAL OF STATE ENGINEER.

The number of this permit is 3117.

Date of first receipt of application 9:00 AM September 3, 1907.

Returned to application for correction September 3, 1907.

Corrected application received September 11, 1907.

Recorded in Book 9 Page 3117 Approved September 14, 1907.

This is to certify that I have examined the within application for a permit to appropriate the public waters of the State of Idaho and hereby grant the same, subject to the following limitations and conditions:

Good and sufficient bond to be filed in the sum of \$1000.00 or before November 15, 1907.

One-fifth of the work above specified to be completed on or before 14, 1910.

The whole of said work to be completed on or before September 14, 1912.

The time for proof of beneficial use of water appropriated in accordance herewith, to extend to September 14, 1916.

Witness my hand this 14 day of September 1907.

Jas. Stephenson, Jr.,

State Engineer.

Notice of proof of completion of works received fixing September 14, 1912, as date and Pocatello as place of proof.

Notice for publication mailed the Pocatello Tribune Aug. 6, 1912.

Deposition blanks mailed the notary public at Pocatello Aug. 6, 1912.

Depositions and affidavit of publication received September 26, 1912.

Report of examining engineer filed November 1, 1912.

Fee received July 19, 1913.

Certificate of completion of works issued July 19, 1913.

PERMIT NO. 3117.

CERTIFICATE OF COMPLETION OF WORKS.

To All Whom It May Concern:

This is to certify that the United States Commissioner of Indian Affairs, of Fort Hall, County of Bingham, and State of Idaho, the holder of Permit No. 3117, issued upon Application No. 4350, bearing date of priority of September 3, 1907, authorizing the diversion of 280 second feet of the waters of Blackfoot River, County of Bannock, State of Idaho, for irrigation and domestic purposes, has fully complied with the provisions of the laws of the State of Idaho relating to the proof of completion of the works of diversion set out and described in said Permit; that said works are adequate for diverting and conveying to the place of intended use 280 second feet of the waters of Blackfoot River; that the point of diversion of said waters is at a point distant 1200 feet N. 22° 10' E. to the NE Cor. of Sec. 13, also, at a point distant 1700 feet S. 69° 40' E. from the NW Cor. of Sec. 14, both in T. 3 S., R. 35 E.B.M., and that the lands proposed to be irrigated by the use of said water are described as follows, to-wit: T. 3 S., R. 34 E.B.M., All that part of Secs. 23, 24, 27, & 28 lying South of the Blackfoot River, the NE $\frac{1}{4}$ of Sec. 33, all Secs. 25, 26, 34, 35, & 36. T. 3 S., R. 35 E.B.M., All that part of Secs. 8, 9, 10, & 18, lying south of the Blackfoot River, All Secs. 16, 17, 19, 20, 29, 30, & 31, W $\frac{1}{2}$, N $\frac{1}{2}$ of NE $\frac{1}{4}$, SW $\frac{1}{4}$ of NE $\frac{1}{4}$ and W $\frac{1}{2}$ of SE $\frac{1}{4}$ Sec. 15, NE $\frac{1}{4}$, NW $\frac{1}{4}$, SW $\frac{1}{4}$ and W $\frac{1}{2}$ of SE $\frac{1}{4}$ Sec. 21, NW $\frac{1}{4}$ and W $\frac{1}{2}$ of SW $\frac{1}{4}$ Sec. 28, NE $\frac{1}{4}$, W $\frac{1}{2}$ of SE $\frac{1}{4}$ and W $\frac{1}{2}$ of Sec. 32. T. 4 S., R. 34 E. B. M., All Secs. 1, 2, 3, 9, 10, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, & 36, S $\frac{1}{2}$ Sec. 4, SE $\frac{1}{4}$ Sec. 5, E $\frac{1}{2}$ of Sec. 8, SE $\frac{1}{4}$, NE $\frac{1}{4}$, SW $\frac{1}{4}$ Sec. 18, T. 4 S., R. 35 E.B.M. All Secs. 25 & 36. T. 4 S., R. 35 E. B. M., All Secs. 6, 7, 18, 19, 20, 29, 30, 31, & 17, W $\frac{1}{2}$ of Sec. 5, W $\frac{1}{2}$, NW $\frac{1}{4}$ of SE $\frac{1}{4}$ and S $\frac{1}{2}$ of SE $\frac{1}{4}$ Sec. 8, SW $\frac{1}{4}$, of NW $\frac{1}{4}$, W $\frac{1}{2}$ of SW $\frac{1}{4}$ Sec. 16, NW $\frac{1}{4}$ & W $\frac{1}{2}$ of SW $\frac{1}{4}$ Sec. 32. T. 5 S., R. 34 E. B. M., All Secs. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33, 34, W $\frac{1}{2}$, NE $\frac{1}{4}$ & NW $\frac{1}{4}$ of SE $\frac{1}{4}$ Sec. 12, N $\frac{1}{2}$, SW $\frac{1}{4}$, NW $\frac{1}{4}$ of SE $\frac{1}{4}$ Sec. 14, W $\frac{1}{2}$ of Sec. 23, W $\frac{1}{2}$ of Sec. 26, W $\frac{1}{2}$ of NW $\frac{1}{4}$ & W $\frac{1}{2}$ of SW $\frac{1}{4}$ Sec. 35. Witness my hand this 19th day of July A.D. 1913.

F.P.King,

State Engineer of the State of Idaho.

On proper request of the holder of the above numbered permit I have this 28th day of January, 1915, extended the time for beneficial use of water thereunder to the 14th day of September, 1918.

Herbert Wing,

Acting State Engineer.

EXTENSION OF TIME

On proper request of H. W. Dietz, agent of the holder of Permit No. 3117, I have this 23rd day of November, 1917, extended the time for beneficial use of water thereunder to the 14th day of September, 1922.

J. H. Smith,
State Engineer.

AMENDMENT

Application is hereby made to amend the land list accompanying Permit No. 3117 by substituting for the following described lands:

All of Section 2 - - - - - 640 acres
All of Section 11- - - - - 640 acres
W $\frac{1}{2}$ of Section 14- - - - - 320 "
All of Section 23- - - - - 640 "
N $\frac{1}{2}$ of Section 26- - - - - 320 "
all in T. 5S, R. 33 E.B.M. 2560 -

the lands described below:

U. S. Commissioner of Indian Affairs
By R. H. Burdick, Engineer

APPROVAL OF COMMISSIONER OF RECLAMATION

I, W. G. Swendsen, Commissioner of Reclamation of the State of Idaho, hereby approve the above and foregoing application for amendment to Permit to appropriate the public waters of the State of Idaho, No. 3117. This approval constitutes a new permit and is issued as an amendment to the original permit, to which it refers and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

W. G. SWENDSEN
Commissioner of Reclamation
By George N. Carter
Assistant

STATE OF IDAHO,)
County of Bingham,) ss.

U. S. Commissioner of Indian Affairs, by R. H. Burdick, Engineer, being first duly sworn, upon his oath deposes and says:

That he is the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho, No. 3117.

That he intends to change the points of diversion, as described in said permit, to the following described points:

- No. 1, N. 22° 10' E. from the NE corner of Section 13, Twp. 3 S., R. 35 E., B. M.
- No. 2, S. 69° 40' E. from the NW corner of Section 14, Twp. 3 S., R. 35 E., B. M.
- No. 3, N. 13° 00' E. from the SW corner of Section 7, Twp. 2 S., R. 38 E., B. M.

That such change will be made for the following reasons, to-wit: that a certain area of land comprising twenty-seven hundred acres more or less situated in Township 2 South, Range 37 East Boise Meridian, can not be served by the two points of diversion as named in the original application, but can be served by the additional point of diversion requested.

That no one will be injured by such change and that deponent will make such change at his own risk.

And further deponent saith not.

U. S. Commissioner of Indian Affairs,
By R. H. Burdick,
Engineer.

Subscribed and sworn to before me this 27th day of March, 1923.

Robert R. Burns
Notary Public
Fort Hall, Idaho.

(SEAL)
My commission expires April 1, 1925.

3117

Dear Mr. Mabey:

Re: License Nos. 27-2035 and 27-2007

Pursuant to your request, enclosed are copies of the above referenced licenses.

You also requested a copy of the State Water Plan, Part 1, however, it is out of print. We are having a few copies printed though and we will send you one as soon as available.

Sincerely,

L. GLEN SAXTON

Mr. Mark R. Kulp
State Reclamation Engineer
Boise, Idaho

Fort Hall Agency
Fort Hall, Idaho
October 23, 1946

Dear Mr. Kulp:

In reviewing circumstances connected with water filings for the Fort Hall Project we note that in the case of Water License #3117 issued the 30th of June, 1945, the amount of water is limited to 123.6 second feet. The original application was for 280 second feet. Our correspondence fails to show a reason for the reduction in amount from 280 to 123.6 second feet of water. Will you kindly review the records covering the above water filing and advise the reason for the reduction.

Yours truly,

Carl W. Beck

Re: Permit No. 3117

Mr. Carl W. Beck, Superintendent
Fort Hall Agency
Fort Hall, Idaho

Dear Mr. Beck:

We enclose herewith License and Certificate of Water Right issued under the above numbered permit, confirming the right of the U. S. Commissioner of Indian Affairs to the use of 123.6 cubic feet per second of the waters of Blackfoot River, with priority of September 3, 1907, for irrigation and domestic use on lands within the Fort Hall Project.

We also enclose Departmental Receipt No. 18911 for the \$1,095.00 fee in connection with this final proof.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Re: Permit No. 3117

Mr. Carl W. Beck, Superintendent,
Fort Hall Agency
Fort Hall, Idaho

Dear Mr. Beck:

We acknowledge receipt of your letter of June 8th, enclosing vouchers for \$1,096.00 in payment of the statutory fee in connection with beneficial use proof under the above numbered permit.

We enclose Form No. 1034, duly signed by the State Reclamation Engineer; and are also returning Form No. 5-678. We are not sure whether this also requires signature. If so, will you please return it, and indicate where it should be signed.

You are correct in your understanding that there will be no further fee required in connection with field examination under your Permit No. 18816. A field examination will, however, be required under this latter permit, which will probably be made some time in July, as per office letter addressed you under date of February 5, 1945.

Very truly yours,

MARK H. KULP
State Reclamation Engineer

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF INDIAN AFFAIRS

Fort Hall Agency, ~~Idaho~~
Fort Hall, Idaho
June 8, 1945

Mr. Mark R. Kulp
State Reclamation Engineer
Boise, Idaho

Dear Mr. Kulp:

In accordance with our previous correspondence there is submitted herewith our regular voucher for \$1095 to cover payment of fees in connection with proof of beneficial use of water under State of Idaho Permit #3117. Please sign and return the voucher to this office and it will be place in line for payment.

It is our understanding that this payment fulfills all the requirements for issuance of a final certificate showing appropriation by beneficial use in accordance with the the state statutes; and that no further field inspection or fee will be required in connection with the later filing #16816 also held by the Indian Service; and that certificate of beneficial use will also be issued on that permit. If we are mistaken in this view will you kindly so advise.

Thanking your for your past courtesies, I am,

Yours truly,

Carl W. Beck

My Dear Mr. Beck:

This is to acknowledge receipt of your letter of May 15 with respect to state water filing 16816 on the Fort Hall Project.

In view of the explanation in your letter, you are authorized to make payment on this filing from funds which you state you have available.

Sincerely yours,

Paul L. Fickinger
From the Commissioner.

3117

April 19, 1938

Re: Permit No. 3117.

