Dear Mr. White:

Re: Permit No. 63-8064

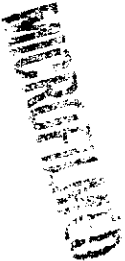

On January 18, 1980, this office received your letter explaining that the Department of Transportation, Division of Highways is beneficially using the water appropriated under Permit No. 63-8064 and that they wish to maintain this water right. The Department acknowledges your letter as a statement of beneficial use and has enclosed a copy of the order reinstating your permit without an advance in priority. We apologize for the confusion between your water right and the Division of Aeronautics's water right.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

If you have any questions regarding the field examination, please contact our regional office in Boise (334-2190).

Sincerely,

RITA FLECK
Sr. Secretary

Dear Mr. Allred:

Pursuant to your recent letter concerning existing permit no. 63-8064 - Curtis Well - please be advised that the Idaho Transportation Department, Division of Highways, does not want to relinquish its rights to this well.

The Division of Aeronautics and Public Transportation was contacted about filing proof of beneficial use rather than the Division of Highways. Aeronautics does have a well on South Curtis Road that they no longer use and they mistakenly canceled our permit rather than their own.

The Division of Highways uses 63-8064 to irrigate the landscaping at the Interchange on Curtis Road north of St. Alphonsus Hospital.

Very truly yours,

Re: Application for Permit No. 63-8064

Gentlemen:

During the final processing of your application No. 63-8064, we have developed a question concerning the number of water rights actually being established.

Examination of this application indicated that the two wells involved will be separated by a considerable distance. It also appears that the two are not connected in anyway. That is, each well is pertinent to its own area and could not actually supply water to the second irrigated area. This would indicate that there will be two separate water rights involved.

If you agree that this is the case it will be necessary to file a second application to cover the No. 2 well and irrigated area which would be deleted from the original application. We have enclosed a proposed application form with the information concerning the No. 2 well on it. We have also enclosed a retyped form containing the information covering the original No. 1 well and deleting the other information. Please sign both forms and return them with a new filing fee for the second application in the amount of \$25.00.

If we can be of any further assistance in this matter please feel free to contact this office.

Sincerely,

JAMES E. BOOKER
