NOTICE OF PROPOSED CHANGE OF WATER RIGHT

63-08005 ✓ at

Notice is hereby given that the City of Garden City has applied to the Department of Water Resources for a change of Point of Diversion from groundwater. The right sought to be changed is evidenced by License and is recorded as follows:
Amount: 480 cfs ← Should be 4.80 Not Fatal Div
Priority: 7/10/1974
Point(s) of Diversion: T4N R2E S31 Lot 14 (SENE).

The water is used for Municipal purposes within the city limits of Garden City.

TO BE CHANGED AS FOLLOWS
Amount 4.80 cfs

Point(s) of Diversion: T4N R2E S31 Lot 14 (SENE) and T4N R1E S23 SWNESE. The water will be used for Municipal purposes within the city limits of Garden City.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705 on or before September 24, 1990.

PART 1

6. General Information:

a. Description of diversion system Estimate 400' well, electric pump, pipe approx 20' to existing 12" diameter ductile iron pipe main.

b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? NONE Yes _____ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

NO change

d. Remarks:

Well #9 is being drilled to provide water lost when well #5 shut down by order of I.D. Dept. Health's Welfare. We expect to redrill #5 in one or two years when contamination in area is gone or reduced. Then Garden City will apply for a new drilling permit to deepen well #5.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. 63-8005

And said application is hereby APPROVED, subject to the following limitations and conditions:

CONDITIONS OF APPROVAL

Transfer of Water Right No. 63-8005

Transfer No. 3786

1. The transfer applicants shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. The change authorized by this transfer shall be accomplished within (1) year of the date of this approval.
3. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
4. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Dated this 17th day of May, 1991.

BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF CHANGING THE MEASURING
DEVICE REQUIREMENT FOR PERMIT NO. 63-8005

ORDER

WHEREAS, the above numbered permit was approved with the condition that a measuring device of a type approved by the Department be permanently installed and maintained as part of the diverting works; and,

WHEREAS, on July 1, 1978, the Department adopted a new water measurement condition which states: "An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department"; and,

WHEREAS, the former condition required the permit holder to purchase and install a measuring device or hire a professional engineer to certify the rate of diversion; and,

WHEREAS, the measuring device condition effective July 1, 1978, requires less capital expenditure by the permit holder; and,

WHEREAS, to be equitable to holders of permits issued prior to July 1, 1978, the new condition should be retroactive;

NOW THEREFORE, it is hereby ordered that the condition of approval of this permit related to water measurement is hereby changed as follows: "The permit holder shall either install a measuring device or provide a certified measurement by a professional engineer or install an access port or other device as specified by the Department".

- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing City of Garden City is a municipal corporation representing the citizens and water users of Garden City

10. Remarks This application is for water in addition to water obtained in above listed water permits and licenses, and is required to provide for increasing population demands upon the present municipal water supply and distribution system of the City of Garden City, Idaho. Municipal water is used for domestic, commercial, industrial, irrigation, recreation, and fire protection purposes. Additional water supply is also immediately necessary to provide water for new services to be obtained by extending the Garden City public owned water and sewer system to serve an area extending from E. 46th Street to the Ada County Fairgrounds, lying between the Boise River and the first land bench to the South. Garden City is a fast growing community. Census population for year 1960 was reported to be 1689 person, 1970 equals 2368 persons, 1974 estimated population is 3600 persons, and 1974 estimated population equivalent served is 5500 persons, which includes mobile home parks, motels, apartments, restaurants, clubs, etc. Sprinkling irrigation needs are increasing as more open space areas are developed to densities where open ditch irrigation is no longer feasible or possible. Year 1980 forecast population is 9,000 persons (90% of ultimate), and year 1980 forecast population equivalent to be served is 20,000 persons.

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER ADMINISTRATION

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-8005, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 19 79.
- c. Other: A measuring device of a type approved by this Department shall be permanently installed and maintained as part of the diverting works.

2. Denial of said application is for the following reasons: _____

Witness my hand this 27th day of August 19 74.