Mr. F. A. Gross, Superintendent
Fort Hall Indian Agency
Fort Hall, Idaho

Dear Mr. Gross:

In accordance with our conversation of a few days ago, I have checked our files in an effort to determine the fee required under your Permit No. 3117.

I find that when examination for beneficial use proof was made under this permit 1,095 forty-acre legal subdivisions or fractions thereof were being irrigated. The statutory fee in connection with this proof is \$1.00 per forty-acre legal subdivision or fraction thereof being irrigated. Therefore your fee in connection with this proof will be \$1,095.00.

I have checked, also, three other permits in the name of the Indian Service, and find:

Permit No. 15905. Beneficial use proof due November 17, 1938.
Permit No. 16816. Beneficial use proof due February 15, 1945.
Permit No. R-329. Beneficial use proof was due November 17, 1934.

Beneficial use proof has not been made on the last-named permit. Therefore, when proof is made, the priority date will be subsequent to the date of filing by the length of time that this proof is late.

I trust that this information will be of some aid to you in regard to the above-numbered permits.

Very truly yours,

R. W. PARIS
Commissioner of Reclamation
By

PHB:jl

Re: Permit No. 3117
U. S. Indian Irrigation Service

HMM. JAMES JUST
Firth,
Idaho

Dear Mr. Just:

In conformance with your verbal request of a few days ago, we are enclosing herewith a complete copy of the above permit. You will note that this permit was issued to A. F. Caldwell who was acting for and on behalf of the U. S. Commissioner of Indian Affairs.

At the time when you requested this copy, you stated that you were not particularly interested in the lands to be irrigated. However, in view of the fact that this list is comparatively short, we decided to include it so that the copy would be complete.

We trust that this will suffice for your purposes. However if there is anything further you desire, we shall be glad to furnish it upon request.

Very truly yours,

R. W. FARIS
Commissioner of Reclamation

3117

February 16, 1928

Re: Permit No. 3117

MR. W. H. BLONGREN
Acting Supervising Engineer
U. S. Indian Irrigation Service
Blackfoot, Idaho

Dear Mr. Blongren:

Reference is had to your letter of February 14th, requesting certified copy of application No. 23755 for permit to appropriate the public waters of the state. Such certified copy is enclosed herewith.

In your letter you also inquire regarding the statutory fee which must be paid before license can issue on Permit No. 3117.

Upon reviewing the file in the case of this permit, it is observed that your office was advised on October 17, 1923 that the license fee for proof of application of water to beneficial use under this permit amounted to \$1095.00. You may be interested in having a little more detail as to the manner in which the amount of this fee has been fixed.

Originally, a certificate of completion of works was issued for 280 cubic feet per second of water to be applied to 74,452.59 acres of land. Subsequently, the land to be irrigated under this permit was amended by excluding 2560 acres and including in lieu thereof 4010 acres. The actual increase, therefore, was, by this amendment, 1450 acres, which added to the original 74,452.59 acres, gives an aggregate of 75,902.59 acres now included in the permit.

At the time of field examination it was found that there was in actual cultivation a total area of 33,508.62 acres. I believe the foregoing figure was agreed upon by a representative

3117

Page 2,

MR. W. E. BLOMGREN,

February 16, 1928

of this office and Mr. R. H. Bardick, at that time engineer for the Fort Hall Project.

Applying the ratio of $\frac{33,508.62}{75,902.59}$ to the 280 cubic feet per second for which certificate of completion of works issued, entitles the permit to a license for 123.6 cubic feet per second of water, to become appurtenant to 33,508.62 acres. Said acreage is spread over 1095 forty acre legal subdivisions. The statutory fee is \$1.00 for each forty acre legal subdivision or fraction thereof covered by the permit.

License, if and when issued, may be in blanket form; that is, in accordance with the provisions of Section 5579, the water so licensed may be applied to the project as a whole and not confined to the actual irrigated areas and those only which were found to be in cultivation at time of examination.

Yours very truly,

Commissioner of Reclamation

August 6, 1927.

Mr. Geo. N. Carter,
Commissioner of Reclamation,
State of Idaho,
Boise, Idaho.

Dear Mr. Carter:

I am inclosing herewith a
check for \$8.00 to cover the expense
of preparing the abstracts of permits
and the filings on the Blackfoot River
and tributary streams, as follows:

\$5.00 for the Blackfoot
River abstract submitted with your letter
of July 11, and \$3.00 for the supple-
mental abstract submitted with your
letter of July 27.

Very truly yours,

WEB/HBB

W. E. Blomgren
W. E. Blomgren
Acting Supervising Engineer.

3117

Permit 3117

July 27, 1927

MR. W. E. HANSEN
Acting Supervising Engineer
U. S. Indian Irrigation Service
Blackfoot, Idaho

Dear Mr. Hansen:

Enclosed is an abstract of permit filings of record in this office on the tributary streams of Blackfoot River enumerated in your letter of July 12.

You will possibly observe that this abstract is prepared in different form from the one first sent you, covering Blackfoot River proper, Little Blackfoot River and John Grays Lake. It was assumed that the abstract in this form would be sufficient for your needs and considerable less work and resulting expense is incurred in preparing it in this manner. If the information is not sufficient for your needs, please so indicate.

It might be of value to you to have a short explanation of the procedure provided by Section 5594, Idaho Compiled Statutes, in case of permits which have lapsed upon our record for failure to make proof of completion of works, or for some other reason.

The ordinary procedure of this office is: As fast as time will allow, we proceed to serve notices to show cause why cancellation should not be made upon any and all permits which are in default in the matter of proof or for any other reason stated in Section 5594, Idaho Compiled Statutes. If no showing is made within forty days, the permit is cancelled at the instance of the department.

In the list of permits enclosed, you will observe in one column the due date of proof of completion and in the following column notation of when proof was made, if made. Such proof being overdue and not made, the permit is, so far as our records disclose, lapsed and subject to cancellation, upon completing the procedure prescribed in Section 5594, providing, of course, that no appearance is made. If an appearance is made, it is required that permit-holder make an affidavit that the works contemplated were completed substantially in accordance with the provisions of the permit at the time proof was due; whereupon, the ordinary proof is made and if satisfactory to the department, certificate may issue, preserving the original priority date of the right.

Page 2.

MR. W. E. BLOMSTEN,

July 27, 1927

From the foregoing, it will be obvious that although a permit may appear to be issued so far as our record of proof is concerned; yet, the department of reclamation is not warranted in saying that any such permit of such status is invalid until cancellation has actually been made. In fact there are frequent cases wherein a permit-holder has gone ahead and constructed diversion or storage works upon the basis of the permit filing, used the water, and has failed to make his proof. Such a right is likely valid; yet, to all intents and purposes, so far as our records will disclose, the permit appears void.

I will be pleased to discuss the matter with you at the time you are in Boise.

The office charge for accompanying abstract is \$3.00.

Very truly yours,

Commissioner of Reclamation

GHC:E
Enclosure

3117

July 14, 1927

MR. W. E. BLONGREN
Acting Supervising Engineer
U. S. Indian Irrigation Service
Blackfoot, Idaho

Dear Mr. Blongren:

Reference is made to your letter of July 12. This office will proceed to prepare an abstract of the tributary streams which you named in your letter. The records will also be searched for additional tributary streams, either named or unnamed. It is, however, possible that some filings might be overlooked by reason of the fact that our stream index is carried by stream name only.

It is my suggestion that a closer check could be had of the whole watershed if you or some man from your office, familiar with this territory, would spend some little time in this office going over the records. I believe such checking would insure to a greater extent that you have a record of all permits which have been filed. This, however, is only a suggestion on my part. In the meantime, we will exercise a diligent search of all streams which appear to be part of the Blackfoot drainage.

Very truly yours,

Commissioner of Reclamation

GWC:B

DEPARTMENT OF THE INTERIOR
UNITED STATES INDIAN IRRIGATION SERVICE

SUPERVISING ENGINEER
Blackfoot, Idaho

July 12, 1927

Mr. Geo. N. Carter,
Commissioner of Reclamation,
Boise, Idaho

Dear Mr. Carter:

I am in receipt of the abstract of Permits issued on the Blackfoot River, Little Blackfoot River and Gray's Lake.

It was my intention to request a complete abstract of the Blackfoot River and its tributaries. I will be pleased to have you prepare, in addition to the above mentioned abstract received, a complete abstract of all permits issued on tributary streams of the Blackfoot River, including Lanes Creek, Slug, Wilson, Trail, Meadow, Diamond, Poison, Sheep, Corral, Grave, Nigger, Miner, Brush, Cedar, Wolverine, Garden and Deadman Creeks, and any other unnamed tributaries. Also Eagle, Bridge, Graveland and several unnamed creeks tributary to Gray's Lake.

Some of the records in this office show Permit No. 3117 as 280 second-feet and 200,000 acre-feet storage. If your abstract is correct, what permit covers storage in the Blackfoot Reservoir and the construction of the Blackfoot Reservoir dam?

We are preparing data for the "Bill of Complaint" and "Bill of Particulars" for filing suit in the U. S. District Court for a complete adjudication of all rights and permits on the Blackfoot River and its tributaries, and would like to get the complete abstract of all permits on record in your office.

Very truly yours,

W. E. Blongren

July 7, 1927

Permit: 3117

MR. W. E. BLONGREN
Acting Supervising Engineer
U. S. Indian Irrigation Service
Blackfoot, Idaho

Dear Mr. Blongren:

Reference is had to your letter of July 1 inquiring regarding water rights in effect along Blackfoot River and various other matters.

I am having prepared an abstract of all water filings on Blackfoot River, Little Blackfoot River and John Greys Lake. There may be some small tributaries which have been overlooked; such being the case, will you kindly give me the names of same. Possibly Brush Creek, Tincup Creek, etc., are involved, but I do not know whether or not you are interested therein. It is some little task to prepare this abstract and same can go forward to you when completed, together with the bill for services for extra work.

This abstract, will, of course, cover only permit rights. There may be location notice rights, prescriptive rights, or rights by appropriation and use of which we have but scant record. The decrees you state you have.

You suggest making additional proof of application of water to beneficial use under your Permit 3117. Our records disclose that a proof was made on this permit on the due date thereof; namely, September 14, 1922 and that you were advised on October 17 that upon payment of the statutory fee of \$1095.00, license could issue, covering 1095 forty-acre legal subdivisions. The foregoing proof was made on its due date and for the license, which can be issued upon payment of statutory fee, the original priority date of the right is preserved. If it is your desire to make additional proof of beneficial use of water, the license which can issue as a result thereof, must lose in priority an amount of time equal to the time elapsing between September 14, 1922 and the date upon which proof may be made. There is no specific requirement as to when proof of beneficial use may be made after its due date. Once a certificate of completion of works is issued, the permit will live forever upon the office records and if and when any beneficial use proof is offered, the same loss of priority is suffered as I have just illustrated to you in the case of your Permit 3117.

3117

MR. W..E. BLONGHEN, JR

From the office record it appears that your Reservoir Permit R-161 was designed to supplement the normal flow claimed under Permit 3117 and 14247. This permit was approved for two hundred thousand acre feet and it would be my offhand opinion that you are entitled to store exactly that amount of water, provided such water is available over and above the demand of prior rights. Under Permit 3117 apparently no provision is made in the certificate of completion of works for storage, due likely to the fact that what we term storage or reservoir permits were not in use at the time Permit 3117 was filed. As to the nature of these prior rights, I cannot advise you. Some may be evidenced by decree, by prescription, or in some other manner. I believe the only way in which the whole matter can be cleared up is by a complete adjudication of all Blackfoot River water. The same question has arisen on Snake River as to validity of claim between permit rights and prescriptive rights and the matter is not definitely determined to my knowledge.

