RE: Application for Permit No. 25-7103 CROW

Mr. George C. Petersen, Attorney
485 "E" Street
Idaho Falls, Idaho 83401

Dear Mr. Petersen:

In an effort to solve the existing disagreements over the application filed by LeVon and Wilma Crow, the Crows have amended their application to cover only one home. The quantity of water to be appropriated has been reduced to 0.04 cubic feet per second as indicated by the enclosed copy of the front page of their application.

If the changes made in this application remove your objections to the granting of a permit by the Idaho Department of Water Resources, please contact this office prior to the hearing scheduled for May 31, 1978. If we have not heard from you before this date, the hearing will proceed as scheduled.

RE: LeVon J. Crow - Water Permit

Dear George:

C
O
P
Y
Please be advised that our office represents Mr. and Mrs. Crow who have brought your Protest to their Application in for review. I have reviewed all of the documents, including the Well Agreement, dated August 17, 1964, which provides for eleven building lots. As I understand the situation Mr. Crow signed the application to (1) insure that the water right is established for the lots of all parties, and (2) to insure that there remain ten undivided interests in the well and water.

It is my understanding that although there was a Well Agreement entered into between our clients August 17, 1964, an application for a permit was not filed by anyone until Mr. Crow did so recently. As you know, no water rights are being established without a permit and I feel it is in all parties' interests to have the water rights established.

Although I feel some of the issues raised in your protest are inappropriately brought before the Department of Water Resources and may ultimately have to be resolved in formal litigation, I would propose that we meet to possibly form a water users association or enter into an Agreement between the parties and have the permit assigned to the association.

I would be pleased to meet with you at your convenience in an attempt to resolve this matter.

Yours very truly,

HANSEN & BOYLE

Dear Mr. Crow:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 25-7103. You should be aware that the following are the principal items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

- (1) Will the proposed use reduce the quantity of water under existing water rights?
- (2) Is the proposed water supply insufficient for the purposes intended?
- (3) Is the application made in good faith or for delay or speculative purposes?
- (4) Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of 0.02 cubic feet per second of water for each acre of land, or an annual amount of 5 acre feet for each acre of land, unless the applicant can show that more is required (Section 41-202, Idaho Code).

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf.

If we may be of any assistance, please contact us.

Very truly yours,

Mr. George Petersen
Attorney at Law

Dear Mr. Petersen:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

- (1) Will the proposed use reduce the quantity of water under existing water rights?
- (2) Is the proposed water supply insufficient for the purposes intended?
- (3) Is the application made in good faith or for delay or speculative purposes?
- (4) Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

Very truly yours,

PROTEST TO APPLICATION FOR WATER PERMIT

The undersigned, individually and jointly, hereby protest the granting of that certain application for water permit filed with the Idaho Department of Water Resources, 1515 Lincoln Road, Idaho Falls, Idaho 83401, by LeVon J. Crow and/or Wilma L. Crow, husband and wife, Idaho Falls, Idaho, on March 31 1977, and assigned Application No. 25-7103 for a permit to appropriate 0.20 cubic feet per second of water from ground water resources by means of well and pump within the Southeast Quarter of the Southeast Quarter (SE $\frac{1}{4}$ SE $\frac{1}{4}$) of Section 19, Township 3 North, Range 38 East Boise Meridian, Bonneville County, Idaho, for ten (10) families situated on part of the above described tract, on the grounds and for the reasons hereinafter specifically detailed:

WHEREAS, on the 17th day of August, 1964, the then owners of the real property the subject of that certain application described in the previous paragraph entered into a Well Agreement, a machine copy of which agreement is attached hereto, marked Exhibit "A", and made a part hereof as if set out verbatim, and

WHEREAS, three of the original tracts included in that certain well agreement above described have been withdrawn by the current owners of said tracts, in that said parties have made other arrangements for domestic water and therefore have no need to claim that certain water right reserved for said tracts in Exhibit "A" attached hereto, and

WHEREAS, the undersigned parties have caused to be prepared an appropriate Water Agreement for the protection of the balance of said users, that is, a total of seven (7), a machine copy of which proposed agreement, together with the tracts to be served by said existing well, is attached hereto, marked Exhibit "B", and made a part hereof as if set out verbatim, and

WHEREAS, the undersigned parties hereby protest that certain application described in the first paragraph above, on the grounds and for the reasons that said application is not specific as to which of the tracts of land are involved, and the specific water right reserved for each tract. That it has come to the attention of the undersigned parties that applicants (LeVon J. Crow and Wilma L. Crow, husband and wife) have made application for two permits and/or uses on their described tract, and thus upon said information and belief, the undersigned parties hereby allege that that portion of the application pertaining to two rights and/or uses for said tract of land of the Crows is void and improper, in that the rights applied for by the Crows for their tract of real property being purchased from the Prices are in violation of that certain water agreement the subject of Exhibit "A" attached hereto, and are further in violation of the county zoning laws and the appropriate laws of the State of Idaho.

Based upon the facts as heretofore detailed, together with the understanding of said protestant's facts as above described, the undersigned protestants hereby protest the granting of that certain application for water permit the subject of Application No. 25-7103, on the grounds and for the following reasons:

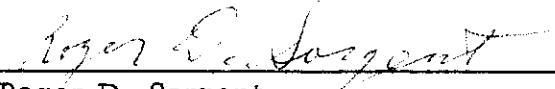

1. Protestants oppose the granting of ten rights, in that under Exhibit "A" above described, there were a total of ten rights, that is, one right for each tract, and since three of the original tracts have withdrawn as above detailed, there are only seven remaining tracts that have claim to the well in question and thus only seven rights should be the subject of said application, with an equal right to each of said seven remaining tracts claiming an interest in said well.

2. That the application of the Crows for two rights to their tract of land should be denied, in that the current zoning laws of Bonneville County, State of Idaho, permit only one resident on each of said seven tracts described in protestants' Exhibit "B" attached hereto. That if the application of applicants is accepted as filed, on the face of said application the State of Idaho is permitting and/or encouraging the violation of the appropriate laws of the County of Bonneville, all of which certainly is in violation of the laws of the State of Idaho and the public policy thereof.

3. That the application filed by applicants is not proper in that applicants have only an equitable interest in said property and are not the legal title owners of the real property tract on which said well is situated.

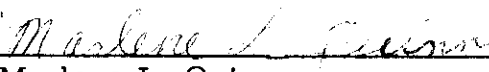

4. That the application is not proper in that all of the parties that have an interest in said well have not joined in said application.

IN WITNESS WHEREOF, the parties hereto have hereunto set their hands the day and year in this agreement first above written.
