MEMORANDUM

TO: File 35-08803 / Beva Gay Gilbert
FROM: Brenda Chapman
DATE: February 27, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

E. FLOW CALCULATIONS

The domestic rate is reduced to coincide with the examiner's recommendation of an in-house only volume. This adjustment also concurs with the current guidelines for processing combination domestic and irrigation rights.

I. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irrigation	4-01 to 10-31	.04	Not listed
Domestic	1-01 to 12-31	.02	Not listed

See item E.

According to the application for permit, this land was also covered under a surface water supply (Progressive Irrigation District); however, the applicant stated that the "ditch had been abandoned". Even though the irrigation district water is not used, the fact that it is available must be addressed when licensing the permit.

Therefore, all volume recommendations are addressed in the remarks based on current supplemental groundwater processing procedures.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. P35-08803

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

You should be aware that the groundwater you propose to divert is located within a drainage basin where surface waters are regulated during the months of low flow. It is possible that diversion of groundwater may have an adverse impact on these surface water flows. Information available to us at this time does not warrant refusing to issue permits in your area, but we do caution that diversions of groundwater are not allowed to deplete flows available for surface water users with earlier priority dates. Siting your well as far from surface sources as possible and casing out upper water producing zones may reduce the potential of interference.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is a form entitled "Proof of

Beneficial Use" that must be submitted to the Department when your project is completed. If development is complete, you may submit proof of beneficial use immediately.

Sincerely,

GARY SPACKMAN, Supervisor

RE: Application for Permit No. 35-8803

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in the Post-Register. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

HAROLD W. JONES
Water Rights Supervisor

**NOTICE OF APPLICATION
FOR WATER RIGHT**

The Following application(s) have been
filed to appropriate the public waters of
State of Idaho:

**NOTICE OF PROPOSED CHANGE
OF WATER RIGHT
NO. 23-00013**

Notice is hereby given that Wade Fleming, Idaho Falls, ID, has applied to the Department of Water Resources for a change in point of diversion of the waters of Palisades Creek tributary to the Snake River. The right sought to be changed is evidenced by Decree No. 23-00013 Decreed to John N. Barrus in case of Rexburg Irrigation et al -vs- Teton Irrigation Canal dated 12-16-1910 and is recorded as follows:

AMOUNT: 2.80 cfs; PRIORITY: June 30, 1890

DECREE POINT OF DIVERSION: Not listed

The water is used to irrigate 267.5 acres within the SESE SEC 21; SW1/2SW1/4 SEC 22; N1/2NW1/4 SEC 27; NENE (LOT 1) SENE (LOT 4) SEC 28 T1N R44E, B.M.

TO BE CHANGED AS FOLLOWS:

The water will be diverted within the NWNE SEC 28 T1N R44E, B.M., Bonneville County and used to irrigate 111 acres within the S1/2SW1/4 SEC 22; N1/2NW1/4 SEC 27, T1N R44E, B.M.

Any protest against approval of the above proposed change of water right must be filed with the Idaho Department of Water Resources, 150 Shoup Ave., Idaho Falls, ID, 83402, on or before September 25, 1989.
