SNAKE RIVER

HYDRO POWER

IDAHO POWER COMPANY

BOX 70

BOISE, IDAHO 83721

December 30, 1977

Dear Wateruser:

The records of the Idaho Department of Water Resources indicate that you have either filed an application or been granted a permit to appropriate waters of the Snake River, or surface or subterranean waters which are, or may be, tributary to the Snake River between Milner Dam and Hells Canyon in the State of Idaho.

In the summer of 1977, a complaint was filed against the Idaho Power Company with the Idaho Public Utilities Commission suggesting that the Company had been remiss in not protesting all applications to divert water which would deplete the flows in this reach of the Snake River and its tributaries. It was also alleged that this failure to protest water diversions has and will cause a reduction in the generating capacity of the Company's hydroelectric plants on the Snake River and its tributaries between Milner Dam and Hells Canyon. The complaint also alleges that this alleged failure to protest water diversions has and will increase electrical costs to the Company's customers.

Due to this controversy, the Company has filed a lawsuit in the District Court of the Fourth Judicial District of the State of Idaho for Ada County asking the Court to determine whether or not the Company has a protectable right in the waters of the Snake River and its surface and subterranean tributaries between Milner Dam and Hells Canyon, and the extent which the Company must attempt to prevent present and future water withdrawals. The Company also requested the Court, pending a decision, to temporarily prohibit any water applicant permit holder from requiring the Company to hook up electricity to an installation which would allow the pumping of water which may further deplete the flows in this reach of the Snake River and its tributaries.

If your contemplated electrical installation for water pumping has not been previously hooked up for electric service, be advised that until these matters have been ruled on by the Court an electrical hook up for your water pumping purposes, other than for domestic purposes, will not be made, unless ordered by the Court. Please understand that these proceedings are complex and are necessary to determine future water policies for the State of Idaho and the Company. Your patience and consideration in this matter will be appreciated.

Very truly yours,

James E. Bruce
President

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

NOV 14 1986

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Dear Mr. and Mrs. Beauclaire:

Re: Permit No. 63-8409

PROOF DUE NOTICE

One of the conditions of approval of your water permit No. 63-8409 was that proof of the extent of your beneficial use must be submitted to this office on or before May 1, 1986. (See the last page of your approved permit or your last approved extension request). Enclosed is a form which may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time provided the delay is for reasonable cause as described in Section 42-204, Idaho Code. If you have been prevented from proceeding by a government agency or by litigation, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either the beneficial use form or a request for an extension of time must be received by this department on or before the above-described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager

Dear Mr. Beauclaire:

Thank you for responding to our letter of December 31, 1981 by submitting a request for an extension of time in which to submit proof to beneficial use of water under Permit No. 63-8409.

However, Idaho Code allows the Director to approve requests for extension of time if the permit holder can show that he has made reasonable diligence toward permit development; you indicated ~~that~~ your request form that no work had been done. Therefore, based upon this information rather than officially acting on your request we are returning your Check No. 3431, 92-9/1241 with the suggestion if you still plan to develop the water as intended you refile for a new permit.

It is our understanding that Idaho Power will not deny hook-up to people who will use water for domestic and small acreage irrigation. Therefore, if you have correspondence from them where they have denied your request please provide us a copy.

If you have additional information concerning the permit or wish us to act officially on your extension request, please return the form with the check on or before March 1, 1982.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor
