DEPARTMENT OF RECLAMATION

Re: Permit No. 28963 Date: July 1, 1965

Ronald M. Hunting
Menan, Idaho

Dear Mr. Hunting:

Under the terms of your Permit No. 28963 you are required to make proofs of completion of works and application of water to beneficial use on or before Sept. 1, 1965

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.

Re: Application for Permit

Dear Mr. Hunting:

Returned herewith is your application for permit.

The quantity of water claimed cannot exceed one miners inch.per acre of irrigated land. You show you will irrigate 240 acres and the quantity under No. 2 has been reduced to 4.8 cubic feet per second. More water can be claimed if more land is shown.

Kindly complete No. 7 and under 11 show the size of the main ditch, diameter of pipe, etc.

The time under 12 has been shown as 5 years, however, you can make your proofs at any time after the permit is issued.

Show existing water rights for this land under No. 15.

There is a filing fee of $5.00 for the first second foot plus $0.25 for each additional second foot or fraction thereof. In this case 4.8 second feet would require a fee of $6.00.

Kindly complete the application and return with the proper fee.
