RE: EVALUATION OF RATE OF FLOW

DATE: August 24, 1990

=====

During the review of the examination report it was found that the system capacity nor the rate of flow was listed in the report.

The examiner reported that the irrigation system consisted of 24 lines with 6 sprinkler heads on each line. Only one line operated at a time. The nozzle sizes are 5/32 and operate at 25 psi. The type of nozzles was not given.

In reviewing the rainbird catalog only two nozzle types listed discharge at 25 psi. Both were listed as Adj series and both listed a discharge of 3.4 gpm.

Using this information shows that 6 heads will discharge 21 gpm or 0.05 cfs.

This amount will be used for both the capacity and the rate for irrigation use on the license.
