Dear Mr. and Mrs. Mitchell:

Earlier this year you sent me correspondence in response to a request for information concerning the ponds which were developed under the above referenced permit. After considering the information you provided, I made a couple of changes to our initial recommendations and I believe we are ready to issue the license.

Enclosed is a draft copy of the license. Please note that the uses have been slightly changed to allow storage in the ponds during the non-irrigation season (listed as recreation storage). The annual volume listed for the recreation storage is 0.3 acre feet. This figure was calculated on pond dimensions.

If you do not concur with this proposal, please contact me within 10 days. If I do not hear from you within that time period, I will route the license for signature and a signed copy will be mailed to you. Feel free to give me a call if you have any questions.

Sincerely,

MEMORANDUM

TO: File 63-9956
FROM: Sharla
DATE: April 17, 1992
RE: Licensing of Right

After reviewing the permit holder's response to my correspondence, it appears reasonable to further limit the annual volume for recreation use. The holder has stated that the ponds are used as intermediate facilities for irrigation purposes during the normal irrigation season in addition to occasional fishing (assumed year-round). Total volume for the 4 ponds is .3 acre feet:

Pond 1 - 40 X 14
2 - 40 X 14
3 - 40 X 14
4 - 135 X 14

assumed depth = 4 feet = TOTAL ~ 14,280 sq. ft. (0.3 af)

Since the direct flow component for irrigation will cover the use of the ponds during the irrigation season, it seems appropriate to list the ponds' use for the rest of the year as **recreation storage**.

Sirs:

Department of Water Resources

In reference to your letter of March 2, 1992
the ponds you ask about are multi-purpose,
mainly they accumulate water for irrigation to pump
on to the 7 acres we have. The well water
spills from Pond #1 to Pond #2 to Pond #3 and then
to Pond #4. I have a fairly large pump on
pond #4 and smaller pumps on #3 & #1.

I have fish in the ponds mostly used
for handicap kids to fish from on occasion.

Since the dry weather many farmers have
put down wells, cutting the volume of our
well by about 1/2.

Ponds 1, 2 & 3 are fenced & I raise ducks
in this area.

Since we are #17 on a ditch with 17
patrons. It's near impossible to get ditch
water so have to rely mainly on the well
& ponds for irrigation.

Hope this gives you the info you wanted

Sincerely

T. L. Mitchell

Dear Mr. and Mrs. Mitchell:

In correspondence dated 5/3/90, Jim Johnson of this office sent a draft copy of the license we proposed to issue on the above referenced permit. However, before a license can be issued, more information is needed as to the extent of water use from the wells. I ask for your help in answering the following questions:

- 1) Four (4) ponds are fed by the artesian well. What are the ponds used for?
- 2) What are the water requirements of the ponds? How much volume is diverted to the ponds? How many times are they refilled and why?

Please submit this requested information within 15 days so that I can proceed with license issuance. If you have any questions, please give me a call.

Sincerely,

SHARLA CURTIS

TO: Jim Johnson
From: Mark Slifka *MS*

Reference: Artesian well construction--WR 63-9956/Mitchell

Jim, based on the drillers report and the surface equipment shown in the pictures and the diagrams this well meets the minimum well construction standards for an artesian well. The only unknowns or concerns are 1)the operational integrity of the existing valves and 2)the fact that the well was sealed with "well cuttings". The well cuttings themselves are not an approved seal material, however, the strata producing the cuttings are predominantly clay and fine sand which should have made a good "puddling clay" seal material. The well is likely adequately sealed to prevent downhole wasting of artesian water.

RE: REVIEW OF BENEFICIAL USE FIELD REPORT

DATE: June 13, 1990

=====

The recommendation for 101.4 acre feet annual volume for recreation listed on the beneficial field report was calculated based upon a constant 24 hour diversion of 0.14 cfs. This is more water than required for this use. A description of how the water was used for recreational purposes was not provided. But the examiner did state that source was under artisan pressure and that it flowed continuously through the ponds and into Teeter Drain.

The appearance is that of water being diverted in excess of identified beneficial use. Even though water requirement for Recreational use is not fully defined.

No further action toward licensing should be taken until the diversion of water is in compliance with artisan well statutes.

PROOF DUE NOTICE

RE: Permit No. 63-9956

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1987. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

The exercise of this permit may also be affected by the outcome of a case that has recently been decided by the Idaho Supreme Court entitled Idaho Power Company vs. State of Idaho, et al., Idaho Supreme Court Case No. 13794. The decision, filed on November 19, 1982, indicates that flows of water through the power plant at Swan Falls are entitled to protection from uncompensated depletion of flows upstream of Swan Falls. The court found that such flows in the Hells Canyon reach of the Snake River are not similarly protected, but rather are subordinated to future upstream depletions for consumptive uses. The full impacts of this decision are not yet clear, and the case has been partly remanded to the District Court so further litigation on the matter is forthcoming. The Department of Water Resources has been advised that Idaho Power Company is not waiving any rights to contest or limit the exercise of your permit or subsequent license.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed instructions entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