With reference to the decreed rights acquired in connection with land purchased for Blackfoot Reservoir right-of-way, it is my opinion that transfer or change of place of use of such decreed rights should be effected before there is a legal right to use the water upon lands other than those to which they are made appurtenant by the court decree. Any use of water contrary to the terms and provisions of a court decree can subject such user to a contempt of court charge. In your particular case, it is quite likely that the decreed rights have been applied to Indian lands largely through sufferance and I believe a protest filed with the watermaster would make it incumbent upon said watermaster to refuse to turn out such decreed rights at any other point of diversion than the one contemplated by the decree.

The procedure for securing a certificate of transferred water right is set out in Section 5582, Idaho Compiled Statutes, as amended by the Session Laws of 1921. Printed application blanks are available at this office.

Proof of completion of works is due upon Permits 14247 and R-161, September 12, 1929.

Very truly yours,

Commissioner of Reclamation

3117

DEPARTMENT OF THE INTERIOR
UNITED STATES INDIAN IRRIGATION SERVICE
SUPERVISING ENGINEER

Blackfoot, Idaho July 1, 1927

Mr. George N. Carter,
Commissioner of Reclamation
State of Idaho
Boise, Idaho

Dear Carter:

We have been attempting to summarize and check up the status of all rights and permits on the Blackfoot River. I find, according to our files, that the status of some of these rights is rather indefinite.

We would be pleased to have you submit a complete list of the existing rights and permits with a statement as to the present status of each, particularly those that were not covered by the decree in the Stevens case. We have a complete copy of the decree and it will not be necessary to go into the rights that are covered by this decree.

We are particularly interested also in the status of the filings for the Fort Hall Project, particularly with regard to filing proof for the increased area that has been brought under cultivation since the last proof of beneficial use made in 1922, was filed.

We would also like to have the interpretation of your Office with regard to our permit No. 3117. It has always been my opinion that this permit gives us the right to divert all surplus waters of the Blackfoot River after the decreed and licensed rights are filled regardless of the time of the year such diversion is made. It has been suggested that this permit only covers the storing of the surplus flood waters in the Blackfoot Reservoir but it is only in abnormal years that we would be able to conserve 200,000 acre feet. The average run-off, that was stored in the Blackfoot Reservoir this year, to date is approximately 135,000 acre feet. During this period there has been no flow going through the Blackfoot Reservoir gates to the lower section of the river.

3117

When we purchased right-of-way for the Blackfoot Reservoir we acquired decreed rights, amounting to 29.8 second feet, appurtenant to lands that were purchased. I failed to find any record of transfer of these rights to project lands and it has been questionable whether this is necessary. I should like to have your opinion as to whether it will be necessary to record a transfer of these rights in order to apply this portion of the normal river flow to lands of the Fort Hall Project, R-161

We are also particularly interested in the present status of permit No. 14,247, filed September 12, 1919, and when it will be necessary to file proof on this permit. -9-12-29

If this involves excessive or extra work on the part of your office force, we will be glad to stand the expense of any extra time involved.

Very truly yours,

W. E. Blomgren
W. E. Blomgren
Acting Supervising Engineer.

Re: Permit No. 3117.

Mr. R. H. Burdick, Engineer,
Fort Hall Irrigation Project,
Fort Hall, Idaho.

Dear Sir:-

Upon receipt of fees in the sum of \$1095.00, license will be issued under the above numbered permit.

These fees are based upon an area covering 1095 forty-acre tracts, at \$2.00 for each forty, or fraction. The license will be a blanket license covering the project.

Very truly yours,
W. G. SWENDSEN,
Commissioner of Reclamation.

By _____
Chief Clerk.

3117

September 22, 1923.

Re: Permit No. 3217
Fort Hall Project.

Hon. P. G. Johnston, Register,
Blackfoot Land Office,
Blackfoot, Idaho.

Dear Sir:

I have concluded my examination of the Fort Hall Project in connection with their proof of application of water to beneficial use, and find that the total area in the project under cultivation is 33,508 acres and that under the proof as offered and the existing conditions they are entitled to a license for 123.6 second feet.

The permit, as you are undoubtedly aware, calls for 280 second feet. They may at some future time quite properly under the statutes, offer proof of beneficial use under this permit for additional water, if and when additional lands are actually put in cultivation. The license issued under such a showing would have a date of priority later than the original permit. The difference in time being equal to the time that elapses between the date proof was due and the date upon which upon it was actually made.

Generally, I can see no jeopardy to other rights on the Blackfoot, by my proceeding according to the foregoing, it being understood and a fact that any rights acquired by reason of this permit and by reason of the license issued thereunder must necessarily respect prior existing rights.

If you have any further suggestions on the matter, please let me have them without delay since it is my desire to close this matter up. I shall withhold further action until about the 2nd instant.

Very truly yours,

WGS:E

Re: Permit No. 3117
Proof of Beneficial Use.

Hon. P. C. Johnston,
U. S. Land Office,
Blackfoot, Idaho

Dear Mr. Johnston:

While in your office recently we discussed briefly the proof of beneficial use offered by the United States Indian Service under Permit No. 3117, regarding which you had a letter addressed to Mr. Just from my assistant, Mr. Carter. It is probable that Mr. Carter's letter did not make the procedure in this and similar matters clear, hence this communication.

Proof of beneficial use was offered under this permit after the notice of publication required by the Statutes had been had, and the papers in connection therewith were duly forwarded here. No final action has as yet been taken in the matter of issuing a license under this permit, conditioned upon the proof, although Mr. Sutcliffe, acting for the office, has made an examination on the ground and submitted a report. Because of the importance of this matter and acting in harmony with the provisions of the statutes, I am holding final consideration of the proof until a more complete and definite field examination has been made, after which the matter will be given final consideration and appropriate action taken.

In the meantime, if you or others in your vicinity desire to submit any data relating to the said proof or permit, I will be glad to receive same.

With kindest personal regards, I am

Yours very truly,

3117

Commissioner of Reclamation

August 20, 1923

Re: Permit No. 3117

Mr. James Just,
RFD, Shelly, Idaho.

Dear Sir:

Reference is made to your letter of August 14th. The proofs which you mention as being set in the near future for beneficial use of water by the Indian Service, were made some time ago.

The present status of this permit is that all proofs have been made, examinations made by representatives of this Department, and there now remains only the determination of the amount and priority date which will be given for license when finally issued.

To date final consideration has not been given this matter by this department. When final action is to be taken you will be notified.

Very truly yours,

Director of Water Resources.

Hon. Warren C. Swendsen,
Commissioner of Reclamation,
Boise, Idaho.

My dear Mr. Swendsen:

I remember that in our conversation the other day when I was going down to Pocatello with you you mentioned the fact that the Indian Service had a proof set before you on the beneficial use of a certain amount of water. Will you please inform me as to the time and place of this hearing because the water users on the Blackfoot River are concerned in it and may desire to be present?

Thanking you in advance, I am,

Very truly yours,

James Just

JJ:LES

3117

STATE OF IDAHO
DEPARTMENT OF RECLAMATION

BOISE

Arco, Idaho
August 4th,
1 9 2 3

Hon. W. G. Swendsen,
Commissioner of Reclamation
Boise, Idaho.

Dear Sir:

Pursuant to instructions from your office, on July 30th and 31st of this year, I examined the irrigated lands in the Ft. Hall project in order to check if possible the area as given in the land list as furnished your department by the Indian Service.

Mr. Burdick, their engineer, went with me and cheerfully and courteously rendered all the assistance possible in finding section corners, roads, etc.

On account of the way the Indians farm their land it would be impossible to get an accurate check of this without a survey of the irrigated land in each section, but by driving over the project, which is flat country and easy to see, I, together with Mr. Burdick, added the figures as given by them for each section and then carefully approximated the area as seen by me to see if same would check with their figures.

In some cases this was easy, as practically the entire sections are under a high state of cultivation, in other cases the manner in which the Indians have farmed the land, a patch here last year and a new patch there this year, made it difficult to make the approximation.

However, after travelling over the project for two days, covering a distance of about 150 miles in so doing, it is my belief that their figures as furnished are very conservative, as in numbers of instances it seemed to me that lands which would have been included as pasture lands were left out.

I am inclosing map furnished by them upon which I have marked, in red ink, the acres in cultivation in each section on the

3117

DEPARTMENT OF RECLAMATION
BOISE

No.2. Hon. W.G.S.

project, also a small map showing by lead pencil, tracing the route travelled in going over same.

As Mr. Burdick stated he had seen you and you thought it unnecessary to re-examine the lands under the Little Indian ditch, I paid no attention to that portion of the project,

Very respectfully yours,

S/L.

May 10, 1923.

Re: Permit No. 3117.

Mr. R. L. Sutcliffe,
Arco, Idaho

Dear Mr. Sutcliffe:

I assume that all of the lands included in this permit must necessarily be examined for beneficial use proof. I never was able to find out just why Henninger did not examine more than 3500 acres last summer. It was our intention that he examine the whole project. I suppose if necessary we can wait until the Indian Service has a man available who is familiar with the project, to go with you on this examination. Mr. Burdick was here yesterday and I assumed that he would return to Fort Hall sooner than within several weeks, as you state.

It will not be necessary to include a complete description of the irrigation system, inasmuch as we have very complete data which was furnished by the Indian Service at the time they made proof of completion of works, in fact, no examination is necessary only as to acreage actually served with water.

Very truly yours,

Assistant Commissioner

Re: Permit No. 3117.

Mr. George N. Carter, Assistant Commissioner.
Department of Reclamation,
Boise, Idaho.

Dear Sir:

Enclosed is one copy of Form 13 requesting an amendment to the two points of diversion as contemplated in the original application by the addition of a third point of diversion covering the land under the Little Indian Ditch as requested in your letter dated March 19, 1923.

Yours truly,

R. H. Burdick
Engineer.

RHB-H

3117

March 19, 1923.

Re: Permit No. 3117.

U. S. Indian Irrigation Service,
Fort Hall, Idaho

Gentlemen:

Reference is made to your Permit No. 3117, upon which you recently made proof of beneficial use.

It appears that subsequent to the approval of this permit and the issuance of certificate of completion of works, that you secured same, including additional lands under what is locally known as the Little Indian ditch. The amendment to the list of lands to be irrigated was in proper form and approved prior to the date upon which proof of beneficial use of water was made. However, it appears that in order to serve the lands contemplated in the amended land list, a new point of diversion was required and that no mention was made of this fact in submitting your amendment to the permit.

In order that your permit may be in proper order and a license issued taking water appurtenant to lands under the Little Indian ditch, it will be necessary that you also submit an amendment to the two points of diversion mentioned in the original permit.

The original permit contemplates points of diversion as follows: No. 1, N 22 10' E. 1200' from the SW corner of Section 18; No. 2, S. 69 40' E. 1700' from the SW corner of Section 14, both in T. 2 S. R. 33 E. S. 4. These are the only points of diversion mentioned in your original permit and are the only points contemplated in the certificate of completion of works.

The point of diversion of the Little Indian ditch which serves the additional land later brought under the terms of the permit, is N. 13 E. 4700' from the SW corner of Section 7, T. 2 S. R. 33 E. S. 4.

Therefore, you should, upon the enclosed blanks, submit your amendment to the points of diversion included in the original permit, by providing for the new point of diversion for the Little Indian ditch, as set forth in the foregoing. It is only necessary to furnish this office with one copy of the amended point of diversion.

An examiner will soon visit your project for the purpose of inspecting same with reference to beneficial use of water. It will probably be desirable for one of your men to accompany Mr. Schulliffe over the project. It may possibly be desirable for another examination to be made of the Little Indian ditch lands, although Mr. Hemminger, who was to have examined the whole project last fall, did examine these lands and these only.

