Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

Application for Transfer

63-09058, 63-09074, 63-09881, 63-10555

The applicant seeks to add a point of diversion to 63-09058 and 63-09881 to reflect the integration of the irrigation system and to add a new well to all four rights. The wells are supplemental to Wilder Irrigation District water. The 1987 NRCS map and 1994 scanned airphotos (map nos. H-0, G-0, G-1) confirm irrigation of the entire POU.

The applicant also seeks to change the places of use for portions of 63-09058 and 63-09881 to reflect the installation of a pivot in the SW4 S31 T5N R5W. The center of the pivot is in the NW corner of the SW4, and irrigates the lands in the SW4 on the north side of the canal.

The application retires 15 acres from the NWSE (63-09881), 1 acre from the NESW (63-09881), and 1 acres from SWSW (63-09058). The resulting 17 acres are moved to the SESW, north of the canal, on previously non-irrigated acres.

NRCS has determined, based on 1997 aerial photography, that the new pivot irrigates 116 acres (see application attachments A1 and A2). The 1987 NRCS (ASCS) shows 116.2 irrigated acres in the SW4 and NWSE. 121 acres of irrigation are licensed in these QQs. 1.7 acres (SWSW) of the 121 acres has been sold to another party, leaving 119 licensed acres for the applicant. The SRBA claim shows all 121 acres in the name of one owner (see ownership discussed below).

The 3 acre discrepancy (116 found, 119 licensed) is 2.5% of the licensed acres. The rights can be reduced in the approval for the transfer, or can be left for SRBA review. Should the rights be reduced, two acres should come out of the SWSW (63-09058), since two acres (1.7) have been sold to another owner. The other acre should come from the NESW (63-09881), where the NRCS map appears to show that the pivot misses more than 1 acre (1 acre is moved to the SESW by this transfer).

63-09881 (licensed at .02 cfs/ and 4.5 af/acre) could be reduced by 1 acre in the transfer. The other two acres coming from 63-09058 are licensed at .0125 cfs/acre - a reduction of 2 acres would result in a rate of .0126 cfs per acre. This rate of diversion is acceptable, but the volume should be reduced by 9.0 afa.

The application for transfer should be approved. If the approval reduces acres, conditions should include the changes in rate of diversion and diversion volume, including combined rate limitations on 63-09058 and 63-09074.

SRBA claims have been filed on 63-09058 and 63-09881. The other two rights are not subject to the SRBA. 63-09058 was split by ownership in the SRBA. 63-09881 was filed by the previous owner. The applicant is purchasing the lands described in A63-09058A and A63-09881 under contract, and will provide IDWR with a notarized statement providing permission of the lien holder to proceed with the application for transfer.

CONVERSATION MEMORANDUM

DATE 03/26/1998FILE Appl. For TRANSFERNAME OF PARTY RON SMITHEMPLOYEE T. T. INICUECI

RE: Mr. Smith submitted additional information for his transfer application today. Based on this information we corrected his application to show the movement of ~~acre~~ irrigated acres to the SESW S 31 T 5 N R 5 W. The transfer also seeks to add a POD to all of Mr. Smith's GW rights.

Mr. Smith brought a 1987 ASCS photo of his property (Attachment A1 of Transfer). Mr. Mike Anderson of the Canyon County FSA, using 1997 FSA photos, determined the acreage under the new pivot in the SW 4 of S 31. The center of the pivot is in the west $\frac{1}{4}$ corner of the section. Mr. Anderson found 116 acres for the pivot, with a loss of 16 acres in the NWSE + NESW, and 1 acre in the SWSW where the swinging pivot fails to reach land previously irrigated. He also found that the new field is 17 acres. The application was ~~not~~ corrected to show the following acres moved to the SESW:

15 acres from NWSE	63-09881
1 acre from NESW	63-09881
1 acre from SWSW	63-09058

63-09058 will show 19 total acres in the SESW, 18 south of the canal and 1 above the canal.

Also, a small parcel in the SWSW corner, which was shown as a portion of the right by the BIV exam, has since been sold + is not irrigated by the applicant. This parcel is shown as consisting of 1.7 acres (see Attachment A1).

2. Overlap Analysis Narrative

Working backwards through the overlapping rights, 63-02388 is just a P/U overlap with a different source. This overlap can be handled with licensing recommendation R-32. ✓

63-09881 is irrigated from well # 1. The well delivers the water into a ditch system and then the water is pumped by a different pump to the P/U. The P/U is separate from acres under this permit. The land is currently owned by another individual. It is licensed for 45 acres @ 1.6 cfs.

63-09074 is irrigated from well # 1 and well # 2. The P/U is different acres but uses the same ditch system as this permit. That right was examined at the same time as this permit. The system can produce a volume larger than the combined legal limit and therefore these acres have no limiting affect on this permit. This permit is recommended for licensing for 952 acres @ 8 cfs.

63-09058 is licensed from P/D # 1. The system is for 128 acres at 1.60 Cfs. 35 acres in the SW/NW of sec 31 overlap with this permit the remaining 94 acres are in the SW 1/4 of sec 31 and do not overlap with the permit acres.

Afa analysis of 63-9058:

afa required: 128 A * 4.5 = 576.0 afa
system capacity: 1.6 cfs * 246 * 1.9835 = 780.7 afa

*** The system can supply the AFA requirement for all of the acres under the license therefore the 34 overlapping acres are to be EXCLUDED from any licensing recommendation from the same P/D.