RE: Approved Transfer No. 3786/Water Right No. 63-08005

Dear Water Right Holder:

On May 17, 1991, the Department approved an application for transfer of the above referenced water right(s). A copy of the transfer as approved has been enclosed for your reference. One of the conditions of approval of this transfer was that the authorized change(s) be accomplished within one year of the date of approval.

Please complete and return the enclosed form to confirm that the transfer has been accomplished. If the approved transfer has not been completed or is only partially complete, please provide an explanation why the changes have not been made and give an expected date for completion. The form must be returned to this office within 15 days of the date of this letter. If you wish to return the form by FAX, the number is (208)327-7866.

Please contact me if you have questions concerning this matter.

Sincerely,

SHARLA CURTIS

MEMORANDUM

TO: FILE

FROM: TIM LUKE *TL*

DATE: May 16, 1991

RE: TRANSFER 3786/RT. NO. 63-8005

=====

This transfer seeks to add an additional groundwater well/point of diversion to the above licensed right which is held by the city of Garden City. This new well is needed because the city has been forced to shut down one of its existing wells due to water quality and contamination problems.

I recommend approval of the transfer with the conditions below. Included is a standard condition concerning well drilling permits. Due to the Garden City contamination problems, I feel it would be prudent to remind the city of the well drilling permit requirements. The department's drilling permit will probably have a number of special conditions that are unique to that area and the water quality problem.

- 1) The transfer applicants shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- 2) <<T07>> The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
- 3) <<T08>> Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
- 4) <<T09>> Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Re: Application for Transfer of Water Right No. 63-08005

Dear Mr. Mayor:

Enclosed is a transfer application prepared from a copy of the original one submitted to this office on 7/12/90 and returned to your office via my 8/21/90 letter. I spoke with Rick Cummings recently and was informed that the previous letter and original transfer application cannot be found. We agreed that a new application would be prepared for your (or someone else's) signature.

The new form should be signed and notarized and returned to this office by 11/19/90. No additional fee is required. Please contact me if additional help may be provided.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Steve Lester'.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

63-08005

Notice is hereby given that the City of Garden City has applied to the Department of Water Resources for a change of Point of Diversion from groundwater. The right sought to be changed is evidenced by License and is recorded as follows:

Amount: 4.80 cfs Priority: 7/10/1974

Point(s) of Diversion: T4N R2E S31 Lot 14 (SENE).
The water is used for Municipal purposes within the city limits of Garden City.

TO BE CHANGED AS FOLLOWS

Amount: 4.80 cfs

Point(s) of Diversion: T4N R2E S31 Lot 14 (SENE) and T4N R1E S23 SWNESE. The water will be used for Municipal purposes within the city limits of Garden City.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705 on or before September 24, 1990.

Re: Application for Transfer of License No. 63-08005

Dear Sir:

Enclosed is the transfer application for the above license concerning a new well for the municipal water system. Please note several changes made on pages 1 and 3. The application implies that well #5 will be inactive for one to two years and eventually will be deepened and reused. Meanwhile, a new well is proposed (#9) for the system. It appears that your goal is to keep well #5 as a diversion point in license 63-08005 and to add another diversion point to the water right. The correction on page 1, item B4, reflects the desire for two diversion points for the license. On page 3, the location of the current diversion point or well #5 was corrected.

A reference to municipal use north of State Street is found on pages 1 and 3. Please be advised that water use is restricted to the city limits of Garden City under license 63-08005. Unless the city holds a water right(s) to apply and use water outside of the city limits, such use would constitute an illegal diversion under Idaho Code 42-351. Unless I am mistaken, the Garden City limits do not fall north of State Street in the vicinity of Gary and Pierce Park Lanes. Perhaps a new appropriation of water (application for permit) should be considered to use water beyond the city limits.

Because the transfer application was notarized, please review the changes and indicate approval of them by initialing and dating the form at the upper right area on page 1 (see "changes approved by" and "date" lines). Return the application to me within 30 days. Meanwhile, a copy of the transfer will be used to advertise and otherwise process your application. Please contact me if additional help is needed.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Steve Lester'.