3117

Very truly yours,

Assistant Engineer

M E M O

December 13, 1922.

Re: Permit No. 3117

Apparently some adjustment will be necessary on the new point of diversion now claimed under the terms of this permit. This examination was given to E. W. Henninger last August, and for some unknown reason the only part thereof examined was the land under the Little Indian ditch, which is not mentioned in the original permit. A complete examination, together with a re-examination of the Little Indian ditch and lands will be necessary before license can be issued.

GEO. N. CARTER

3117

DEPARTMENT OF THE INTERIOR

Re: Permit No. 3117. UNITED STATES INDIAN IRRIGATION SERVICE

FORT HALL IRRIGATION PROJECT

FORT HALL, IDAHO

October 25th, 1922.

Mr. W. G. Swendsen,
Commissioner of Reclamation,
Boise, Idaho.

Dear Sir:

Replying to your letter dated October 19, 1922.

The point of diversion of the Little Indian ditch nor the list of lands to be watered by it do not appear in the original application for permit. These were covered by an application for change of place of use of the amount of water necessary for this land, submitted to your office July 13th, 1922, together with the "Notice for Publication". Copy of this application is enclosed herewith.

As to why Mr. Henninger examined only the lands under the Little Indian ditch instead of the whole area involved, I am unable to state. I was absent from the office when Mr. Henninger was here and talked with him over the telephone only. He stated at the time that he wished to make an examination of the lands under the Little Indian ditch only and I sent a man up with him as a guide the next day.

Copy of map which accompanied my letter of August 1st, 1922, is enclosed herewith.

We have no copy of a complete map of the Fort Hall Project showing the Little Indian ditch, but if you will look at the large map which accompanied the report of the Greater Fort Hall Irrigation Project I believe that you can obtain the desired information.

Very truly yours,

Engineer.

ReP Permit No. 3117

Mr. E. H. Burdick, Engineer,
U. S. Indian Irrigation Service,
Fort Hall, Idaho.

Dear Sir:

Reference is made to the proof which the Indian Service has recently submitted in connection with the above mentioned permit.

It is noted that the proof provides a point of diversion for the Little Indian ditch in Section 7, T. 2 S. R. 38 E., which point of diversion does not appear in the original application for permit.

It is not exactly understood why Mr. Henninger examined only the lands under the Little Indian ditch, rather than making a complete examination of the total area involved.

If you can give us further information on the two above paragraphs, same will be greatly appreciated.

Under date of August 1st you wrote this office stating that two copies of a map to accompany application to amend land list accompanying permit No. 3117 were enclosed. A search of the file has failed to locate these maps, therefore, we are asking if you will be good enough to send us another copy of this map. Also, if you have a complete map of the Fort Hall project showing the Little Indian ditch and lands under it, as well as the main body of the land farther down, we would appreciate having a copy for our information.

Very truly yours,

W. G. SWENSEN
Commissioner of Reclamation

TURNER TRUST COMPANY

POCATELLO, IDAHO

September 14, 1922.

Hon. Warren G. Swenson,
Commissioner of Reclamation,
Boise, Idaho.

Dear Sir:---

With this I hand to you the proof of application of water to a beneficial use by the United States Commissioner of Indian Affairs under permit No. 3117 proving the beneficial use of nine hundred and eighty-seven (987) cubic feet per second of the waters of the Blackfoot River and its tributaries.

Please acknowledge the receipt of the above and if there are any fees to be paid by the Government (the Commissioner of Indian Affairs acting for it) advise us of the amount and we will endeavor to see that the same are paid.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Theo. Turner", with a large, sweeping flourish extending from the end of the name.

3117

PERMIT NO. 3117**Proof of Application of Water to Beneficial Use****Deposition of Holder**

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Rowland H. Burdick. Age 44. Residence Fort Hall, Idaho.
Occupation Civil Engineer. Postoffice address Fort Hall, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. U. S. Commissioner of Indian Affairs, Washington, D. C. My posi-
tion Engineer in Charge. Authority by appointment by Sec. of the Interior.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. No. of Permit 3117, date Sept. 14, 1907, priority Sept. 3, 1907.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Blackfoot River. Little Indian Ditch-4766' S 13° W to N W corner of
Sec. 18 Tp. 2S, R.38 E.B.M. Upper Canal-1200' N 22°10' E to N E corner of
Sec. 13 Tp. 3S, R.35 E.B.M. Lower Canal-1700' S 69°40' E from N W corner
of Sec. 14 Tp. 3S, R.35 E.B.M.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use.

Ans. Little Indian Ditch: wooden headgate, earth canal 8 miles long,
capacity 36 Sec.Ft. Upper Canal: Concrete dam, concrete headworks,
earth canal 26 miles long and 90 miles of laterals, capacity 545 Sec.Ft.
Lower Canal: Concrete dam, concrete headworks, earth canal 25 miles
long and 44 miles of laterals, capacity 406 second feet.

Ques. 6. State for what purpost water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivate or natural meadow land and the nature of all improvement which have been made as a direct result of said use.

Ans. Irrigation and domestic use. Land under this proof all cultivated.
For description of irrigated land see attached list.

Ques. 7. If for other than for irrigation purposes, state how applied, amount of horse power generated, etc.

Ans. - - - - -

Ques. 8. What is the minimum amount of water required for the specified above?

Ans. Three acre feet per acre per season at place of use.

Ques 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. - - - - -

3117

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Water has been continuously used for irrigation through the three canals mentioned above from 1907 to the present time.

Maximum diversions through the Little Indian Ditch 25 Sec. Ft.

Maximum diversions through the Upper Canal 544 Sec. Ft.

Maximum diversions through the Lower Canal 406. Sec. Ft.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and right claimed thereunder.

Ans. Dec. 14, 1891, for 30,000 miners inches from Snake river is owned and used on these lands to the extent to which it is available. The maximum diversions from this source at head of canal from Snake river have been 487 Sec. Ft. During low water years this right is only available during the early part of the irrigation season and for the successful irrigation of the lands mentioned above during these years the Blackfoot river is alone available.

(Sign) U. S. Commissioner of Indian Affairs
By *Robert H. Burdick*
Engineer

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in *Pocatello* County of *Bannock* State of Idaho, on this *14th* day of *Sept.* A. D. 19*22*

Thos. Turner
U. S. Commissioner

Permit No. 3117**Proof of Application of Water to Beneficial Use**

DEPOSITION OF WITNESS

Ques. 1. State your name, age, residence, occupation and postoffice address,

Ans. Ralph B. Koeber, age 29, Fort Hall, Idaho, Irrigation Engineer,
Fort Hall, Idaho.Ques. 2. Are you acquainted with Rowland H. Burdick, the holder of Permit No. 3117? How long have you known him and where does he reside?Ans. Yes. Two years, Fort Hall, Idaho.Ques. 3. Have you read or heard read said Permit No. 3117, and are you familiar with its provisions and conditions?Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Blackfoot River, County of Bingham.Ans. Location of point of diversion: At a point distant 1200 Ft. N.
22°-10' E. to the N.E. corner of Sec. 13; also at a point distant
1700 Ft. S. 69°-40' E. from the N.W. corner Sec. 14 T.3S, R. 35 E.B.M.
Also a point distant 4766 Ft. S. 13° W. to the N.W. corner of Sec. 18
T.2S, R. 38 E.B.M. 51 miles of canal 100 to 550 Sec. Ft. capacity,
134 miles of laterals less than 100 Sec. Ft. capacity.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. Upper Canal 544 Sec. Ft. Lower Canal 406 Sec. Ft. Little Indian
Ditch 25 Sec. Ft.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation and domestic use. For subdivisions and acreage see
attached list.

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. _____

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Sand loam soil, formerly heavy growth of sage brush. Not less
than three acre feet per acre per annum at the place of use.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. During the irrigation period 1916, 1917 and 1922 a continuous flow not in excess of figures given in answer to question No. 5.

(Sign) *A. B. Koels*

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Pocatello County of Bannock

State of Idaho, on this 14th day of September, A. D. 1922.

REPORT OF ENGINEER

This proof is for Beneficial Use

Permit No. 3117

In Water District No. 17 -G

1. State name of applicant and number of permit: U. S. Commissioner of Indian Affairs

2. State source of water supply: Blackfoot River

3. Location of point of diversion:

NE 1/4 NW 1/4 Sec. 7, T. 2 S., R. 38E.

4. Describe works as they exist, giving dimensions and capacities of same:

Diversion Dam 200' long, 4' high. H. G. Wood, 8' x 4'.

Canal 7.9 mi. long, bottom 6', carrying 2 ft. of water, capacity 30 s. f.

Take Outs are direct from canal,

5. State whether or not water has been turned into works of diversion: Yes.

6. Give exact location of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irrigation):

See attached list.

7. Submit map on enclosed plat, showing location and details of above description.

8. How many parties conduct water in this system? One.

9. Give names and amount of each right:

U. S. Indian Service, 25 s. f.

10. What large stream would the water here appropriated finally reach? Snake.

11. Describe the various tributaries en route, from point of diversion to the principal drainage stream: Blackfoot River-Snake River.

Remarks: It is intended to extend canal 8 mi. and take in area between canal and Blackfoot River.

This examination was made on the 25 & 26th days of August

Instructions to Examiners

1. Examiners will not be permitted to examine any of the receipts in the office pertaining to this permit. They are to furnish a report of the facts and conditions as they exist, from their own observations and inquiries.
2. Always carefully note the location of the point of diversion, and accurately plat same.
3. Find out how many parties own right in the ditch or canal and give their names and amount of right.
4. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
5. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
6. If any unusual conditions are discovered, make a plain statement of them under remarks.
7. Always see the holder, if possible, and go over the whole ground with him, and make your report only upon actual existing facts and conditions.

(This report must be sworn to when not made by an attache of the office.)

Kilgore, Idaho, Aug. 29, 1922.

Mr. W. G. Swendsen,
Commissioner of Reclamation,
Boise, Idaho.

Dear Mr. Swendsen:

I have just returned from making the examinations in the SE part of the state. I found your letter of the 12th instant on my return advising me the J. S. Davis Permit No. 9978 was not to be made. I am sorry but I had already made this examination and suppose you will want the report made with the others now. Advise me if you do not. I have worked steadily including Sunday, from the 14th to 29th, inclusive. I am inclosing vouchers covering this time, in the hope that I can get them in the examiner's meeting on the 1st, as I am greatly in need of the funds. I will get the reports shaped up right away and sent in.

I sold the State owned car at Hamer and am inclosing the check, \$95.00, for same. I can vouch for the check, but probably it would be well to hold the bill-of-sale up until it is collected. Make the bill-of-sale out to Frank Hable, Hamer, Idaho. There are no garage charges to pay, as it was included in the price. I am happy about this sale as the only other offers were far below this, ranging from \$50 to \$85 and us pay the garage charges.

Please send me an additional supply of forms for maps.

While at the Blackfoot River I was told by the Irrigation Service there they would make application for proof on the main tract of their holdings, probably about the middle of September. I would suggest they be advised to submit their exact acreage of irrigated land. They did not seem to understand this and I was obliged to cut out a considerable amount from the land under the Little Indian Ditch which I examined Friday and Saturday.

Very truly yours,

Kilgore, Idaho.

*Mrs. Brown
East. Fair.*

DEPARTMENT OF RECLAMATION
BOISE

INSTRUCTIONS
PROOF OF BENEFICIAL USE

BOISE, IDAHO, **August 23, 1922.**

U. S. Commissioner of Indian Affairs,
Fort Hall, Idaho.

DEAR SIR:

I enclose herewith the following forms to be used in connection with proof of application of water to beneficial use under Permit No. **3117**.

