SUBJECT

Although our information indicates Mr. Ford will eventually have to amend the source of water for this right, I recommend we proceed with final action on the application as submitted. The conditions for the permit will be the same in either case. Also, we will probably be more effective implementing the change with a licensing amendment, since Mr. Ford has not replied to any of our letters suggesting he amend the application.

RE: Application for Permit No. 23-7029 and 23-7065

Milo Ford
Irwin,
Idaho 83428

Dear Mr. Ford:

This office has decided the above captioned applications can be forwarded to Boise for final action, thereby waiving our original intent that arrangements for rental of storage precede approval of the applications. However, as demand for the spring water increases with development of Maple Groves Estates, it will be necessary for you to rent water from Water District No. 1.

Although, application No. 23-7029 has already been forwarded for final action, based on a field inspection by John Kappelman, formerly of this office, it will be necessary to amend application 23-7065 prior to recommending it for final action. For your convenience, we have enclosed a completed amended application changing the source under Item 2 from unnamed creek to springs tributary to Snake River. Please initial this change, sign the application and return it to this office accompanied by a check for \$20.00 as payment of the statutory amendment fee.

To expedite regional processing of the amended application, we urge you to give this matter your immediate attention.

Respectfully submitted,

ERNEST CARLSEN
Assistant Regional Supervisor

Dear Mr. Ford:

Subsequent to a recent field inspection by Mr. John Kappelman, enclosed is a copy of your original application and a typed amended application for permit. The amended application changes the source of water to be consistent with the proposed development as confirmed by Mr. Kappelman.

Once you have reviewed the amended application, initialing any changes which you make, please sign it where indicated, and return it to this office accompanied by a check for \$20.00 as payment of the statutory amendment fee.

Prepermit Exam

- 1) Applicant intends to develop 2 springs with spring headboxes and pipelines.

Source should be changed to "springs"

- 2) Applicant is aware that he will probably have to rent storage water. (The present ^{flow} ~~capacity~~ of the two springs is not more than 25 gpm, combined.)

Applicant is considering the possibility of drilling a well at the top of the hill above the planned housing development. Because he is concerned about water quality problems arising in the spring located downhill from the houses.

I advised Mr. Ford to file an application for his well.

MEMO

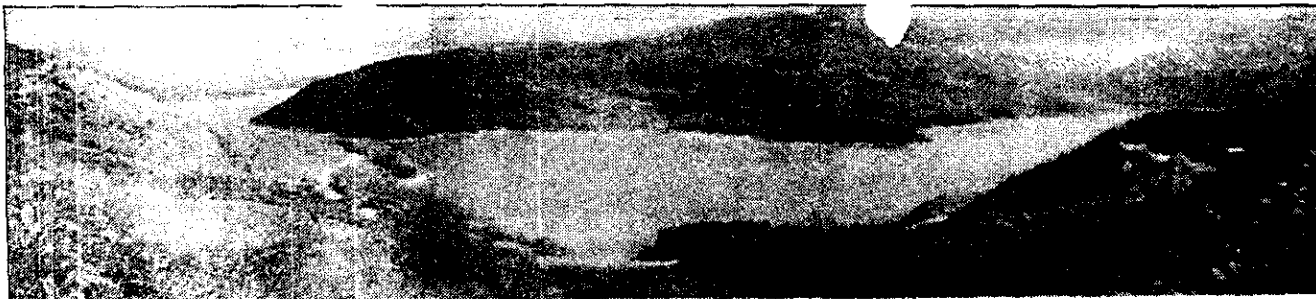

TO: File No. 23-7065

From: Ernest Carlsen *EMC*

I would like a prepermit exam conducted on this application to determine the following items:

1. The description of the diverting works and the map suggest the applicant intends to develop two springs, while the source of water list an unnamed creek tributary to the Snake River. What is the correct description for the source of water?
2. Although the applicant has indicated this would be supplemental water for a development containing 35-45 homes, I don't think there is sufficient water to justify the development unless the applicant rents storage water from the Water District. To varify this, we need a description of the system and how the applicant intends to use the water.

