Dear Mr. & Mrs. Cofield:

One of the conditions of approval of your water Permit No. 63-8118 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before JUNE 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Coffield:

C The information regarding the points of diversion under your Permit No. 63-8118 should be included on the proof of beneficial use affidavit that will be sent to you shortly before June 1, 1976. The proof of beneficial use is your final step prior to the issuance of a license for the irrigation of your property.

P Normally the source is shown as the name of the stream at the point the water is taken under control, which probably for your project would be Loggers Creek. But, that may be determined when our field examiner visits your project prior to the issuance of a license.

P Your January 7 request for clarification for your point of diversion has been placed in your file for consideration at the time of final licensing.

If you have any questions, please let us know.

Re: Application No. 63-8118

Dear Mr. Fleenor:

On my original application for water rights it was stated that the supply of water was a drain ditch but this said drain ditch empties into logger creek and the actual point of pumping and usage is downstream on loggers creek with the creek being used as a means of diversion.

Subsequent documents received from you have omitted the above information and make it seem as though my pumping is taking place directly from this drain ditch. I would prefer the final patented water right read as follows:
3. Ada County; additional points of diversion if any (The unnamed drain mentioned under topic 2. is the source of water but the pump is located 474 feet downstream on loggers creek from the confluence of said drain ditch and loggers creek.)
