35-7001

Dear Mr. Dunn:

Reference is made to your letter of April 24, 1970 and our subsequent telephone conversation of May 8, 1970 regarding the above captioned Permits and Licenses.

As we indicated to you on the phone, the 14,710 acre feet that you proposed to license as the water right of the City of Idaho Falls is inadequate in light of our experience with reference to total gallonage that we have pumped in past years. We are submitting a few random samples of the monthly reports which we maintain showing the total gallons pumped by each of the wells. These reports are summarized each year indicating that the following total gallons were pumped for the past 5 years:

1965	4,687,000,000 gallons
1966	5,507,000,000 gallons
1967	6,071,000,000 gallons
1968	6,215,000,000 gallons
1969	6,380,000,000 gallons

The 14,710 acre feet equals 4,792,944,590 gallons, and it is obvious that we have been pumping more than that for many years.

You have probably received a copy of the report from CH₂M by this time which should give you some better idea of the capabilities and demands of our system.

Please review your findings on these permits and advise us if you need any further information.

Very truly yours,

Dear Don:

Regarding the above-referenced permits and licenses, I have reviewed our files and the data transmitted by Mr. Evans' letter of May 8, 1970, and Water System Plan, Idaho Falls, Idaho, prepared by Cornell, Howland, Hayes and Merryfield (CH₂M). We now have in our files three letters stating the amount of water pumped by the City in 1968; however, each letter lists a different amount, each of which is different from the quantity indicated in the CH₂M report. For the purposes of licensing, I am assuming that the figure in Mr. Evans' May 8 letter to be correct.

The CH₂M report indicates the city system is essentially at capacity during peak periods and will require additional capacity to meet future demand. Considering this and the possibility of obtaining a higher use by encouraging off peak use by large users, I have determined that the following quantity can be licensed under the referenced permits:

Water pumped 1969	6,380,000,000 gallons	19,600 acre feet
Addition system capacity	192,000,000 gallons	600 acre feet
Total License	6,572,000,000 gallons	20,200 acre feet

The Department is ready to license Permit No. 25-2142 for 50.2 c.f.s. and Permit No. 25-2143 for 17.1 c.f.s., subject to a total annual volume withdrawal of 20,200 acre feet under these two permits and license numbers 25-2095 and 35-7001.

Re: Permit No. 16689.

Hon. Chase A. Clark
Mayor of Idaho Falls
Idaho Falls, Idaho

Dear Sir:

This will acknowledge receipt of the deposition of the holder, depositions of two witnesses, and the affidavit of proof of publication from the newspaper, all in connection with beneficial use proof under the above-numbered permit.

Before final action can be taken in this matter, the law requires that a field examination be made by an engineer from this department. We are unable to say just when this examination will be made, since the Department has but one field engineer who makes examinations all over the state.

However, Mr. Tolman, Field Engineer for this department, will contact you at the time set for examination so that you may show him over the grounds. After his report is on file in this office you will be further notified as to fees due before the issuance of your license.

Very truly yours,

BOISE, IDAHO, **October 14, 1929.**

DEAR SIR:

I enclose herewith the following forms to be used in connection with proof of completion of works under Permit No. 16689

DEPOSITION OF PERMIT HOLDER,
DEPOSITIONS OF TWO WITNESSES.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of the permit holder's rights:

1. On October 23, 1929, the date set for proof of completion of works, the enclosed deposition forms (one for permit holder and one each for two witnesses) should be filled out and sworn to, at Idaho Falls, before Ralph L. Albaugh.

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice.

When these have been received, together with report of the examining engineer, if everything is properly executed, you will be further advised as to fees due, etc., before certificate is issued.

Yours truly,

GEO. H. CARTER
Commissioner of Reclamation.

Re: Permit No. 16689.

Mr. A. J. Christensen,
City Engineer,
Idaho Falls, Idaho.

Dear Sir:-

Referring to your letter of the 14th inst. would say that, under the terms of the above numbered permit, proof of completion of works is not required until May 23, 1932, and proof of beneficial use of water May 23, 1938. However, if you are ready and desire to make proof before the time specified in the permit, you may do so.

The date for making proof should be set far enough ahead to allow for five publications of the notice, such notice to be published in any newspaper published in the county in which the works are located. Proof may be made before any notary public or other officer authorized to administer oaths.

The notice enclosed in your letter is herewith returned for completion as above set forth. Blank for notice authorizing publication is also enclosed. The name of the paper in which you wish to publish should be given.

Very truly yours,
GEO. H. CARTER
Commissioner of Reclamation.

Re: Application 23549-16689

MR. E. R. UNDERHILL
City Clerk
Idaho Falls, Idaho

Dear Sir:

The application of the city of Idaho Falls for permit to appropriate fifty cubic feet per second of water from a subterranean supply is returned for completion.

The following requirements should be met: Maps should be furnished in duplicate, one of which must be a tracing and the other may be a blueprint. The maps should show in addition to the general requirements, found in printed instructions inclosed, the boundary of the corporate limits of Idaho Falls, the location of the well or wells proposed, the location of the point of return of whatever part of this water will be returned to Snake River, location of reservoirs or standpipes, as same may be contemplated and possibly location of large mains which will distribute the water.

Sixty days are allowed by statute from this date of return to you for the completion of the application and putting it into final form, which makes it eligible to approval and recording as a permit in this office.

Yours very truly,

Commissioner of Reclamation