DEPOSITION OF PERMIT HOLDER.
DEPOSITIONS OF TWO WITNESSES.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of the permit holder's rights:

1. On **September 14, 1922**, the date set for the proof of application of water to beneficial use, the enclosed deposition forms (one for permit holder and one each for two witnesses) should be filled out and sworn to at **Pocatello, before Mr. Theo. Turner, U.S. Commissioner .**

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice. When these have been received, together with report of examining engineer, you will be further advised as to fees due before issuing license.

Yours truly,
W. G. SWENDSEN,
Commissioner of Reclamation.

3117

(P. O.)B. Skfoot, Idaho.....

(Date)August 7, 1922.....

Commissioner of Reclamation, Boise.

Dear Sir:

I have your letter of.....August 5.....enclosing notice of proof under
Permit No.3117.....which will be published as you request, beginning with our issue of Aug. 10.

THE IDAHO REPUBLICAN.

By *Ruth Sutton*.....

Bookkeeper.

Thank you.

NOTICE FOR PUBLICATION

NOTICE OF PROOF APPLICATION OF WATER
TO BENEFICIAL USE

Notice is hereby given that at 10 a. m. on the 14th day of September, 1922,
at Pocatello, County of Bannock, State of Idaho,
before Theo. Turner, U. S. Commissioner, proof will be submitted
of the application to beneficial use of 280 cubic feet per second of the
waters of Blackfoot River in accordance with the terms and conditions of
Permit No. 3117 heretofore issued by the State Engineer
of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are

United States Commissioner of Indian Affairs, Fort Hall, Idaho.

The use to which said water has been applied is irrigation and domestic

The amount applied to beneficial use is 280 cubic feet per second

The place where said water is used (if for irrigation, give full and accurate description of the
lands irrigated) See attached list

The name of the canal or ditch or other works by which said water is conducted to such place of use
is Fort Hall Upper Canal, Fort Hall Lower Canal, and Little Indian Ditch

The right to take water from such works is based upon Permit No. 3117

The source of supply from which such water is diverted is Blackfoot River

The date of the priority which said user is prepared to establish is September 3, 1907

W. G. Swendsen
Commissioner of Reclamation.

3117

LIST OF LAND ON WHICH PROOF OF APPLICATION
OF WATER TO BENEFICIAL USE UNDER PERMIT
3117 IS TO BE MADE

All that part of sections 23, 24, 27, and 28 lying south of the Blackfoot River, in	T. 3 S. R. 34 E.

DEPARTMENT OF THE INTERIOR
UNITED STATES INDIAN IRRIGATION SERVICE

FORT HALL IRRIGATION PROJECT
 FORT HALL, IDAHO

July 13, 1922.

Mr. W. C. Swendsen,
 Commissioner of Reclamation,
 Boise, Idaho.

Dear Sir:

Application is hereby made to amend the land list accompanying Permit No. 3117 by substituting for the following described lands

All of Section 2 - - - 640 acres
 All of Section 11 - - - 640 "
 W $\frac{1}{2}$ of Section 14 - - - 320 "
 All of Section 23 - - - 640 "
 N $\frac{1}{2}$ of Section 26 - - - 320 "
 all in T. 5S, R. 33 E.B.M.

the lands described below:

	Sec. 21	T. 5S	- R. 35E
N $\frac{1}{2}$ SE $\frac{1}{4}$	21		
NW $\frac{1}{4}$, N $\frac{1}{2}$ SW $\frac{1}{4}$, W $\frac{1}{2}$ NE $\frac{1}{4}$	22	3	35
W $\frac{1}{2}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$ SW $\frac{1}{4}$	32	4	35

U. S. Commissioner of Indian Affairs,

By

R. H. Burdick
 Engineer.

RHB:BT

APPROVAL OF COMMISSIONER OF RECLAMATION.

I, W. G. Swendsen, Commissioner of Reclamation of the State of Idaho, hereby approve the above and foregoing application for amendment to Permit to appropriate the public waters of the State of Idaho, No. 3117.. This approval constitutes a new permit and is issued as an amendment to the original permit, to which it refers and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

W. G. SWENDSEN,
 Commissioner of Reclamation.

By Geo. H. Carter
 Assistant.

3117

July 11, 1922.

In Re: Permit No. 3117.

Mr. R. H. Burdick, Engineer,
U. S. Indian Irrigation Service,
Fort Hall, Idaho

Dear Sir:

Reference is made to the extremely difficult telephone conversation which we had yesterday in regard to the proof of beneficial use now pending on your permit No. 3117.

I have examined the records with reference to this permit and find that you have been allotted the full five years allowable under the statutes for proof of completion of works and also the full six years allowable by statute for the proof of beneficial use, making the beneficial use proof due on September 14, 1922. I believe you were in doubt as to the exact amount of water you should show in the notice of publication of this proof, due to the fact that at this time all of the land upon which beneficial application of water will be made is not now in cultivation. It will be entirely proper and customary to advertise the full amount allowed under the proof of completion of works, which in this case is 280 second feet. Should the field examination later disclose that this amount is in excess of that for which a license could be issued, the amount would be cut down accordingly and no misunderstanding would result, due to the fact that you had advertised 280 second feet.

In regard to Mr. Swendsen being able to meet you within the next few days, I will call this matter to his attention and no doubt he will communicate with you.

Very truly yours,

Assistant Commissioner
of Reclamation.

January 3, 1922.

Mr. W. G. Swendson,
Commissioner of Reclamation,
Boise, Idaho.

Sir:-

The Fort Hall Irrigation Project of the U. S. Indian Service will desire to make proof of beneficial use of water under Permit No. 3117, sometime during the coming year.

It is desired that your office advise us of the steps required to comply with the law, and particularly as to the information you will require, and the shape in which you would like to have the same.

It will be necessary for us to start compiling our data early in the spring, and if it is necessary to make detailed surveys we will need all the time possible.

Recently I mentioned this matter to you in Pocatello, and you then said you would not require a survey of irrigated areas by metes and bounds. I would like to have you confirm this. As you know - the Indian land is allotted in twenty acre units - so it will not be difficult to approximate the irrigated areas. 9/1

An early reply will be appreciated.

Very truly yours,

H. W. Jones

Supervising Engineer.

December 30, 1921.

In Re: Fort Hall Project.

Mr. R. H. Burkick,
Engineer U. S. Indian Service,
Fort Hall, Idaho

Dear Sir:

This will acknowledge receipt of your communication of the 27th, same being an inquiry concerning the procedure necessary to submitting proof of beneficial use of water on the Fort Hall project.

Answering your first question, I may say that all lands in the project, irregardless of ownership will be treated, so far as a proof in this office is concerned, in a similar manner. The laws in respect to making such proof make no distinction regarding ownership, title, etc.

Answering your second question, there is inclosed herewith a set of forms employed in making proofs of beneficial use, all of which I take it are self-explanatory.

Answering your third question, I may say that the office does not require the submission of new plats when proofs of beneficial use are made unless the lands in the irrigation system as constructed and irrigated, disagree materially with the plan disclosed on the maps which were filed when the permit was taken out. Regarding this matter, I take it you have information. Should you desire to do so however, we will be glad to have you submit such plans as you think necessary to a thorough understanding of the problem, on such scale as you can conveniently prepare the same.

Answering your fourth question, I may say that data showing irrigated area in ~~irregular parcels~~ predicated on plane table, surveys with stadia method and planimeter computations will be very acceptable, in fact, it has not been the custom of this office and we do not now require persons making proof to furnish this information, providing they are in a position, as required by the inclosed blanks, to indicate the amount of irrigated area in each subdivision. Under the statutes, when these proofs are filed, it is mandatory that this office conduct a field investigation to verify the conditions set out in the proof. In conducting these examinations, it has been the practice of the office to supply the examining engineer with a copy of the maps now on file in the office, under which the permit was issued. With this map in his possession the examining engineer looks over each forty-acre tract and employs his own methods to determine the actual irrigated area. If it is your intention to make a survey which will give

#2 Mr. Burdick

12-30-21.

you information for other use, obviously this department would be glad to have such data submitted along with proof, thus facilitating our work in making final examination, but the office does not demand such surveys.

Answering question No. 5, you are advised that on or before submitting proof of beneficial use, an amendment to your land list or to your original permit should be presented by submitting to this office an application for such amendment, setting forth the changes that are desired, whereupon the office gives the matter consideration and if the action is justified by the facts, the application is approved and the permit thus amended.

Answering question No. 6, it is my understanding that your permit as it now stands indicates your intention of using this water for irrigation and domestic purposes, which latter ~~two~~ would include the municipal purpose to which some of this water may be put, on lands in the corporate limits of Pocatello. The proof in this respect should indicate the quantity of water that is used and where used. For the irrigation of gardens and lawns the area thereof should be made accordingly.

I trust the foregoing gives you the information you desire. If, however, I have not made the matter perfectly clear, please write me again concerning it.

Very truly yours,

Commissioner of Reclamation

WGS:P

3117

DEPARTMENT OF THE INTERIOR
UNITED STATES INDIAN IRRIGATION SERVICE

FORT HALL IRRIGATION PROJECT
FORT HALL, IDAHO
December 27, 1921.

Mr. W. G. Swendson,
Commissioner of Reclamation,
Boise, Idaho.

Dear Sir:

I would like to know at this time certain facts relative to submitting the Proof of Beneficial Use of Water on the Fort Hall Irrigation Project.

First: Will all lands under the Project be the same, that is, will the same form of proof be applicable to both Indian owned and Cede/land?

Second: What form of proof will this Project be required to submit? If there is a standard form, a copy of such form will be appreciated.

Third: If plats showing cultivated land on Project are ordinarily required to be drawn to a standard scale, will it be possible to use a smaller scale on a Project of this size in order to make the Proof less cumbersome.

Fourth: Where irregular areas are involved will the Transit or Plane table used with Stadia Method be acceptable for obtaining the data in the field, and will plats, made from this data, showing the boundaries of the cultivated areas and the acreage therein obtained by a planimeter be acceptable?

Fifth: I would also like to know if a Change of Place of Use can be had and if so what steps are necessary to obtain it. This information is required from the fact that certain areas included in the original application lie entirely outside of the Project limits while certain other small areas within the Project have been placed under cultivation which are not covered by the application.

Sixth: The city of Pocatello has certain areas within it's limits which are covered by the Project and for which the City holds a right by contract with the Government. This water is used to irrigated lawns and gardens and to some extent for domestic use. In this case how should Proof be made? Should a request for Change of Manner of Use from "Irrigation Use" to "Municipal Use" be made or should the Proof be made as on other lands on the Project?

Very truly yours,

R. H. Burdick
Engineer.

3117

February 26, 1921.

Re: Permit 3117. ✓

Mr. H. W. Dietz, Supervising Engineer,
U. S. Indian Irrigation Service,
Salt Lake City, Utah.

My dear Mr. Dietz:

I have your communication of the 24th asking for information relative to the above stated permit.

The records of this office show that the full ten years allowed for application of beneficial use as provided in Section 5577 Idaho Compiled Statutes will be up September 1922, and according to the statutes there is no one vested with authority to grant a further extension of time. However, Section 5578 provides a means of making a belated or delinquent proof of beneficial use. This section may afford you some relief, although I confess that to date I have not been able to interpret it in your favor.

The foregoing statutes have been interpreted by the Supreme Court in a number of cases and before coming to a final conclusion with respect to the proper steps for you to pursue, it might be a good plan to look up these decisions. They are contained, first, Idaho etc. Company versus Stephenson, 16th Idaho, page 418 and page 821 also Vineyard L. & L. Co. versus Twin Falls Salmon River, etc. 16th Idaho. 5579 has been interpreted to a certain extent also in the case of Basinger versus Taylor, 30th Idaho.