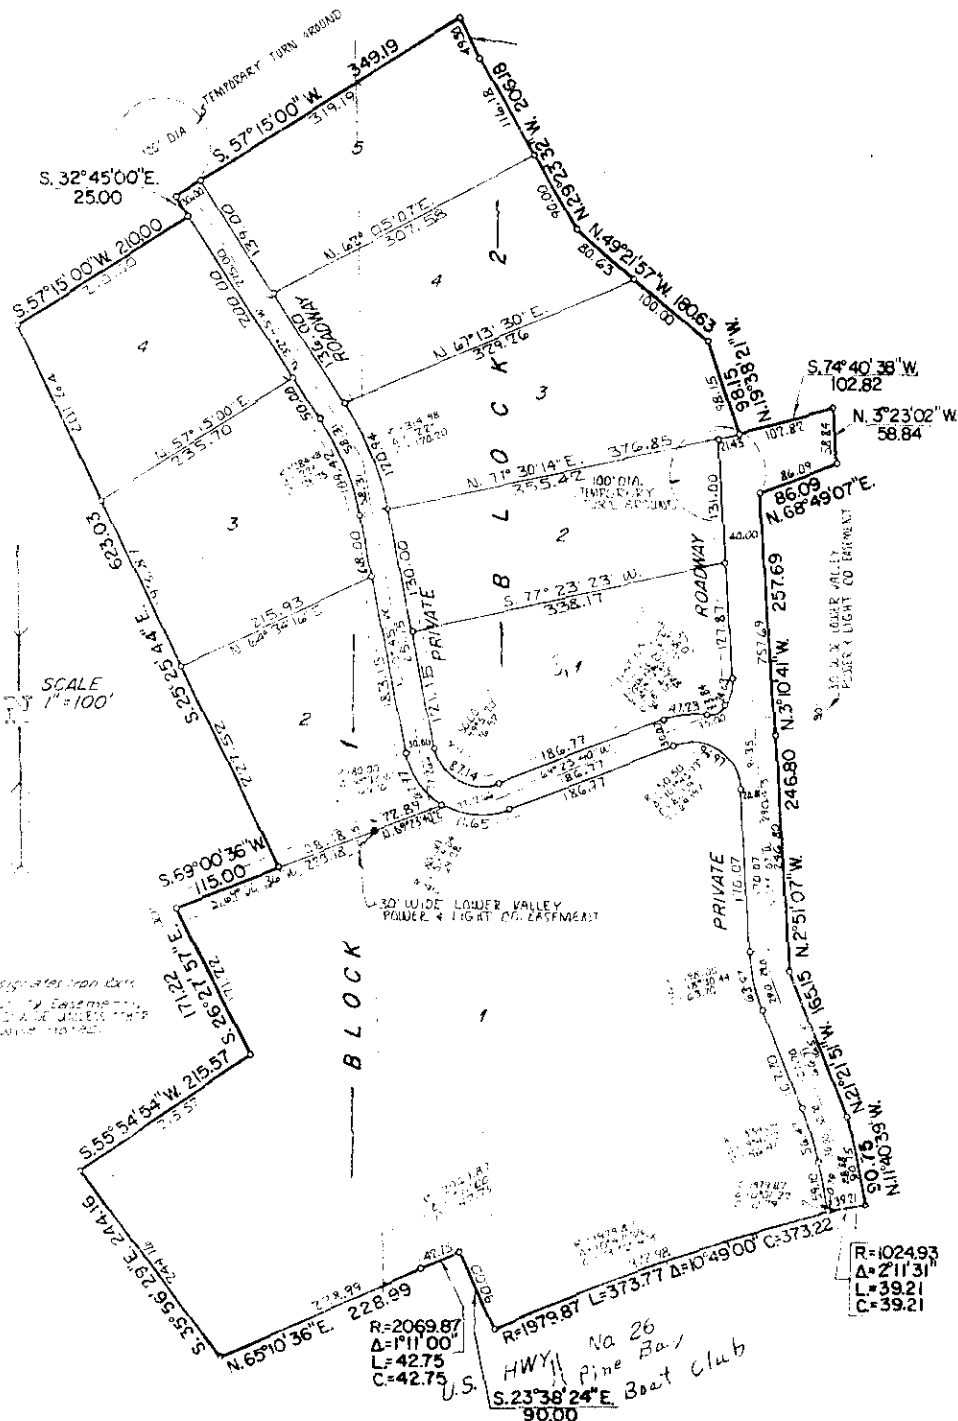

Although our policy has been to approve domestic developments within water districts by limiting them to inhouse use, this was limited to a single family residence and would result in the use of a couple thousand gallons per day. The demand for water on a domestic system involving 35 to 45 homes and possibly some storage facilities could easily result in the continual use of 0.02 cfs or 13000 gallons per day. Under such a system, controlled by the watermaster, the applicant probably should be required to rent up to 1 acre foot per dwelling &/or 1.2 acre feet if lawn and garden irrigation is involved.

(Bonneville County)

Dear Mr. Ford:

We have been apprised of your application for a permit to appropriate the public waters of the State of Idaho to provide domestic water to 45 families (individual connections).

By regulation your proposed water system is defined as "public-community" and, therefore, subject to the Idaho Regulations for Public Drinking Water Systems. The regulations set forth minimum requirements for construction, water quality, monitoring, maintenance and operation. Further, the regulations (Section 1-8400.01) requires approval by the Department of plans and specifications for the water system prior to its construction. A copy of the regulations is enclosed for your information.

If we may be of assistance with interpreting the regulations, please do not hesitate to contact us.
