Dear Mr. Reese:

Our field examiner's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. 32200 shows the collection system is capable of conveying 2.25 miner's inches, or 0.045 c.f.s. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 (one) miner's inch per irrigated acre.

Upon receipt of the statutory fees, totaling \$5.00, we will issue the Certificate of Completion of Works for 0.045 c.f.s. and the License and Certificate of Water Right for 0.045 c.f.s., confirming the right, with priority of December 30, 1964, to the use of surface water with the point of diversion in NW¹/₄ NW¹/₄, Sec. 4, T. 1 N, R. 43 E, B.M. for domestic use.

Bruce W. Reese, District Ranger
683 N. Capital
Idaho Falls, Idaho

Dear Mr. Reese:

Our field examiner's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. 32200 shows the collection system is capable of conveying 2.25 miner's inches, or 0.045 c.f.s. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 (one) miner's inch per irrigated acre.

Upon receipt of the statutory fees, totaling \$5.00, we will issue the Certificate of Completion of Works for 0.045 c.f.s. and the License and Certificate of Water Right for 0.045 c.f.s. confirming the right, with priority of December 30, 1964, to the use of surface water with the point of diversion in NW1/4NW1/4, Sec. 4, T. 1 N, R. 43 E, B.M. for domestic use.
