DATE: November 1, 1999

Transfer 5550 changes and adds a point of diversion under a portion of Right 25-02162, splitting the right into Parts A and B, and adds a second point of diversion under Right 25-07067. The transferred rights will be combined into a single system with a 292.0 acre permissible place of use.

The applicant has purchased the land associated with the transferred portion of Right 25-02162 and wants to use the existing well under Right 25-07067 and add a new well to the system. An expedited drilling permit, #25-99-E-0159-000, was issued for the new well.

Season of use and diversion volume under Right 25-02162 were identified under current standards. Right 25-02162B retains the licensed season of use and diversion volume. Recommended conditions include multiple points of diversion/measuring devices, future annual reporting, permissible place of use limits, irrigation overlap and standard transfer conditions.

Dear Mr. Parker:

One of the conditions of approval of your water Permit No. 25-7067 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before JUNE 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