Until I get time to consult these cases and give this matter more thorough consideration, I hesitate to attempt to offer you advice as to the proper course to pursue to protect this right. It might be advisable to take out a new permit, although I do not know at this writing just what recent filings may have been made.

No legislation has been offered or considered by the present session under which you might expect relief and it is now entirely too late to attempt to get anything through, there being but four more working days in the session and great congestion of business now existing in both houses.

I will endeavor to get through the Supreme Court decisions bearing on this question at the earliest possible moment and give you a further reply to your communication. It is not likely, however, that I can give this matter sufficient time to come to any conclusion before about the 6th or 7th of March. In the meantime if you look the matter up, I shall be glad to have your views on the situation.

Very truly yours,

3117

WGS:100

Commissioner of Reclamation.

DEPARTMENT OF THE INTERIOR
UNITED STATES INDIAN IRRIGATION SERVICE

~~SUPERINTENDENT OF IRRIGATION~~
SUPERVISING ENGINEER
SALT LAKE CITY, UTAH.

February 24, 1921.

Mr. W. G. Swendson,
State Commissioner of Reclamation,
Boise, Idaho.

Dear Mr. Swendson:-

As you know the Government's Permit #3117 to appropriate the flood waters of the Blackfoot River requires proof of beneficial use of the water by September, 1922.

There is a considerable area on the reservation which we have been unable to water on account of our inability to obtain appropriations for needed improvements and enlargements.

Our reservoir has been completed to a capacity in excess of the water supply, and canals constructed to all the land. The latter because of insufficient size cannot deliver the water to all the land in question.

Will you please advise me of the probable status of our water rights to the unwatered areas after September, 1922 - and also if there are any steps which I can and should take to preserve a water right for this area? Would there in your opinion be any chance of obtaining temporary relief by a special act of the present legislature?

An immediate reply would be appreciated.

Very truly yours,

H. W. Dief
Supervising Engineer.

HWD-P

3117

December 4th, 1917.

Mr. H. W. Dietz,
Superintendent of Irrigation,
Salt Lake City, Utah.

Dear Sir:

Replying to yours of November 21st, will say that the application for extension of time, for making proof of beneficial use on Permit No. 3117, has been granted, and you will receive the same approved in due time.

Referring to Permit No. 3116, will say that the same has lapsed upon our records. Also, that if you have a decree, as you state, the Permit is of no real value to you and may just as well be cancelled. I enclose you herewith a Relinquishment, which will authorize us to cancel the Permit, in order to clear our records of it.

Very truly yours,

State Engineer.

Enc.: R. Blank.

JHS:FM

3117

DEPARTMENT OF THE INTERIOR
UNITED STATES INDIAN IRRIGATION SERVICE
SUPERINTENDENT OF IRRIGATION
SALT LAKE CITY, UTAH

November 21, 1917.

Mr. J. H. Smith,
State Engineer,
Boise, Idaho.

Dear Mr. Smith:

I have your letter of November 19th relative to Permits Nos. 3115, 3116, 3117, in which you state that permit No. 3116 has lapsed because of failure to make proof of works.

This permit covers our Snake River water right which has been decreed us by the Court. At the time of making proof of works the question of including this in our proof was taken up with the State Engineer and he then advised that since this water right was decreed by the court it should not be included in the proof.

Under these circumstances will you kindly tell me what your interpretation is of the status of Permit No. 3116?

I return corrected application for extension herewith.

Very truly yours,

H. W. Dietz

Superintendent of Irrigation.

OFFICE OF STATE ENGINEER

FORT HALL IRRIGATION PROJECT

RECEIVED

FEB 9 - 1917

Fort Hall, Idaho

Permit No. _____

File No. 13126

Application for Extension of Time for Beneficial Use Proof.

STATE OF IDAHO

ss.

County of Bingham

H. W. Dietz for and on behalf of the

U. S. Commissioner of Indian Affairs, of Salt Lake CityState of Utah, being first duly sworn upon his oath deposes and says:

THAT he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho,

No. 3117 combined to serve one irrigation projectTHAT under the terms and conditions of said permit, proof of beneficial use thereunder was required to be made by September 14, 1916 extended to September 14, 1918THAT he has heretofore put to beneficial use 450 second feet of water and has irrigated 24,511 acres.

THAT, for the following reasons, he is unable to put to beneficial use within the required time, the remainder of the water appropriated under his permit, to-wit: The land is allotted to Indians who are naturally slower to accomplish cultivation than white men. The policy of the Indian Bureau is to lease much of this land and it will require considerable time to realize the desired end. Progress on beneficial use is being made at a pretty fair rate.

WHEREFORE, He asks that the State Engineer extend the time for the making of proof of beneficial use under said permit to September 14, 1922.

And further, deponent saith not.

Subscribed and sworn to before me this 17th day of Nov., 1917Angie E. Bickford
Notary Public.My commission expires June 15-1920.Date of receipt at office of State Engineer NOV 23rd, 1917.

J.H. Smith,

APPROVAL OF STATE ENGINEER

I, J.H. Smith, State Engineer of the State of Idaho, hereby extend the time for the making of proof of beneficial use under Permit to appropriate the Public Waters of the State of Idaho, No. 3117, to September 14th, 1922.

Witness my hand this 23rd day of November, 1917.J.H. Smith
State Engineer.

3117

OFFICE OF STATE ENGINEER

Permit No. 3117

Application for Extension of Time for Beneficial Use Proof.

STATE OF IDAHO
Bingham and
County of Bannock

} ss.

Henry W. Dietz, for and in behalf of the Commissioner of Indian Affairs
of Salt Lake CityState of Utah, being first duly sworn upon his oath deposes and says:THAT he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho,
No. 3117THAT under the terms and conditions of said permit, proof of beneficial use thereunder was required
to be made by September 14, 1916.THAT he has heretofore put to beneficial use 185.7 second feet of water and
has irrigated 13,000 acres.

THAT, for the following reasons, he is unable to put to beneficial use within the required time, the remainder of the water appropriated under his permit, to-wit: The land being owned, in the main, by the Indians of the Fort Hall Reservation has developed more slowly than it would have done under similar circumstances in the hands of white settlers. Due diligence in the effort to subdue the land is being used and fair progress is being made. The land on what is known as the ceded tract is being developed as rapidly as the funds of the settlers will permit. A very stringent condition of financial affairs of these settlers makes it difficult to progress as rapidly as might be expected under more favorable conditions and every effort within their means is being made to develop the land by most of the settlers.

WHEREFORE, He asks that the State Engineer extend the time for the making of proof of beneficial
use under said permit to September 14, 1918.

And further, deponent saith not.

Henry W. Dietz
Superintendent of Irrigation, U. S.
Indian Service for and in behalf of the U. S. Commissioners of Indian Affairs.

Permit 3117

Mr. H. W. Dietz,
Supt. of Irrigation,
Fort Hall, Idaho.

Sir:

Replying to your letter of the 11th inst., relative to amendment of above permit, would say that amending the list of lands prior to making final proof will not adversely affect the right of the parties owning the lands. They will have the same rights under the permit as those whose lands were included in the original permit. All that is required is that this application for amendment be filed prior to publishing the notice, as all lands included in the license must be included in the notice published. The application should be made upon the enclosed blank and should be accompanied by maps in duplicate.

Very truly yours,

F. P. KING,

State Engineer.

September 11th, 1913

The State Engineer,

Boise, Idaho.

Sir :-

There are certain pieces of land watered by ditches of this project which were not included in the list of lands as filed with the application to appropriate water, and later used in the proof of completion of construction. I wrote to Mr. A.E. Robinson relative to this at the time and received reply that an ammended list should be submitted at the time of making proof of beneficial use of water.

I have since written your office and am unable to find any reply in my files, asking if the fact that these lands were not included in the original list will in any way affect their subsequent right to water. A reply to this inquiry will be greatly appreciated.

Very respectfully,

Superintendent of Irrigation.

Re Indian Settlement
Warrant No. 12,671.

To the Honorable the
Secretary of the Treasury,
Washington, D. C.

Dear sir:--

We are today in receipt of the above warrant drawn in favor of A. E. Robinson, State Engineer, in the sum of \$84.00. Would say that the claim for this amount was put in about 8 months ago, that since that time Mr. Robinson, as State Engineer, has been succeeded by Mr. F. P. King. In order that there may be no further delay in getting this account straightened out, we are returning the warrant herewith with the request that you advise us as to how this should be endorsed to secure payment.

Very truly yours,

Deputy State Engineer.

NOTICE OF SETTLEMENT OF CLAIM.

Treasury Department,
OFFICE OF THE
AUDITOR FOR THE INTERIOR DEPARTMENT,

Washington, D. C.,

May 28, 1913.

A. E. Robinson,
State Engineer,
Boise, Idaho.

Sir:

Certification has been made this day to the Secretary of the Treasury that the sum of \$ 84.00 is due from the United States to you for fees of State Engineer required by the laws of Idaho for making proof of completion of works on the Ft. Hall Irrigation Project under Permit No. 3117. Settlement No. 35874

A warrant will be issued in payment thereof, and in due course of official business it will be forwarded to you by the Treasurer of the United States.

Respectfully,

Auditor.

3117

Boise, Idaho, November 1, 1912.

Hon. A. E. Robinson,
State Engineer,
Boise, Idaho.

Sir:--

Pursuant to your instructions, on October 29th, 1912, I made examination, so far as weather conditions would permit, of the distribution system of the Fort Hall Irrigation Project, constructed under Permit No. 3117 by the Indian Service.

Mr. Dietz, Superintendent of Irrigation for the U. S. Indian Service, under whose immediate direction the construction work was carried on, met me at Blackfoot and drove with me over the system. We drove to the headgates of the upper and lower canals, the former heading in Section 11 and the latter in Section 12, of Township 4 South, Range 35 East. Thence we drove to Pocatello, visiting all the main structures enroute, including the large syphon running along the south side of Section 34, T. 5 S. R. 34 E.

I have gone over the voluminous answers to questions numbered 4 and 8, as filed by the permit holder in connection with the proof of completion relative to the construction work undertaken in connection with the work of diversion under Permit 3117 and find that the work, so far

as I was able to examine it, is in accordance with the statements made therein. In my opinion the work is in substantial compliance with the terms of the permit.

. It was impossible, at the date of my inspection, to visit the site of the reservoir dam, located in Townships 5 and 6 South, Range 41 East and Township 6 South, Range 42 East, owing to adverse weather conditions, heavy snow having fallen a few days previously.

Respectfully submitted,

Chief Clerk.

W/C.

Permit #3117

H. W. Dietz,
Asst. Engr.,
Fort Hall Project,
Fort Hall, Idaho.

Sir:--

With reference to examination of work in connection with the above permit, would say that a representative from this office will arrive at Fort Hall on next Wednesday morning about 8 O'clock. Will you kindly make necessary arrangements to have some one assist from your Department in making the examination?

Very truly yours,

State Engineer

DEPOSITION OF HOLDER.

Question 1.—State your name, age, residence, occupation and postoffice address.

Answer. Evan W. Ester, age 48 years, residence at Fort Hall,

Idaho, Superintendent of Indian school, P. O. Fort Hall, Idaho.

Ques. 2.—If acting in behalf of a corporation, state its name, principal place of business, your position with reference to same, and your authority for appearing in its behalf.

Ans. In behalf of the United States Commissioner of Indian Affairs, Washington, D.C., acting as agent for the same and under authority of letter requesting such action to be taken.

