RE: CONDITIONS OF APPROVAL

Steve McGrath has constructed a pond near Rainey Creek. This pond is part of the landscaping plan he has for this property. I inspected the pond after the excavation had been made. At the time of my inspection the pond was nearly full of water and there was no diversion works on the creek. It is my opinion that the diversion from Rainey creek will primarily be to assure adequate oxygen for the fish in the pond and will have little or no impact on the creek. Also, a 1996 priority water right, if it is determined to impact other rights, would be shut off rather than reduced to some measured amount. Consequently, I do not think the permanent measuring device is justified. I would suggest we change condition 5. To read; if the watermaster determines it is necessary in the regulation and distribution of water on Rainey creek, he may order the installation of a permanent measuring device as part of the diversion works.

Condition 5. also should be changed. Suggestion: During times when water is not available under this right it may be necessary to acquire stored water through purchase, or rental from the Water District 1 Rental Pool.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 23-07169

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Condition #4 of your water right permit requires that the permit holder install a permanent measurement device to measure water coming and going from your reservoir. This condition must be complied with before the department conducts the license examination.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

If you have questions concerning the field examination or measurement device requirement, please contact the **EASTERN** Regional Office in Idaho Falls, at (208)525-7161.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

RE: PERMIT NO. 23-07169 -- PERMIT APPROVAL NOTICE

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "Conditions of Approval and Remarks" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Please note that a separate stream channel alteration permit must be obtained from the IDWR prior to any activity in the stream channel other than construction or maintenance of the diversion structure for your water right(s). Applications for stream channel alteration permits must be filed at least sixty days prior to the commencement of work in the stream.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address PRIOR TO July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address AFTER July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

RE: Application 23-07169

I have implemented your suggestion for Condition No. 5. I have also added the use "recreation" to the "recreation storage" and "diversion to storage" uses. Although it was not advertised this way, Ron Carlson's description makes me think that the intended use may be flow-through water as well as (or instead of) storage. I do not think re-advertising and advancing the priority are necessary for this kind of clarification. Please let me know if you do not concur.

TO: FILE 23-07169

FROM: RON CARLSON *RC*

Stephen McGrath has applied to appropriate 10 AF of water from Rainey Creek. In the application he proposes to divert water from Rainey creek to maintain a two acre pond for recreational purposes. I have been on site after the excavation for the pond had been completed. At that time the pond was not connected to the creek but was essentially full of water. The water diverted from Rainey Creek will primarily provide oxygen for the fish the applicant plans to raise in the pond. It is my opinion that there will be no significant evaporative component to this use of water and will not interfere with any other water use on Rainey creek.

RE: Notice of Application for Permit: 23-7169

Dear Applicant:

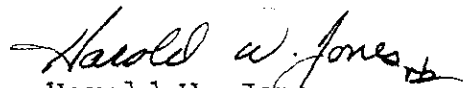

The Department of Water Resources acknowledges receipt of your water right application. This office is currently in the process of advertising the application in the Post Register on June 20 & 27, 1996. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our State Office in about five weeks. State Office Personnel will conduct a complete review prior to final processing of the applications and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Harold W. Jones
Water Right Supervisor