RE: Permit No. 6308005

City of Garden City
201 E. 50th St.
Garden City, ID 83704

Gentlemen:

A representative of this Department has made an examination of the works covered by your Permit No. 63-8005, and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 4.8 cfs Source: groundwater

The maximum quantity diverted shall not exceed n/a acre feet
per year.

Point(s) of diversion: SE 1/4 NE 1/4, Sec. 31, Twp. 4N, Rge. 2E, Ada County

Beneficial use: Municipal use within the city limits of Garden City.

Priority date established: July 10, 1974

Conditions (if any):

If you do not concur with these findings please contact us within 10 days, otherwise a water license will be issued as set forth above.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is

APPROVED

Date

Ma 23
Feb 8, 1991

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
3. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Approval of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
9. If this permit is for a replacement well, the well being replaced must be abandoned in accordance with Department Rules and Regulations.

SPECIFIC CONDITIONS:

10. Changes to construction plans must be discussed with the IDWR prior to implementation.

RE: Permit No. 63-8005

Dear Sirs:

We acknowledge receipt of your statement submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department.

☒ A field examination of your system has been scheduled for

Friday, August 3 at 10:00 am.

If this time and date is not convenient for you, please contact this office as soon as possible.

☐ A field examiner will contact you to arrange to examine your system.

If you have any questions regarding the field examination, please contact this office.

Sincerely,

Kay Walker
Secretary

Dear Sir:

One of the conditions of approval of your water Permit No. 63-3005 was that evidence of the extent of development must be submitted to this office on or before August 1, 1979. (See last page of your approved permit). Enclosed is a post card which may be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use post card or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise, the permit will lapse and be of no further force or effect within 60 days.

Sincerely,

RITA FLECK
Sr. Secretary

Dear Wateruser:

The enclosed Order changes the measuring device condition of approval on your water right permit.

The changed condition should be less restrictive and provide more flexibility to you in the development of your water right system. The specifications related to the size and location of the access port will be available upon request from the Department, as soon as the Department's measuring equipment is obtained.

If you have questions regarding this matter, please contact this office or our regional offices.

Sincerely,

L. GLEN SAXTON

INTRODUCTION

This evaluation report, on groundwater for the proposed new Garden City well number 5, was written at the request of Carlyle W. Briggs, of Briggs and Associates Consulting Engineers, for Garden City's present and future municipal water system.

The proposed new Garden City well is to be located in the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 31, T.4N., R.2E., B.M., Ada County, Idaho. The street location is between 47th and 48th Streets, on Adams Street, in Garden City, Idaho (Fig. 1). This site was chosen as the most desirable location for the new well that would best fit the proposed future expansion of Garden City's municipal water system.

Information for this report was gathered from a number of sources. These sources are: the Idaho Department of Water Administration; the United States Geological Survey, Boise; Boise Water Corporation; Capital Securities Water Corporation; and Briggs and Associates Consulting Engineers.

Acknowledgements are extended to the above governmental agencies, companies, corporations, and to Dr. Leland Mink of the Idaho Bureau of Mines and Geology.

Groundwater Geology

The desired aquifer system for the new well is within the Glens Ferry Formation of the Idaho Group. This formation is dated geologically to be late Pliocene and early Pleistocene age.

Topographic Location Map

Taken from USGS, 7½ minute quadrangle maps (1954)

Scale 1"=2,000'

Date 11-11-73

63-8005

Stratigraphically the formation is composed of alternating layers of shale, clay, silt, and sand. The thickness and degree of lithification of these layers varies throughout the formation. The formation generally dips towards the southwest which establishes the usual flow of groundwater to be from the Boise Front, the system's recharge area, to the Snake River, the discharge area.

Due to the variations in the stratigraphic sequence in the Glenns Ferry Formation, groundwater conditions also vary throughout the area under study by this report. Generally the confined aquifer system is made up of several interbedded layers of sand and shale. These layers not only vary in thickness and degree of lithification between each other, but also within each layer itself. Because of these variations, permeability and porosity also vary, which affects the specific capacity of wells throughout the area.