Ques. 3.—State number and date of permit, amount of water you are authorized to divert, source, and point of diversion. Permit #3117; Sept. 14th, 1907; surplus waters of Blackfoot River to the extent of 200,000 acre feet stored in Blackfoot Marsh, equivalent to a continuous flow of 7280 second feet per annum; diverted at a point 1200 feet N. 22-10' E. to the N.E. corner of Section 13; also at a point distant 1700 feet S. 69-40' E. from the N.W. corner of Section 14 both in T. 3 S. R. 35 E. S. 4.

Ques. 4.—State purpose for which water is to be used, and, if for irrigation, state the number of acres and give description of the land you intend to reclaim.

Ans. Irrigation and domestic.

74452.59 acres described in accompanying list.

Ques. 5.—State whether or not the water has been turned into your works of diversion, and, if so, when and to what extent.

Ans. Water turned into present works of diversion on Upper Canal, June 1910 of Lower Canal, June 1911. Water was diverted by temporary gates several years prior to these dates.

Ques. 6.—State whether or not the works of diversion are fully completed, and whether or not they comply in all respects with the terms of the permit.

Ans. The works of diversion are fully completed and comply with permit.

Ques. 7.—If the works of diversion do not comply with all the terms of your permit, state fully those particulars in which there is any variance.

Ans.

RECEIVED
SEP 26 1912
OFFICE OF STATE ENGINEER

Ques. 8.—Give description of works, state dimensions and capacity of each part, and give cost of same.

Ans. See accompanying description and list of features.

(Sign here.)

Evan W. Ester

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was

subscribed and sworn to before me, at my office in Pocatello, County

of Bannock, State of Idaho, on this 16th day of

September A. D., 1912.

PROOF OF COMPLETION OF WORKS,

ANSWER TO QUESTION #8.

CONTAINING :-

1:-Description of works,accompanied by photographs of working plans and completed structures;profiles of all canals and laterals.

2:- List of all features showing dimensions,capacity, and cost of each.

3117

THE FORT HALL IRRIGATION PROJECT.

The Fort Hall Irrigation Project obtains its water supply from two sources, i.e. 30,000 inches from the Snake River, and the stored flood waters of the Blackfoot River. The delivery of the Snake River water is controlled by a set of concrete headgates located at a point about one and a half miles west of Shelley, Idaho. These gates are five in number and are five feet wide and eight feet high and will deliver 600 cubic feet per second. The water is carried by the Idaho Canal to the Blackfoot River to a point about four miles above the Blackfoot diversion. This canal is thirty feet wide on the bottom and has banks six feet high built on a slope of 2 : 1. The canal has a grade of about .03' per hundred feet.

There are but three structures on the Idaho Canal, owned by the government, besides the headgates on the river, though it is crossed by numerous bridges, flumes, syphons, etc., owned by other companies and individuals. A concrete rating section is built about 1000' below the headgates and is used for the purpose of gaging the canal in accordance with the requirements of the State Water Commissioner.

The Sand Creek Wastegates are used to control the flood waters of Sand Creek which discharges through the Idaho Canal. These gates are built of concrete with steel shutters.

The Idaho Canal crosses over the Eastern Idaho Canal by means of a double channel Maginnis steel flume, which has concrete inlet and outlet.

The flood waters of the Blackfoot River are stored by means of a dam and reservoir located about forty miles southeast of Blackfoot. The dam is located near the center of Section 12, T.5 S., R.40 E., B. M. It is a combination loose rock fill and hydraulic fill type of dam. The rock was obtained from the spillway and the tunnel, and the earth from a point near the spillway end of the dam.

The loose rock portion of the dam is built with the upstream face sloping 1 : 1., and the down stream face $1\frac{1}{4}$: 1. The top width of this portion is five feet and the bottom width 100.6'. The height is 43 ' above the bedrock which was uncovered at an average depth of three feet below the bed of the river. At the upstream toe of the rock fill a concrete wall was built extending well into the solid rock in the river bed and rising three feet above the bed into the dam. This wall was carried up the ends to the top of the dam, making a complete cut off on the ends and bottom of the dam.

The hydraulic portion of the dam, acting as a blanket for the rock fill is placed with an upstream face sloping 3 : 1. The top width of this portion is 15 ' and the bottom width 100.6'. This fill is also faced with about 18" of broken stone to withstand the wave action of the res-

ervoir. The two fills together give a dam twenty feet wide on top, 201.3' wide on the bottom, 290.8' long at the crest, and forty feet high.

The spillway is built around one end of the dam, in solid rock. It is fifty feet wide and will carry water to a depth of ten feet when the water in the reservoir is at the elevation of the crest of the dam. A concrete wall protects the dam from the wash of the water in the spillway.

The discharge from the reservoir is controlled by means of two Coffin gates at the entrance to a tunnel which carries the water around one end of the dam. This tunnel is built in solid rock and is lined throughout with concrete. It is two hundred feet long and is nine feet wide and ten feet high.

The reservoir is located mainly in T.5 S., T.6 S., R. 41 E., and T. 6 S., R.42 E. B. M. When filled the reservoir will create a lake 16 miles in length and 5½ miles in width at the widest part. At the elevation of the spillway the reservoir covers 15,000 acres and has a capacity of about 200,000 acre feet. The drainage area of the watersheds into the reservoir is about 666 square miles. At the beginning of the irrigation season of 1912 the water had reached an elevation one foot lower than that of the spillway. The reservoir contained about 185,000 acre feet at that elevation.

The water from the reservoir is carried to the lands to

be irrigated by the Blackfoot River to a point about two miles east of Blackfoot. A second diversion is made at a point a mile farther down the river where the Lower Canal headgates are located.

Both of these diversions are made by means of loose rock dams, and are controlled by concrete headgates and spillways. The Upper Canal Enlargement headgates are made of concrete with wooden shutters and Vulcan lifts. There are six headgates to the canal, each 4' x 7', and three gates to the spillway, each 4' x 8'. The canal gates will deliver 450 cubic feet per second without pressure. The Lower Canal gates are made of concrete with steel shutters which are fitted with Western Headgate frames and lifts. There are five gates each 5' x 5', and three gates to the spillway, each 4' x 4'. The canal gates will deliver 300 cubic feet per second without pressure.

The Upper Canal Enlargement and the Upper Canal Extension carry the water along the foothills on the eastern edge of the project and together with their lateral systems irrigate about 5000 acres in the vicinity of Fort Hall, and 18,000 acres lying between Rossfork Creek and the Port Neuf River. The Lower canal and its laterals irrigate about 27,000 acres lying between the Blackfoot River and Rossfork Creek.

The Upper Canal Extension is carried under Rossfork Creek by a reinforced concrete syphon. This syphon is 133' long and is composed of two rectangular barrels, each one measuring 4' x 7'6" inside dimension. The syphon is fitted with two sets of gates,

one controlling the flow of water through the syphon and the other being used as a wasteway into Rossfork Creek.

About 15,000 acres of the land between the port Neuf River and Rossfork creek is watered by a system of laterals receiving their water through a reinforced concrete syphon which carries the water from the Upper Canal Extension to a controlling ridge about a mile west. This syphon is under a maximum pressure head of twenty-six and a half feet. The syphon is circular in shape being six and a half feet in diameter; inside measurement, it is 4500' in length.

The accompanying maps show the location of the various laterals and canals; and the following list gives the structures occurring on each together with the cost of the same. The blueprints of the profiles of the canals and laterals show all the elements of each. Photographic reductions of working plans of the structures, together with photographs of completed works give a fair idea of the general character of the work on this project. Only the more important and representative type of structures have been shown.

PERMIT NO. 3117

3117

Proof of Completion of Works.

DEPOSITION OF WITNESS.

Question 1.—State your name, age, residence, occupation and postoffice address.

Answer. H. W. Dietz, age 33, Fort Hall, Idaho, Assistant Engineer, U.S.I.S.

Ques. 2.—Are you acquainted with E. W. Estep, the holder of Permit No. 3117, authorizing the diversion of 200,000 acre feet stored water equivalent to 280 second-feet of the waters of Blackfoot River, at head of Lower and Upper Canals for domestic purposes? How long have you known him, and where does he reside?

Ans. Yes. About three years. Fort Hall, Idaho.

Ques. 3.—Have you read or heard read said Permit No. 3117, and are you familiar with its terms and conditions?

Ans. Yes.

Ques. 4.—(If for irrigation purposes). Are you acquainted with the land proposed to be irrigated under said permit? If so, describe same, state its character, and give your estimate of the amount of water required for its profitable cultivation.

Ans. For description see accompanying list. Land is of good quality and very suitable for agricultural purposes. It requires about three acre feet per acre per annum for profitable cultivation.

Ques. 5.—Are the works of diversion fully completed and of sufficient capacity to convey the entire amount of water set out in the permit from point of diversion to place of use?

Ans. Yes.

Ques. 6.—Describe the works of diversion as they now exist, and give your estimate of their capacity.

The headgates on the Blackfoot River are built in a substantial manner of concrete and steel and are ample for all water needed. The upper canal headgates will divert 450 second feet. The Lower Canal headgates will divert 300 second feet. The system of canals and laterals built to carry the water to its place of use are all built in earth in an efficient and substantial manner. All structures of the distribution system are concrete and conform to the best modern engineering practices. The capacity of the system is sufficient to furnish the water required.

PROOF OF PUBLICATION

STATE OF IDAHO,
COUNTY OF BANNOCK.

SS.

NOTICE OF PUBLICATION.

Notice is hereby given that at 2 p. m. on the 16th day of September, 1912, at Pocatello, County of Bannock, State of Idaho, before Theo. Turner, N. P., proof will be submitted of the completion of works for the diversion of 280 cubic feet per second of the waters of Blackfoot river, in accordance with the terms and conditions of a certain permit heretofore issued by the State Engineer of the State of Idaho.

1. The name of the person or corporation holding said permit is United States Commissioner of Indian Affairs.

2. The postoffice address of such person or the place of business of such corporation is Fort Hall, County of Bingham, State of Idaho.

3. The number of such permit is 3117, and the date set for the completion of such work is Sept. 14, 1912.

4. Said water to be used for irrigation and domestic purposes.

5. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of intended use, in accordance with the plans accompanying the application for such permit, is 280 cubic feet per second.

6. The amount of lands for which said water is available is 75,000 acres, particularly described as follows:

T. 3 S. R. 34 E., Sections 23, 24, 27, 28, lying south of the Blackfoot river;
23, NE $\frac{1}{4}$.
25, 26, 34, 35 and 36, all.
T. 3 S. R. 35 E., Sections 8, 9, 10, 17, and 18, lying south of the Blackfoot river:

16, 17, 19, 20.
29, 30, 31, all.
15, W $\frac{1}{2}$; N $\frac{1}{2}$ NE $\frac{1}{4}$; SW $\frac{1}{4}$ NE $\frac{1}{4}$ and W $\frac{1}{2}$ SE $\frac{1}{4}$.

21, NE $\frac{1}{4}$; NW $\frac{1}{4}$; SW $\frac{1}{4}$; W $\frac{1}{2}$ SE $\frac{1}{4}$.

Hon. A. E. Robinson,
State Engineer,
Boise, Idaho.

Dear Sir:-

We are this day sending you by express the proof of completion of works by the United States Commissioner of Indian Affairs, under permit No. 3117, together with the proof of publication.

Kindly send us a statement of the amount of your fees in this matter, and we will send you a check therefor.

Very truly yours,

DEPARTMENT OF THE INTERIOR
UNITED STATES INDIAN SERVICE

Fort Hall Irrigation Project,
Fort Hall, Idaho.

