DESCRIPTION: Stock Pond

LOCATION: SWSE, Sec. 3, T3S, R41E

SOURCE: The pond collects water from a marshy area to the southwest which has several small streams running through it. Above the marshy area is an old beaver dam, and above this are several small streams coming from springs on up the hill. The water is located on State land.

OVERFLOW: The water leaves the pond through a wood chute under the road. The chute appears to be new this year and is in good shape. There is also an older chute on the edge of the pond which would help out if the water got too high. After leaving the pond the water works its way down to where it enters Homer Creek and leaves State land there.

CONDITIONS: Good+

GENERAL: Access is from the Long Valley Road about 10-12 miles from the Bone Store.