The Glenns Ferry Formation, considered the deep aquifer system in the area of this report, has several suitable characteristics complementing its use for the new well. First, the aquifer system is confined, making it an artesian aquifer. Although wells into the system are quite deep, the high artesian head makes it economical for pumping. Also, the deep aquifer system has good water quality compared with the shallow aquifer system in the area. Furthermore, despite some variations in the specific capacity of wells throughout the formation, there appears to be good potential for a high yield well in the area of study.

Investigation Results

From copies of well logs furnished by the Idaho Department of Water Administration and other sources several predictions can be determined for

63-8005

the new well. Twenty wells were chosen within the area as having characteristics pertinent to this study. Important facts on these wells are listed in Table 1, along with their location and illustration, by number, in Fig. 2. All of these 20 wells considered are in the deep aquifer system and are fairly well distributed throughout the study area. Of these 20 wells, certain ones had good well performance records and histories available. Most all of the wells considered are used for municipal, commercial, domestic, and irrigation purposes. Well yields vary from 10 gallons per minute to 1,500 gallons per minute, however, some wells in the deep aquifer system, outside of the study area, have well yields of up to 4,000 gallons per minute. No extreme problems in well drilling are known in the study area. Large boulders, however, are occasionally encountered in the river deposited alluvium along the Boise River. A very general lithologic profile consists of soil at the top, followed by river deposited alluvium, a blue shale or clay layer, and finally a sequence of alternating clay, shale, and sand layers.

Several specific characteristics can be predicted for the new well from available information. By projecting the lithologic profiles of three existing wells into a linear arrangement with the proposed new well, a good prediction can be made on the new well's lithology. Consult Plate 1 for the projected lithologic profile results. From Plate 1 it can be seen that a well approximately 454 feet is needed to reach the top of a good water bearing stratum. Due to the variations in the stratigraphic sequence of the Glens Ferry Formation the projected geologic profile should be considered only as an approximation. Differences of as much as 20 feet could be expected in stratum thicknesses along with slight differences in stratum compositions.

Plate I

63-8005

A piezometric surface contour map was drawn from information provided by the well logs (Fig. 2). From the contour map, depth to water, groundwater flow direction and, to a limited degree, interference with adjacent wells can be predicted. By comparing the elevation of the ground at the new well site with the contour map, a depth to water figure of 0.0 feet can be deducted. Since groundwater moves perpendicular to contour lines and from areas of higher elevations to lower elevations, the general groundwater flow pattern can be determined from the contour map. Water flows to the new well site from the northeast and the south, and away from the well site to the northwest. Because groundwater flow, away from the well, is to the northwest only, interference with other wells could be expected to be the heaviest towards the northwest. Those wells 'upstream' from the new well site should not be appreciably affected, only those 'downstream' would be affected. No interference has been noted between wells to the northeast and the south, with wells closely adjacent to the new well site. Also no interference to date has been noted between wells closely adjacent to the well site and those to the northwest. The piezometric surface contour map can be considered to be a fairly accurate representation of the actual field conditions. Seasonal variations in depth to water, of as much as four feet, have been noted in some wells in the southern portion of the map. These seasonal differences are not considered to be significant in affecting the creditability of this map. Although the wells used in this study were drilled at different times, which would mean that the depth to water measurements were taken at different times, the accuracy of the map should not be affected since there appears to be no secular changes in depth to water measurements during the time most of these wells were drilled to the present.

Conclusions

At the present time, plans indicate that a well yield of approximately 2,000 gallons per minute is needed, from the new well, to fulfill the requirements of the proposed extension to Garden City's present municipal water system. Through the evaluation of available material, from many sources, it is felt that a well producing approximately 2,000 gallons per minute could be developed successfully at the proposed site without appreciable interference to surrounding wells. Due to the variations in the Glenns Ferry Formation small differences can be expected from those predicted in this study. These differences are not considered significant enough to warrant further investigation into the exact conditions that are present in the field.

The practice should be continued, as with any other well drilled in the general area, of carefully checking for any possible effects to other existing wells at the time the subject well is test pumped after completion of drilling and developing operations. Such test pumping operations should be conducted over a period of time of 24 to 36 hours with continuous pumping, to be effective and indicative.