September 18th, 1912

Mr. A. E. Robinson,
State Engineer,
Boise, Idaho.

Dear Sir :-

relative to the inspection of this project I wish to state that it would be well to make the same as soon as possible for the reason that the dam and reservoir are at an elevation of 6266 feet and subject to very cold and disagreeable weather at an early date. It would be well to notify me a few days in advance so I can make my arrangements accordingly.

Very respectfully,

H. W. Dietz

Assistant Engineer.

3117

Boise, Idaho, Sept. 13, 1912.

Re: Permit # 3117

Mr. H. W. Dietz,
Asst. Engineer,
Fort Hall, Idaho.

Dear Sir:--

Replying to yours of September 12th, would state that the project will be inspected by an engineer from this office and it is not necessary that the inspection be made prior to September 16th. The engineer I will detail for this work will call on you at Fort Hall when he is ready to make the inspection.

Very truly yours,

R/B

3117

DEPARTMENT OF THE INTERIOR

UNITED STATES INDIAN SERVICE

Fort Hall Indian Reservation
Fort Hall, Idaho

September 12th, 1912

Mr. A. E. Robinson,
State Engineer,
Boise, Idaho.

Sir :-

I wish to call your attention to the fact that the date set for the making of proof of completion of the Fort Hall Project is September 16th. As yet we have had no inspection by an engineer as provided for in section # 3258 of the civil code. Kindly inform me if such inspection is necessary and what may be the outcome if it is not made before the date set.

Very respectfully,

Assistant Engineer

September 5, 1912.

Permit 3117-U.S.Dept.Indian Affairs

W: P. Havenor,
Pocatello, Idaho.

Sir:-

In reply to your letter of the 1st inst. would say that permit is to be made under the above numbered permit September 15th. This is, no doubt, the permit to which you refer. The permit calls for a dam on Blackfoot river, 35 ft. high, capacity of reservoir 200,000 acre feet and conduit.

Very truly yours,

State Engineer.

By...

3117

Pocatello Water Users' Association

POCATELLO, IDAHO, Sept. 2nd 1915

A. E. Robinson, State Engineer,
Boise, Idaho.

Dear Sir:

We note that the Indian department is advertising to make
proof for completion of works for the irrigation system under
which we secure our water.

Will you kindly advise us what are the needs specified in
the application for your canal system.

Very truly,

W. P. Havenor
Secretary.

DEPARTMENT OF THE INTERIOR

UNITED STATES INDIAN SERVICE

For the Indian Service
Boise, Idaho

August 14th, 1912.

Mr. A. E. Robinson,
State Engineer,
Boise, Idaho.

Sir :-

Kindly inform me if the list submitted in making p
proof of completion should include all lands shown in the
original application or should be revised to correspond with
final locations. Also please state if such revised lists should
retain such lands as are susceptible of being irrigated by
pumping from the system.

Very respectfully,

Assistant Engineer.

August 13, 1912.

Permit 3117

H. W. Dietz,
U.S. Indian Service,
Fort Hall, Idaho.

Sir:-

In reply to your letter of the 12th inst. would say that, when the works of diversion are fully completed within the time specified in the permit, the proof of completion of works can be made at a later date than set out in the permit. However, at the time proof is made, an affidavit should be filed showing the works were fully completed by September 14th and state the reason proof was made at a later date.

Very truly yours,

State Engineer.

NOTICE OF PUBLICATION.

Notice is hereby given that at 2 p. m. on the 14th day of September, 1912, at Pocatello, County of Bannock, State of Idaho, before Theo. Turner, N. P., proof will be submitted of the completion of works for the diversion of 280 cubic feet per second of the waters of Blackfoot river, in accordance with the terms and conditions of a certain permit heretofore issued by the State Engineer of the State of Idaho.

1. The name of the person or corporation holding said permit is United States Commissioner of Indian Affairs.
2. The postoffice address of such person or the place of business of such corporation is Fort Hall, County of Bingham, State of Idaho.

3. The number of such permit is 3117, and the date set for the completion of such work is Sept. 14, 1912.

4. Said water to be used for irrigation and domestic purposes.

5. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of intended use, in accordance with the plans accompanying the application for such permit, is 280 cubic feet per second.

6. The amount of lands for which said water is available is 75,000 acres, particularly described as follows:

T. 3 S. R. 34 E., Sections 23, 24, 27, 28, lying south of the Blackfoot river:

33, NE $\frac{1}{4}$.
25, 26, 34, 35 and 36, all.

T. 3 S. R. 35 E., Sections 8, 9, 10, 17, and 18, lying south of the Blackfoot river:

16, 17, 19, 20.
29, 30, 31, all.

15, W $\frac{1}{2}$; N $\frac{1}{2}$ NE $\frac{1}{4}$; SW $\frac{1}{4}$ NE $\frac{1}{4}$ and W $\frac{1}{2}$ SE $\frac{1}{4}$.

21, NE $\frac{1}{4}$; NW $\frac{1}{4}$; SW $\frac{1}{4}$; W $\frac{1}{2}$ SE $\frac{1}{4}$.
28, NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

32, NE $\frac{1}{4}$; W $\frac{1}{2}$ SE $\frac{1}{4}$; W $\frac{1}{2}$.
T. 4 S. R. 34 E., Sections 1, 2, 3, 9, 10

11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 75, 36, all.

4, S $\frac{1}{2}$.
5, SE $\frac{1}{4}$.

8, E $\frac{1}{2}$.
18, SE $\frac{1}{4}$.

T. 4 S. R. 33 E., Sections 25, 36, E $\frac{1}{2}$.
T. 4 S. R. 35 E., Sections 6, 7, 18, 19.

20, 29, 30, 31, 17, all.
5, W $\frac{1}{2}$.

8, W $\frac{1}{2}$; NW $\frac{1}{4}$ of SE $\frac{1}{4}$; S $\frac{1}{2}$ SE $\frac{1}{4}$.
16, SW $\frac{1}{4}$ NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

32, NW $\frac{1}{4}$, W $\frac{1}{2}$ SW $\frac{1}{4}$.
T. 5 S. R. 34 E., Sections 1, 2, 3, 4, 5, 6,

7, 8, 9, 10, 11, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33, 34, all.

12, W $\frac{1}{2}$; NE $\frac{1}{4}$; NW $\frac{1}{4}$ SE $\frac{1}{4}$.
14, N $\frac{1}{2}$; SW $\frac{1}{4}$; SW $\frac{1}{4}$ SE $\frac{1}{4}$.

23, W $\frac{1}{2}$.
26, W $\frac{1}{2}$.

35, W $\frac{1}{2}$ NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.
6, N $\frac{1}{2}$; NW $\frac{1}{4}$ SW $\frac{1}{4}$.

5, W $\frac{1}{2}$ NW $\frac{1}{4}$.
T. 6 S. R. 34 E., Sections 3, 4, 5, 8, 9.

10, 15, 16, 26, all.
2, W $\frac{1}{2}$ NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.

6, SE $\frac{1}{4}$ NW $\frac{1}{4}$; NE $\frac{1}{4}$; N $\frac{1}{2}$ NW $\frac{1}{4}$.
7, E $\frac{1}{2}$ NE $\frac{1}{4}$.

11, W $\frac{1}{2}$ NW $\frac{1}{4}$; W $\frac{1}{2}$ SW $\frac{1}{4}$.
14, NW $\frac{1}{4}$ W $\frac{1}{2}$ SW $\frac{1}{4}$.

17, NE $\frac{1}{4}$; NE $\frac{1}{4}$ SE $\frac{1}{4}$.
22, E $\frac{1}{2}$; NW $\frac{1}{4}$.

23, W $\frac{1}{2}$ NW $\frac{1}{4}$; SW $\frac{1}{4}$ SW $\frac{1}{4}$ SE $\frac{1}{4}$.
27, E $\frac{1}{2}$ NE $\frac{1}{4}$.

35, NE $\frac{1}{4}$.
36, SW $\frac{1}{4}$ NW $\frac{1}{4}$.

T. 4 S. R. 33 E., 24, E $\frac{1}{2}$.
T. 5 S. R. 33 E., 1, 2, 11, 12, 13, 14,

23, 24, 25, all.

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

U.S. Commissioner of Indian Affairs
c/o Theo. Turner,
Pocatello, Idaho

Boise, Idaho,

August 6, 1912.

Dear Sir:

I enclose herewith the following forms to be used in connection with proof of completion of works under your permit No. 3117.

Deposition of Permit Holder,
Depositions of Two Witnesses.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of your rights:

1. On Sept. 14th, the date set for proof of completion of works, the enclosed deposition forms (one for permit holder and one each for two witnesses) should be filled out and sworn to, at Pocatello, before Theo. Turner, M.P.

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice and fee of \$5.00, where amount claimed does not exceed 10 second feet. Where more than 10 second feet is claimed, the fee required is 30 cents per second foot. When these have been received, together with report of the examining engineer, if everything is properly executed, Certificate of Completion of Works will issue.

Yours truly,

A. E. ROBINSON,
State Engineer.

Permit 3117

Evan W. Estep,
U.S.Com. Indian Affairs,
Fort Hall, Idaho.

Sir:-

In checking the notice for completion of works under above permit I find that ~~section~~ 21 is not included in the permit. In order to include this land in the proof of completion of works, it will be necessary for you to file an application for amendment of the permit upon the enclosed form, such application to be accompanied by two copies of the map. I would say, however, that, in view of the fact that you you will, no doubt, be required to file an application for amendment at the time proof of beneficial use of water is made, I would advise that you strike out ~~section~~ 21 in the notice of proof of completion of works and include these lands in the application for amendment at the time final proof is made.

The notice is returned herewith for the certificate of an engineer.

Very truly yours,

State Engineer.

KNOW ALL MEN BY THESE PRESENTS, That the United States of America by George W. Woodruff, Acting Secretary of the Interior, is held and firmly bound unto the State of Idaho in the full and just sum of One Thousand Dollars, lawful money of the United States, to the payment of which sum, well and truly to be made, the said United States binds itself under the terms and conditions hereinafter set forth.

The terms of this obligation are such that whereas the said United States of America by an Act of its Congress approved March 3rd, 1907, (34 Stat. L., 1015-1024) authorized the Secretary of the Interior to acquire the lands, rights, and property which he might determine to be necessary to the success of any plan or project for the purpose of irrigating lands on the Fort Hall Indian Reservation in Idaho and those ceded by the Indians of said reservation, and whereas the said George W. Woodruff, Acting Secretary of the Interior, in pursuance of the authority conferred by said Act of the Congress, on the 3rd day of September, 1907 caused to be filed in the office of the State Engineer in Boise, Idaho, a certain application for permit to appropriate the public waters of the State of Idaho, the said application being thereupon numbered No. 4350, in accordance with which said application the State Engineer granted and issued to a duly authorized agent of the said United States a certain permit numbered No. 3117, a full, true, and complete copy of which application No. 4350 and permit No. 3117, is of record in the Office of the State Engineer in Book 9 of Permits, at Page 3117.

Now if the above bounden United States shall faithfully carry to completion the said work of diversion as specified in said application No. 4350 and permit No. 3117, in the manner and form prescribed therein and within the time therein allowed, then the above obligation to be void, otherwise to remain in full force and effect.

IN WITNESS WHEREOF, the said George W. Woodruff, Acting Secretary of the Interior, for and on behalf of the United States of America, has set his hand and the seal of the Department of the Interior, this thirtieth day of September, 1907.

Witnesses C. J. Grosvenor

George J. Hesselman

G. W. Woodruff
Acting Secretary of the Interior,
For and on behalf of the United
States of America.
