BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PERMIT NO.)
63-9275 IN THE NAME OF)
RALPH L. &/OR LUCILE LITTLE)

ORDER OF REINSTATEMENT

This matter having come before the Idaho Department of Water Resources (Department) the Department finds as follows:

FINDINGS OF FACT

1. On September 13, 1979, the Director of the Department of Water Resources issued Permit No. 63-9275 with a condition of approval that proof of construction of works and application of water to beneficial use be submitted on or before September 1, 1984.

2. On June 30, 1984, the Department sent a proof due notice to the permit holders.

3. On September 17, 1984, the Department sent a lapse notice to the permit holders since neither proof of beneficial use nor a request for extension of time had been received from the permit holders.

4. On February 5, 1990, Proof of Beneficial Use was received by the Department from the permit holders.

5. Section 42-218a, Idaho Code, authorizes the Department to reinstate a lapsed permit, with the priority date advanced to the date that proof of beneficial use was received, upon submittal of evidence clearly establishing the

MICROFILMED

MAR 13 1990

extent of beneficial use prior to the proof due date and a showing of reasonable cause why the proof was submitted late.

6. The permit holders submitted evidence to confirm that water has been put to beneficial use. Evidence includes power service records from Idaho Power Company confirming that service was established prior to the proof due date and a signed statement from a water user within the subdivision attesting to the use of the well prior to the proof due date.

7. The permit holders have stated that proof was submitted late because they had overlooked submitting proof when it was originally due.

CONCLUSIONS OF LAW

1. The permit holders have submitted proof of beneficial use along with supporting evidence which establishes that water was in fact beneficially used as identified on the permit.

2. The permit holders have shown sufficient cause why the proof of beneficial use was not submitted in a timely manner.

3. The permit can be reinstated with the date of priority advanced to the date proof of beneficial use was received by the Department.

ORDER

IT IS HEREBY ORDERED that Permit No. 63-9275 is reinstated.

IT IS FURTHER ORDERED that the date of priority of this permit is advanced to February 5, 1990.

Dated this 22nd day of February, 1990.

RE: Permit No. 63-09275

Dear Permit Holders:

We are in the process of licensing the above referenced water right. Because of an insufficient examination fee, the Department has no alternative but to issue the license for less than the amount actually diverted unless an additional fee is received. The amount of water to be licensed will be limited to 2.0 cfs rather than 2.48 cfs.

You can submit the additional exam fee along with a late payment penalty. The priority of the right will be advanced according to the number of days from the date of this letter to the date we receive the extra fee.

The exam fee required to cover the 2.48 cfs is \$25.00 and the late payment penalty is \$25.00, for a total of \$50.00.

The Department will hold action on licensing this right for 30 days to allow you to submit the above fee. If we do not receive the additional fee, we will proceed with licensing the water right for the limited amount of water.

Sincerely,

PAMELA SKAGGS
Water Resource Agent

No overlaps

Should limit to 0.02 cfs per acre $\Rightarrow$ 124.2 acres (0.02 cfs/acre) = 2.48 cfs
and 558.9 AFA from calculations sheet.

★ However because only 125⁰⁰ was paid for proof of beneficial use we must limit this permit to 2 cfs if additional fees are paid limit to the above.

IRRIGATION RIGHT FROM A GROUND WATER SOURCE

A theoretical calculation is necessary to determine if a measurement is required for irrigation from a groundwater source.

=====

1. Using the found acres (or an estimate by the permit holder) calculate the acre-foot per annum limit. This is the volume that the system must be able to theoretically produce to exclude a rate of flow measurement.
2. Next, given the pump hp and the estimated dynamic water level, calculate the theoretical rate of flow that the system can produce.
3. Using the rate found in step 2 and the days in the permitted irrigation season, calculate the theoretical AFA that the system could produce. This volume is then compared to the first AFA calculation. If the theoretical volume (step 3) is greater than the irrigation requirement volume (step 1) then no measurement is necessary. If it is less, then you must make a diversion rate measurement during the field examination.

1.
$$\frac{124.2}{184.8} \times 4.5 = 558.9$$

Found Acres * Irr. Req. = AFA
 2.
$$\frac{(30) \text{ HP} \times 8.8 \times (.7) \text{ EFF}}{(\cancel{240}) \text{ Dyn Level} + (2.3 \times \{0\} \text{ PSI})} = 13.2 \text{ CFS bad results}$$

Theor. Div. Rate
 3.
$$\frac{14}{\text{used from } 0.02 \text{ cfs/acre}} \rightarrow \frac{2.48}{\text{Theoretical Div. Rate}} \times \frac{246}{\text{Days in season}} \times 1.9835 = 1210.1$$

Theor. Div. Rate * season * factor = AFA
- Note: for electrical motors Data Requires Verification ☐
 EFF = 0.70 Measurement Required -- ☐
 for diesel motors Measurement Not Required ☒
 EFF = 0.60

Calculation data sources:

Found acres = 124.2 ✓
 HP = 30
 Dyn Level = 14 from owners records + well log
 PSI = 0

Dear Mr. & Mrs. Little,

Permit No. 63-0275

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Please note the special condition requiring you to install an access port or other device to provide for the installation of measuring equipment by the Department. Enclosed are specifications for the installation of the access port, as well as a list of measuring device options.

The exercise of this permit may also be affected by the court's determination of water rights in the case of Idaho Power Company v. State of Idaho, et al., Civil No. 62237, currently pending before the District Court of Ada County.

Idaho Power officials tell us that because of Case No. U-1006-124 filed before the Idaho Public Utilities Commission, Idaho Power Company is asking the District Court of Ada County to determine whether the Power Company's water rights on the Snake River are protected against subsequent upstream appropriations in the waters of the Snake River and surface and subterranean tributaries between Milner Dam and Hells Canyon.

Since the use of water under your permit may affect the flows in this reach of the Snake River, the final decision in Idaho Power Company v. State of Idaho, et al. (Ada County Civil No. 62237) may determine to what extent the exercise of your permit may be subject to the water rights of Idaho Power.

While the Ada County court is examining this question, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised the the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or a subsequent license or water right.

If you have any question, please let us know.

Sincerely,

DAVID R. TUTHILL, JR.