Dear Mike:

Subject: Garden City - Well No. 5 Site & Location. Your Letter of August 6, 1974.

Enclosed herewith are 3 prints of Dwg. No. CWB-740822 of the Garden City Well No. 5 location, and a copy of the Warranty Deed for the 100 foot by 200 foot well site acquired for Well No. 5.

Garden City is presently advertising again for bids on drilling the well. One bid was received on July 29th and was too high in cost to be considered for award. A second bid was received 15 minutes late, and was disqualified because it was received after bid opening time.

New bids will be opened on Tuesday, September 3, 1974, at 5:00 P.M. at the Garden City Hall.

Very truly yours,

Carlyle W. Briggs, P.E.
Garden City Engineer

For Value Received

WILLIAM M. LONG and ELAINE E. LONG,
husband and wife,

the grantor s, do hereby grant, bargain, sell and convey unto
THE CITY OF GARDEN CITY, IDAHO,
a municipal corporation

the grantees, the following described premises, ADA County Idaho, to wit:

West one-third (1/3) of Lots thirty-three (33) and
Thirty-four (34) of Block Twenty-two (22) in Fairview
Acres Subdivision No. three (3); as the same are numbered
and designated on the official plat of said subdivision
now on file in the office of the County Recorder, Ada
County, Idaho; and subject to taxes and assessments for
the year 1974 and thereafter.

*In the SENE of Section 31, T4N, R2E, B.M., at the corner
of E48th and Adams Streets.*

TO HAVE AND TO HOLD the said premises, with their appurtenances unto the said Grantees,
their heirs and assigns forever. And the said Grantor s do hereby covenant to and
with the said Grantee s, that they are the owner s in fee simple of said premises; that said
premises are free from all incumbrances

and that they will warrant and defend the same from all lawful claims whatsoever.

Gentlemen:

Enclosed is a copy of your approved Application for Permit No. 63-8005 . We direct your attention to the conditions of approval as listed on the fourth page.

Be sure to note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. We are enclosing a letter describing different types of measuring devices accepted by this office.

Sincerely,

BOBBY D. FLEENOR
Chief, Water Rights

Re: Application for Permit No. 63-8005

Dear Mr. Smith:

We are enclosing a copy of the above referenced application for permit which may be of interest to your agency. Please review the application and if you have any comments, please submit them to our department as soon as possible.

We normally complete the processing of an application within a six week period and we are required to take final action shortly thereafter.

If we may be of any assistance to you in the meantime, please do not hesitate to contact this department.

Sincerely,

KENNETH H. FOIT, P. E.

Re: Application for Permit No. 63-8005 - City of Garden City

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

(signature of claimant)

Sincerely,

Bill submitted

NOTICE OF APPLICATION FOR WATER PERMIT

Notice is hereby given that CITY OF GARDEN CITY, City Hall, 201 W. 33rd St., Garden City, Idaho has on July 10, 1974, submitted Application No. 63-8005 for a permit to appropriate 6.0 cubic feet per second of water from a groundwater source by means of present municipal water system within the SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 31, T. 4 N, R. 2 E, B.M., Ada County to be used from Jan. 1 to Dec. 31 for domestic and fire protection use and May 15 to Nov. 15 for irrigation of 978 acres within the SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 4, NE $\frac{1}{4}$, NW $\frac{1}{4}$, N $\frac{1}{2}$ SW $\frac{1}{4}$, ^{SE $\frac{1}{4}$} SE $\frac{1}{4}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$, Sec. 5, E $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 6, T. 3 N, R. 2 E; SW $\frac{1}{4}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 32, W $\frac{1}{2}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$, Sec. 31, SE $\frac{1}{4}$ SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 30, T. 4 N, R. 2 E, B.M.

If issued, this permit will be subject to all prior water rights. Protests against the granting of the permit must be filed with the Idaho Department of Water Resources, Statehouse, Boise, Idaho, 83707, on or before August 5, 1974.
