We trust this information will be sufficient to complete our permit requirements and we look forward to receiving our permanent license. If there are any other requirements please contact me at your convenience.

Re: Water System

Dear Mr. Pocta:

This letter is in regards to the well capacity check that Mayne Pump Company performed on July 28, 1983.

This particular well produced 400 GPM at 40 PSI and 600 GPM at -0- PSI, open discharge. As to the check valve slamming shut in the well, I don't feel that this is any more abnormal than most other systems of that capacity, etc.

In regards to your billing of invoice No. 869, I have credited \$303.75 in parts, \$13.67 in sales tax and \$50.00 in labor for a total credit of \$367.42, leaving a balance of \$147.03.

Roger, I hope this will help you conclude your problems out there, and if I can be of any further assistance, please feel free to call.

63-8857: This department will have to review and to approve the plans and specifications for the water supply and the water system for the Klugherz Subdivision before it is begun.

77-7059 and 77-7060: We have reviewed these two permit applications. Our only comment is that these alterations should be conducted in such a manner as to minimize turbidity.
